For Hoghouse Door.
Here is a very handy device for fastening doors where hogs are kept. It is impossible for them to break out by pushing on the bottom of the door. The latches are made of wood and are bolted to the door. They are connected by an iron rod with eyes in each end. This rod is bolted to each latch, so that when you raise the top latch it pulls the lower one up. A small chain is stapled to the upper latch and to the door. This prevents the latches dropping when the door is unlatched.

The Best Laxative
To keep the bowels regular the best laxative is outdoor exercise. Drink a full glass of water half an hour before breakfast and eat an abundance of fruit and vegetables, also establish a regular habit and be sure that your bowels move once each day. When a medicine is needed take Chamberlain's Tablets. They are pleasant to take and mild and gentle in effect. Obtainable everywhere.
