One of the tasks before the new manager is to build up a force that will, in the most severe weather of the winter, get the mail over the summit between Grant and Ross stations expeditiously, in order to maintain the one-day schedule between Helper and Vernal.—Renaissance (Mylon) News, 19th.

at thirty cents a pound, net to the grower.

He adds that prospects look quite favorable for sheepmen in the future, and that the lamb market still holds up well and if anything a little firmer. However, the latter adds that the range conditions are pretty dry at the present time.

"There does not seem to be any depreciation in the condition of lambs just now, but unless rain comes soon, the range conditions there will be somewhat of a falling off in the weight of lambs for the market."

ENGLISH WOOL SITUATION

Large Quantities Soon to Come to the United States.

LONDON, Aug. 21.—The wool situation at Bradford is an interesting one from the American standpoint. Labor for combing the wool there has been depleted to such an extent that woolmen have not only raised the question of the desirability of importing "tops" from America, but also the idea of shipping wool to America to be combed there and sent back here. The suggestion is also made that the difficulties might be met by bringing men back from the front to work the combing machines.

All the tops required by the English trade could be brought from Australia, but the latter supply seems to be going to Japan and as the difference in time of transit is so great, the desirability of treating with America is apparent. Heaps of wool are available, but few combs to work it with, leaves the price at a very high level.

One Bradford paper reports that the board of trade has signified its intention of allowing eleven million pounds of Scotch Blanketed out of the new clip to be exported to the United States, but no confirmation could be obtained from the board of trade of the war office on the subject.

The fifth series of Colonial wool sales, which commenced June 23th, with two hundred and thirty thousand bales available, representing a value of about four and a half million sterling, will probably be prolonged indefinitely, owing to the chaotic conditions at the warehouses and on the railways, selling brokers have agreed to restrict daily offerings to eight thousand bales, that being the

quantity which can be conveniently handled.

Very little frost has changed hands since the last auctions, but the market expects a small advance in the price of merino wool of good combing quality, and about unchanged rates for coarse, as the government is not giving out further orders for khaki at present.

THE INSURANCE LIMIT

New Order Permits Fourth-Class Mail Up to a Hundred Dollars.

Utah postmasters are receiving notification from the postoffice department at Washington ordering a change in the insuring of fourth-class mail matter, effective on September 1st. At present fourth-class mail can be insured only to the amount of fifty dollars. The new ruling allows insurance of this class of mail up to a hundred dollars. The new orders received by the local postmaster yesterday are as follows:

"Fourth-class mail shall not be registered, but may be insured against loss in an amount equivalent to its actual value, but not to exceed five dollars in any case on a payment of a fee of three cents, not to exceed twenty-five dollars on payment of a fee of five cents, not to exceed fifty dollars on a payment of a fee of ten cents, or not to exceed one hundred dollars on payment of a fee of twenty-five cents, in addition to the postage, both to be prepaid by stamps affixed, but indemnity will not be allowed in cases of loss of such mails addressed to the Philippine Islands, unless the loss occurred in the postal service of the United States."

FILED ON UTAH DRY FARMS ARE BEING MADE EVERY DAY

The state commissioner of immigration, labor and statistics reports that the entry of settlers into Beaver, Millard, San Juan and Utah counties continues, the filings on dry farms in these sections averaging ten daily, quite a number of the newcomers are from Colorado.

Commissioner Haines believes a very large number of settlers could be brought to the state, if he had five thousand more copies of his report for general distribution, as he is receiving requests for the book from many parts of the country.

One New York man who has seen a copy of the report writes: "It sounds like a romance sending of opportunity, land and crops in Utah, after living as I do in the thickly populated section."
