Lincoln Hardware And Implement Company "Right in the center of the Town"

The P. & O. Canton New Victor Cultivator

Studebaker
Wagons

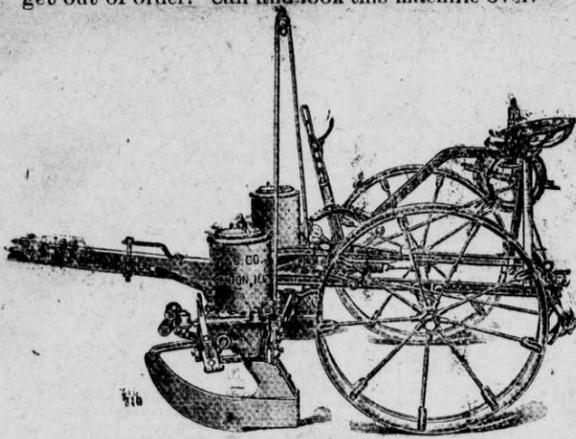

Studebaker
Hacks and Buggies

Can be set for wide or narrow track by means of a Telescope Axle. Low hitch, with ample clearance. Seat is adjustable, or it may be thrown forward when used as a walker. Can be perfectly balanced by the lever without straining the axles. Wheels have dust-proof removable fard oil boxes and screw caps. The handles are adjustable to any position.

The adjustment of the gangs is the most delicate ever devised. When in the ground the shovels can be regulated by fractions of an inch and when the gangs are raised they are carried up rapidly by an accelerative movement which is a feature not found on any other cultivator. The gangs are raised by means of malleable arms and not by chains and pulleys so common on other cultivators and which cause trouble.

There is no oscillation in the lateral movement of the gangs—they swing on a perfectly horizontal plane. The driver can regulate the distance between them by the hand latch of the spreader arch without leaving his seat. The Victor has all the labor-saving devices required in a cultivator.

A medium priced planter. No complicated parts to get out of order. Call and look this machine over.

Parlin Corn and Bean Planter

SCHOOLS CLOSE

Kendrick Schools Begin Vacation Next Week

The Kendrick Schools will next week hold their closing exercises for the term. And thereafter the youths will be on their own resources until September.

Sunday at 11 a. m. in the Presbyterian church, Rev. Durrie will deliver the Baccalaureate Sermon to the graduates; Thursday evening this class will hold their Commencement Day exercises in the Temple, where the public will be regaled with orations, essays, salutatory and valedictory, all original compositions—This is free and for the honor of the school should have a large attendance; the following night Friday, the school gives an entertainment, at which a small admission is charged of 25c to help pay for the expenses of commencement.

JULIAETTA SCHOOLS

Last Friday and Saturday nights the Juliaetta schools held their Commencement exercises before a large audience who were well pleased at successful rendition of both the exercises and the play. The play, "Uncle Tom's Cabin", a cast of 17 characters developed good acting by the young people. The school under the management of Prof Davis and his assistant teachers, has closed a most successful term, graduating a large class as follows: 9th grade—Jeff Davis, Eben Adams, Scott Pickens, Rush Jordan, Oscar Buckalew; 8th grade—Carl Porter, Janie Dysart, Conwell Robinson, Pauline Robinson, Harold Niles, Dora Kite, Hermon Otto, Fannie and Mary Schupfer, Ruth Lelaud, Lottie Hutchinson, Chas. Talbot, Kenneth Hunting.

TANEY TELEPHONE CO

The Gazette secured the contract for printing the Taney Telephone Co's by-laws, stock certificates and directory Drop in and see the samples. The officers of the company recently elected for the ensuing year are: H. J. Ingle, pres.; C. F. Miller, manager; J. W. Huffman, assist. manager; A. J. Aas, treasurer; H. L. Ingle, Secretary. This company has connected with the Inter-state central, and as there was some argument over which central would be used, those who favored the Potlatch Phone line with drew from the Taney company and are organizing another company which will enter the Porter central.

A ROYAL RECEPTION

Jos. Schultz of the Potlatch celebrated his birthday last Sunday and in token of his satisfaction and pleasure in reaching another milestone in his life journey he invited his friends and neighbors to his home, where they gathered and spent a most pleasant afternoon.

The hostess, Mrs Schultz was assisted by Mrs Herman Schultz and Miss Schultz and a cordial reception was tendered the guests as they arrived. After they had gathered the guests sat down to a table which literally groaned with good things delicately cooked, and to which full justice was rendered after which the crowd gathered on the lawn, talked, chatted, listened to the varied strains of the phonograph, and also to the fine instrumental pieces by the hostess. In breaking up the guests heartily wished Mr Schultz many more returns of his natal day, and as pleasant celebrations as the one Sunday.

LAND FRAUD CASES

Nothing new has materialized at Moscow the past week.

The government has examined some 18 witnesses and is endeavoring to show a conspiracy to defraud by Kester, Kettigbach and Dwyer.

The defense has made a number of brilliant sorties, and broke through the prosecution's net in more than one instance.

It is said that the government will be a week longer ere it rests.

John Bradbury is still ruminating in Moscow, a witness before the federal court.

THE CLEM MILL

We visited the Clem Mill at Teak and found it nestled among the timber equipped with good machinery well arranged for the quick handling of timber, a fine pond handy and over a million feet of lumber in the yards, while fully a half million is yet in the log. Mr. Clem recently made a trip to Spokane in an effort to secure a planer but was unable to purchase anything better than the one which is now installed at the mill and will therefore dress the lumber with the machine which he has.

Rebekah President Here

Mrs. Samuel J. Handy, President of the Rebekah State Assembly, paid the local lodge an official visit last Thursday evening.

As this was a special meeting no work was put on, but the ladies came out in force and a very pleasant time was enjoyed, refreshments were served in the banquet hall and the President expressed herself well pleased with the condition of the lodge here.

There was a Sign upon a door it said

Paint

and every one—Sinner or Saint as he went by, put out his hand and touched that door, then looking at his fingers said it is, and mighty fine paint too, I bet its J & D paint which is sold by
