

# Parker Bean Harvester

We have the Parker Bean Harvester that is made with an all Steel Frame adjustable for different widths. The Steel Frame will never weaken or decay and always remains in perfect alignment. The additional lever which makes a Pivot Tongue is a decided advantage, ask the men who have used them, and the blades are just the right length.

## McCormick Binders

McCormick Binders are the best, the steadiest running, consequently the lightest draught. The Auto Tongue Truck represents the last word in binder trucks. All steel you can not turn it over. It won't Drag or Tip when turning because it turns faster than the horses. The boxings are removable. It is absolutely the best truck and you get one with your new McCormick Binder or you can buy one and use it on your old machine. All bolts subject to severe strains have two taps on each bolt. Repairs for the new and old style machines constantly on hand, our repair man always ready, bring in the number or the old piece.

## Our Line of Supplies

A complete line of oils, hard oils and greases that won't run in summer and won't gum in winter, Valve Fittings, Mobilene Packing, Hemp Packing, Weck Packing, Asbestos, Cotton Special Packing and Sheet Rubber-Packing, Oil cans and Pump oilers, bundle, hay, barley and chaff forks, wall tents, Weber and Studebaker wagons that will carry the load you want to haul. If you want a binder call before you leave home and we will have one ready.

## P. & O. Grain Tanks \$45

We invite your inspection of the above mentioned articles, also our P. & O. Grain Tanks at \$45.00. We desire your orders as early as possible.

We assure you courteous treatment and efficient service.

# Kendrick Hardware Co.

"Every Customer Satisfied"

# Power! Pep! Punch!

This newest Overland Four has more power, pep, punch and speed than any other low priced four or six cylinder car in the world.

### Linden Items

Mr. H. J. Starr was a Moscow visitor Saturday.

Mr. Cleve and Miss Celia McPhee attended the dance at Cavendish Friday night.

Miss - Eva Smith is spending a week with Southwick friends fishing on the Clearwater.

Mr. and Mrs. Pippenger and children motored over from Cavendish Sunday.

Miss Winifred Crocker of Park is visiting on the ridge.

Miss Pearl Langdon returned to Lewiston Thursday.

Mr. Taylor and Miss Louise Wright of Juliaetta visited Mr. and Mrs. Clem Israel the first of the week.

Mr. Mix Smith of Juliaetta was on the ridge Monday.

Mrs. James Langdon and daughter, Mattie, of Lewiston are spending a few weeks at their old home on Cedar Creek.

### Big Bear Ridge

Mrs. Kate Kelly of Kendrick was visiting Mrs. H. L. Ingle and other friends here last week.

M. J. Schei, wife and children were down from Moscow to visit at the H. Nelson home Saturday and Sunday.

H. E. Lien and wife were Deary visitors Friday.

John Dalin and family of Burnt ridge were Sunday visitors at the Abner Corkill home.

R. W. Bigham is improving his place by the building of a new cellar.

Mrs. James Rodgers of Kendrick is spending the week with Mrs. Jake Alber.

H. L. Ingle, wife and Mrs. Kelly were Deary visitors Saturday.

Mrs. J. C. Pierce and granddaughter from Moscow are visiting Mrs. Frank Meneely.

Mrs. Libby Van Horn arrived here Tuesday from Boulder, Colo.

rado for an extended visit with her sister-in-law, Mrs. Ida Comstock.

Several from here have gone to pick huckleberries the past week.

George and Millo Slind made a business trip to Lewiston Saturday.

Mrs. K. D. Ingle entertained a number of friends Friday evening in honor of Miss Adeline Hupp.

A meeting was held by the Camp Fire Girls at the Steele school house Monday evening. Plans of the work were discussed and great interest shown by the girls present. Another meeting will soon be held for the election of officers. All desiring to join are then requested to attend. The girls all wish to express their thanks and appreciation for the kind assistance given by Mrs. Patton of Kendrick.

For an evening of pleasure the Camp Fire Girls cordially invite all to attend their ice cream social to be held at the F. P. Meneely lawn Saturday evening, Aug. 12th.

Confirmation services will be conducted at the Norwegian Lutheran church Sunday, Aug. 6th at 10:30 A. M.

Haying is now drawing to an end. An exceptionally good yield was owing to the amount of rain.

Everyone is busy hoeing their beans trying to have this done before the fast approaching harvest.

### Cavendish

Mr. and Mrs. Tarry and Mr. Moretz and family visited J. A. Carvers Sunday.

Mrs. M. O. Raby and children and Mrs. Reid and two little daughters of Kendrick visited friends and relatives at Cavendish and Teakean last week.

Mrs. Hetzel returned from the hospital at Moscow very much improved.

F. M. Blackburn and family visited C. M. Blackburns Sunday.

Avery Miller and family visited Wm. Reeces Sunday.

F. M. Blackburn, P. H. Hund and Zin Daniels motored to Winchester Saturday.

### A Cooker For Canning.

An ordinary clothes boiler in which a false bottom has been fitted may be used as a cooker in canning fruit and vegetables. However, the canning outfits now on the market will be more satisfactory. The false bottom used

In the makeshift cooker may be placed on a couple of pieces of hard wood thick enough to hold the false bottom away from the cooker bottom. The false bottom is made of a strong piece of steel netting. The cooker must have a tight fitting lid.

### Cauliflower Soil.

If cauliflower is to thrive it must be planted on moist, well drained, fertile soil.

### Public Sale

I will sell at Public Auction at my place at Teakean, Idaho, on Thursday, Aug. 10. Sale begins at 10:00 o'clock. The following described property: 1 Bay Mare age 7, wt. 1600; 1 Bay Horse age 12, wt. 1200; 1 Milch Cow 5 years old; 1 Milch Cow 2 years old with calf; 1 Yearling, 4 doz. chickens, 1 3 inch Peter Shuttler wagon, 1 Mitchell Hack, 1 McCormick Mower, 1 Two Section Steel Harrow, 1 16 inch plow, 1 bobbed, 1 broad cast seeder, 1 Garden Cultivator; 1 Disc, 1 set hack runners, 2 sets blacksmith tools, 1 set Harness, Carpenter tools, 1 saddle and bridle, 1 Majestic Range, 1 Heating stove, 1 Kimball Organ, 2 Dressers, 1 Bureau, 1 Drop Leaf Table, 1 Center Table, 3 Stand Tables, 1 Cupboard, 1 Kitchen Cabinet, 1 Sewing Machine, 1 Telephone, 2 Call bells, 6 Dining Room Chairs, 4 Rocking Chairs, 4 Iron Bed Steads, 4 sets of Springs, 1 Lounge, 2 Closets, 5 Guns, 4 Barrels, 30 Quarts of Canned Cherries, 100 Fruit Jars, Dishes, Cooking Utensils and other things too numerous to mention. Free Lunch at Noon.

Terms: Sum of \$10 and under cash. All over that amount approved notes bearing 10 per cent interest, due October 1, 1917.

H. N. Morss, Auctioneer. E. P. Atchison, Clerk. F. M. Blackburn, Owner.

## Alfalfa Not Safe Pasture

According to the opinion of those in charge of the Crop Improvement Association of Winnebago county, Ill., alfalfa is not a safe pasture for cattle and sheep because of the tendency of these animals to bloat. For putting growth and weight on young horses alfalfa excels. But its peculiar value and adaptation is as a pasture for hogs. For this purpose it has no equal. Every farmer who raises hogs should have an alfalfa hog pasture, according to the officials of this association. In fact, hogs cannot be raised with so great profit any other way. Much data could be given to prove the value of alfalfa pasture.

Some object to pasturing alfalfa because "pasturing kills it." And this is true if the alfalfa is pastured too closely. The reason is found when we observe the manner in which the alfalfa plant grows. Namely, it grows at the top of the stem. When the stem is grazed off the plant must start branches or new shoots from the crown, but if the grazing is too close and too long continued the alfalfa makes little growth and finally dies from exhaustion. With grass pastures the growth takes place at the base of the leaf blades, and close cropping, while it may reduce the yield, does not usually kill the grass.

The right way to pasture alfalfa is to have much more growth or area than the animals can graze off and then cut the alfalfa regularly for hay when it reaches the blooming stage. Or, a better way, in grazing hogs, is to have two pastures, or a divided pasture. Cut one early and allow the hogs to graze on the other until the new growth in the first pasture is six or eight inches high, then turn the hogs in and cut the hay on the second field. Turn the hogs into the second field again in two or three weeks, and cut the first field, thus maintaining always a fresh pasture for the hogs and yet not allowing them to graze off the young shoots or graze the older growth too closely.

Hogs on alfalfa pasture should not be allowed to root out the plants and eat the crowns and roots, which they are inclined to do unless prevented by ringing.

The alfalfa pasture should be cultivated each spring to break up and mellow the hard crust which forms from much tramping. Cultivation and regular clipping as described above is all the care which alfalfa pastures require. If not grazed too closely it should last several years, when other fields should be seeded and the old pasture plowed and planted to corn or other crops for two or three years before reseeding.—Iowa Homestead.

## THE CULTIVATED ORCHARD.

Intercropping May Be Practiced With Young Trees.

The cultivated orchard is more productive and consequently more profitable than the average orchard which is neglected or in which grass or hay is grown, asserts F. S. Merrill, assistant in horticulture, Kansas State Agricultural college.

"In the young orchard, however, a judicious system of intercropping may be practiced without causing injury to the trees, and at the same time profitable crops will be produced in the waste space between the rows," says Mr. Merrill. "Sufficient space should be left on each side of the tree to permit thorough cultivation of the tree rows. As a general rule, the roots of the tree extend beyond the outer ends of the limbs. A strip may be left proportionate in width to the spread of the branches.

"One of the most familiar types of intercropping can be found in planting fillers between the permanent trees and often between the rows. The peach or some type of early maturing apple can be used for this purpose, but in most cases the grower will not remove the fillers until they have attained such size as to have interfered with the permanent trees."

### Soy Beans For Fodder.

The experiment station of Connecticut urges farmers in that state and throughout New England to grow soy beans as a fodder crop. They have demonstrated the value of this plant, especially when mixed with corn in the silo. They advise the following varieties: Hollybrook, Medium Green and Ito San. These yield well, the seed is not expensive, and they are well suited to the climate. The soy beans may be grown separately and mixed with the corn at the cutter, or the two seeds may be grown together. In the latter case one part of soy beans by measure will be mixed with three parts of corn and dropped out of the planter in this proportion. It is better to sow the two seeds together rather than to wait until the corn is up and then drop the soy beans. It is better to use lime with them, although they will grow fairly well without it. Inoculation is needed when the soy beans are grown for the first time, but after the crop is grown two years in succession no further inoculation will be needed.

## Pastime Barber Shop

If you want a first class Shave, Haircut or anything in the Barber line give us a trial.

In connection with the barber shop a Clothes-Cleaning and Pressing establishment will be run. Orders taken for Tailored Clothing for Men.

Agency C. O. D. LAUNDRY, Lewiston, Idaho, Laundry sent out Tuesday and is returned on Friday.

Eugene Gibbs, Prop.

## Mr. FARMER

The recollection of quality remains long after the price is forgotten. Try us for harness.
