U. OF I. GETS BIG CHRISTMAS PRESENT

Building to Cost \$58,000 is Given By Lumber Men Of Idaho

The largest Christmas present for the University comes in the form of a gift of \$58,000 by the lumber interests of the state of Idaho to the Forestry department of the university, for the purpose of a Forestry building.

It is safely said that the building will be of brick or stone, and either slow burning, or absolutely fire proof.

The tentative plans, upon which Professor Shattuck has been working for some time call for a three story building, with a one story annex for a saw-mill, and wood treatment laboratory. There will also be a basement, to contain the forestry-pathology department.

The main portion of the building in the tentative plan is to cover 60x100 feet. On the first floor will be the library, a suit of offices, draughting rooms, a museum, an auditorium and the wood distillation laboratory.

The second floor will have lecture rooms, the wood-structure laboratory and the herbarium and dendrological laboratory. On the third floor will probably be offices and research laboratory.

This will be a great benefit to all concerned.

MERRY CHRISTMAS

GOVERNOR'S SPECIAL HOMEWARD BOUND

90,000 People Pass Through Train Viewing Exhibits From the Northwest.

(Special to the Gazette)

The magnificent send off which St. Paul gave us made me believe the Western Governor's Special would make a successful trip. This feeling has been intensified at every stop we have made. The farther we go east, the greater the interest of the people seems to be in our movements. This interest is not confined to any class or profession. Both State and Municipal Officers vie with each other in extending the hand of fellowship and are ably assisted by railway magnates, manufacturers and leading professional men and the rank and file of the people do more than their part in adding to our welcome. Indications point to fully as enthusiastic reception in the cities we are about to visit as those from which we have departed. The good results of our journey cannot be fully estimated. Not only are we of the train getting acquainted with the people of the east, but we are making them acquainted with the western people, their customs and their ambition. I believe the future will see Governors of the east planning similar trips to the west and Governors of the south, with a like special train visiting the north. The people of all sections are necessarily drawn together by such journeys and the attending receptions. Governor Harmon of Ohio sounded the proper keynote of this kind of an undertaking when he said that during the late Governor's Conference at Spring Lake, that if the Governors of the United States had met together before the war, as they have during the past four years, the Civil War would have been an impossibility, and I am thoroughly convinced that a few trips like this by the Chief Executives of certain great sections of the United States to other sections will do much to bind the people of various states together and cement the bonds of union which should unite all true Americans.

James H. Hawley, Gov.

Christmas Present

Hugo Frank has been a happy man since last Tuesday. On that day he received a Bank Draft on the Exchange Bank of New York for the sum of \$1725.00 as his share of his father's estate. His father died when Hugo was but a small boy and at that time an Administrator was appointed but he ran through with all the money in his hands and Hugo had come to the conclusion that he would never get anything from the estate, but he placed the matter in hands of attorney T. B. West of this place who run the matter down and found one bondsman back in Minnesota on the administrations bond, he secured from this bondsman after several months of hard work the Draft stated above.

Outlook Favorable

Telegrams and letters received by Wallace R. Struble, secretary-manager of the Idaho-Washington Development League, and G. W. Morrison, secretary of the Commercial Club, from members of congress, give assurances of their support to the cause of sufficient appropriations for the upper Snake and Columbia rivers as will permit the full benefits of the open river to be enjoyed by the country tributary to these streams as soon as the Chlilo canal is completed.
