# The Sun

POLITICALLY, REPUBLICAN.

Entered as Second-Class Matter, June 4, 1915, at the Postoffice at Price, Utah, Under the Act of March 3, 1879.  
 VOLUME 1; NUMBER 18. EVERY FRIDAY OCTOBER 1, 1915.

**The Sun**  
 Maintains the most complete job printing establishment in Eastern Utah. Catalogue, brief and book work of every description. The Sun competes with Salt Lake City and Provo houses.

## CATTLE MARKET SHOWS ADVANCE

Large Receipts from All Sections of the West.

The supply of sheep and lambs advanced materially. Prices will climb on both feeders and fat stock is the prediction from all Mountain River points this week.

Independence—The Sun.  
 KANSAS CITY, Mo., Sept. 27.—Cattle receipts today were twenty-eight thousand head and included heavy steers from Colorado, a few from South Dakota, Oregon, Mexico and the Panhandle country. A larger percentage were stockers and feeders than any day before this year, and as there was ample demand for these, the market was satisfactory all around and steady to ten cents higher on all classes. The small portion of fat steers enabled salesmen to advance prices ten cents on the sale. About a hundred and fifty carloads of Colorado cattle were loaded, the best steers selling at \$12.25 with several strings of good beef steers from Platteville selling at \$6.70 to \$7.25. Feeders on Delta sold at \$7.50, and yearlings and cows sold largely between \$6 and \$7.50, cows \$5.75, heifers \$5 to \$6.50, a string of Utah yearlings brought \$7.45. A train of beef steers from Baker Co., Ore., sold at \$7.18 to \$7.18, considered steady. The South Dakota cattle were good, and only the tails were sold, the plain rough steers at \$6.10, with good ones put under the sheds for tomorrow. A feature here today is the buying by Eastern killers on account of the embargo New York placed against all live stock out of Chicago. This will throw many steers to Kansas City for cattle, and prices materially. A train of cattle will arrive for the week, and thirteen cars of the Montana stock, which cattle are assured of a good market. Panhandle receipts are small today, but the cattle were in strong demand, yearlings selling at \$11.85, choice calves \$8.00 to \$5.75, quarter higher than a week ago, steers and cows \$6.75 to \$7.75, wet \$5.90 to \$5.50, stock heifers \$4.25 to \$5.90.

Lambs and sheep sold twenty to thirty cents higher today, due to a large receipt. Only eighty-six hundred head here. Top lambs brought \$5.75. New Mexico breeding ewes \$7.00, fair Western breeders \$3.50, fat ewes \$5.35 to \$5.50, with lambs \$18.75. Common feeding lambs \$4.00 to \$4.10. Quality of feeders and lambs was deficient today, but the demand was very strong. Unless the supply increases prices will climb on both feeders and fat stock, as the buying side of the market is not ready for a slump in receipts at this time.

## All Records Are Broken.

KANSAS CITY, Sept. 27.—All 1915 records for cattle receipts from the states of South Dakota, Montana, Oregon, Utah, Colorado, New Mexico and Idaho were broken at the stockyards today. Two hundred and seventy-five cars were received. Feeders and stockers made up the lots. The unusual shipments, commission men at the yards said, came to Kansas City today because feeders cannot be shipped from the Chicago stockyards under an order adopted to avoid the spreading of the foot and mouth disease.

## NEW ELECTRICAL HOUSE

J. H. Manson to Engage in Mercantile Business at Price.  
 J. H. Manson, as manager of the City Electrical company, has taken over the Vigil-Bonomo corner store room and will be ready for business by the middle of next week at the latest. It is the intention, says Manager Manson, to carry a full and complete line of electrical supplies as well as automobile tires and automobile supplies of every description. Electrical contracting and repairing of every kind and nature will also be handled.

Considerable of the stock of the City Electrical company is already in and more is arriving each day. J. H. Manson, the manager of the new concern, is too well known to the people of Price to need any introduction from the Sun. Suffice to say, however, he is an "old head" in the electrical business. If Manson does it for you or with it to you, that is sufficient guarantee.

There is unquestionably a splendid opening here for such a line of goods as the City Electrical company proposes to carry and for the line of work it will contract. Anything electrical, Manson will have or he will get it for you on short order. He will be ready for business about the 5th or 6th of the month.

All the dwellings of the Utah Fuel company at Sunnyside are being treated to the best of paint. Four different colors are being used, no two houses in close proximity being alike. There are now a hundred of them all told. The Sunnyside mines are now working five and six days a week.

# SUNNYSIDE TEAM IS FIRST IN AMERICA

Utah Fuel company's team, which won the United States championship last Friday in the mine rescue contest at San Francisco. Left to right, rear—M. H. Detweiler, captain; Zeph Thomas, J. T. Johnson, George Usher. Front—George Clark, J. W. Littlejohn.

## UTAH FUEL STORY HAS NO FOUNDATION AT ALL

Last week's Sun gave prominence to an article from the Salt Lake Herald-Republican (dated Friday, September 24th), in which it was stated that Utah Fuel company, through its New York offices, was negotiating for the purchase of the properties of the American Fuel company at Neslen in Grand county, together with the holdings of the Neslen Mercantile company.

The Herald-Republican article went on to say that B. F. Bauer, president of the American Fuel company, was at the time in New York City and intimated that while there the deal unquestionably would be closed. The story was used by The Sun in good faith, this newspaper not having time to confirm the story. The sale price of the American Fuel company was placed at around \$1,500,000.

It is now officially denied by the head executive offices of the Utah Fuel company at Salt Lake City that any deal is on with the American Fuel company or that such a deal has ever been considered. No negotiations whatever are under way, and there is no foundation for the Herald-Republican story.

The Sun very cheerfully gives space to a correction.

## BURGLARY AT HELPER

Mercantile Concern Loses About Five Hundred Dollars Merchandise.  
 Burglary was committed at the store of Lonsdale Mercantile company at Helper last Tuesday night or early Wednesday morning and carried away merchandise to the value of about five hundred dollars, according to the statement of Sheriff Henry. At least that is the estimate placed upon missing goods by the store management. The loss is principally of clothing, shoes, furishing goods, silks, automatic revolvers, cutlery and the like.

Entrance was effected by prying an iron bar from a rear window of the main floor, after which the glass was broken from the window which allowed a man going through the remaining bars. Blood on and about the window sill would indicate that at least one person was cut by the breaking glass. On the other hand the quantity of goods carried off shows a more than one person was in the job.

The exit of the thieves was made through a rear door of the basement which door was locked or barred from the inside. The sheriff's office and the city marshal at Helper are working on the case, but at the hour of The Sun's going to press this (Friday) morning they have no clue whatever.

## PUSHING WORK AHEAD

Utah Power and Light Buys South of Camp of Hiawatha.  
 Utah Power and Light company's pole transmission line from Hiawatha to Huntington by way of Black Hawk and Mohrland is going right along with construction gangs working from each end of the line. It is expected to have it finished by the last of the present month in order to fulfill the contract with the town of Huntington for lighting the latter place.

J. H. Manson, manager of the City Electric company of Price, was over at the Emery county town yesterday. Half the poles are now in and considerable of the wiring for the city and private parties already done. He has a force of men on the job and will have all the work at Huntington done by the time the power line from Hiawatha is finished.

With the completion of the Hiawatha and Huntington transmission line it is expected the Utah Power and Light company will begin stringing wire and poles from Hiawatha west towards the proposed electrical station to be built at Spring Glen. Until this is in the "juice" for Huntington will be generated by the United States Fuel company at Hiawatha.

## WILSON HAS SAVED NATION IS W. J. BRYAN'S TRIBUTE

NASHVILLE, Tenn., Sept. 29.—William J. Bryan, in an address here last night, paid this tribute to President Woodrow Wilson:

"Happy for our nation that we have in the White House at this time a president who believes in setting the old world a good example, instead of following the bad example which the old world sets in this matter."

"What an unspeakable misfortune it would have been if it had been under the leadership of a president influenced by the false philosophy which has plunged Europe into the abyss of war."

## MORMONS ARE LEAVING

One Again Forced to Abandon Home in Old Mexico.  
 EL PASO, Tex., Sept. 28.—A special train of Mormon refugees from Western Chihuahua are coming out tonight and are expected to reach here Thursday night. The special train is carrying five hundred Mormon settlers in the entire Mormon colonies of Western Chihuahua.

Villa has established his headquarters at Casas Grandes, in the heart of the colonies, and is taking possession of homes, foraging from the Mormon farmers and is confiscating whatever is needed for his men or horses.

The United States government, through its diplomatic agents here, has wired Villa, demanding that the Mormons be given protection and permitted to come to the border un molested.

## FOREST SERVICE PLANS FOR POISONOUS PLANTS

OGDEN, Sept. 29.—Will C. Barnes, assistant forester in charge of grazing in the office at Washington, D. C., is spending a few days here in conference with the district forester and assistant foresters of this district. Barnes is especially interested in the erection of an experimental station to section of an industrial station to be built in the Fish Lake national forest headquarters at Malheur. When equipped this station will experiment with poisonous plants which grow on grazing lands and are destructive of stock life, with a view of exterminating them.

## ITINERARY OF CARBON COUNTY'S CHAMPIONS

Leave San Francisco, Wednesday morning arriving at Los Angeles, Wednesday night, September 29th. Stop at Clark Hotel. Thursday, September 30th, to Monday, October 4th, sightseeing at Los Angeles, San Diego, Pasadena and Beaches. Leave Los Angeles, Monday, October 4th, on Los Angeles Limited, arriving Salt Lake City, Tuesday afternoon, October 5th. Friends of the winning team at San Francisco and of the Utah Fuel company at Price are in touch with members of the team and company officials at Salt Lake City.

It is planned to give the team a reception at Price as they are returning to their homes at Sunnyside.

It is likely the team will stop a day or so at the Utah State Fair upon arrival at Salt Lake City.

There will be ample announcement of the reception to the boys before the arrival at Price, and the nature of the program.

## Victorious In First Aid and Mine Rescue Contest Last Friday At San Francisco.

## EIGHT PRIZES TAKEN

## Defeated Hiawatha Boys Guests of General Superintendent of the Utah Fuel.

SAN FRANCISCO, Sept. 24.—Utah has the champion mine rescue team of the United States. The Sunnyside team of the Utah Fuel company finished first today in the third national joint field meet, with a score of ninety-six out of a possible one hundred points. The Roslyn Fuel company of Seattle, Wash., was second and the Goldfield Consolidated Mines team of Goldfield, Nev., was third. The Utah boys also won first prize in the three-man team first aid contest, and sixth prize in the five-team first aid contest.

Utah's victory in the mine rescue contest was conceded immediately after the contest closed this afternoon, hours before the official announcement at Festival Hall tonight. The day's success is regarded as a great personal triumph for H. H. Sanderson of Salt Lake City, trainer of the team, as well as the participants. Forty-one teams, containing the crack organizations of the country, coming from as far away as West Virginia and Alaska, competed in the events, which were the big feature of mining week.

In addition to the coveted colliery engineer silver challenge cup, which will have to be defended annually, the members of the Sunnyside team each won a gold medal offered by the American Safety association, a gold medal offered by the California Metal Producers' association, a silver medal offered by the California Metal Producers' association for the state championship, and a watch fob and cash prizes offered by the Draeger Oxygen Apparatus company, all for the mine rescue victories.

In the first aid competition Capt. M. H. Detweiler, J. T. Johnson and J. W. Littlejohn, members of the three-man team, each won cash prizes, and the team won a stretcher and equipment and a silver medal each. The members of the Hiawatha team of the United States Fuel company were awarded bronze medals for their excellent showing in the state competitions yesterday.

Van H. Manning, director of the United States bureau of mines, awarded the prizes and was assisted by Charles E. Van Barneveld, chief of the department of mines at the exposition, and Herbert M. Wilson of Pittsburg, and L. R. Palmer, formerly of Salt Lake City. The Utah men have been busy preparing for and competing in the events which ended so satisfactorily today ever since they arrived here.

The Sunnyside and Hiawatha teams will be guests of General Superintendent Thompson of the Utah Fuel company at a banquet to be given tomorrow evening at Old Faithful Inn, and various other forms of entertainment will be provided for them.

## The Prizes Awarded in Detail.

- First—The Colliery Engineer silver challenge cup, for scoring the highest number of points in mine rescue. Contest, September 24, 1915.
  - Second—Five beautiful gold medals, given by the California Metal Producers' association for same as above. Contest, September 24, 1915.
  - Third—Five beautiful gold medals, given by the American Mine Safety association for same as above. Contest, September 24, 1915.
  - Fourth—Twenty-five dollars in gold and a watch fob to each member of team from Draeger Oxygen Apparatus company for team wearing their apparatus securing the greatest number of points. Contest, September 24, 1915.
  - Fifth—Fifteen dollars in gold to best score made in three-man event, first aid contest, September 24, 1915. Panama-Pacific International exposition.
  - Sixth—One Williams improved stretcher with rubber sheet, for first aid stretcher drill, given by above company of Wheeling, W. Va. Contest, September 24, 1915.
  - Seventh—Six beautiful silver medals for winning first aid state elimination contest, California Metal Producers' association. Contest, September 23, 1915.
  - Eighth—Five beautiful silver medals for winning mine rescue state elimination contest, California Metal Producers' association. Contest, September 23, 1915.
- The Scores—State Elimination Contests, September 23, 1915, Utah Fuel company, mine rescue, 92.6; Utah Fuel company, first aid, 92.3.
- National Contest, September 24, 1915—Utah Fuel company, mine rescue, 96.0; Utah Fuel company, first aid, 94.8.
- An Honor to Utah and to Carbon County.
- All honor is due the Sunnyside boys for their painstaking care and constant training efforts, which have resulted in such a splendid achievement. Their triumph is indeed an honor to the state of Utah, to Carbon county, and particularly to the team itself, which has by winning national honors in the San Francisco contest demonstrated its superiority over all competitors in the saving of human life about the mines. During the past three years the
