

Neighborhood News

Linden Items

Ben Smith spent a few days in Juliaetta last week.

Mrs. Otis Stone was a guest at the Jenks home Wednesday and Thursday.

Mr. and Mrs. George Garner went to Cavendish Wednesday returning Saturday.

The Gold Hill School celebrated the last day with a picnic on top of Gold Hill. The pupils, Miss Trail, the teacher, a few parents were present. Besides the usual picnic dinner, a very pretty double wedding was solemnized by the local minister. Many pretty floral gifts were received by the bridal pairs. The parties concerned wish their names withheld from publication for the present.

Jim Ball returned home from Troy Friday.

Mrs. Otis Stone spent Saturday with Mrs. Clem Israel.

Mrs. Chas. Mulkie and son, Delbert, spent Sunday with Mrs. D. Akens.

Mrs. H. E. Fairies and children and Mrs. Denny were sight-seeing on the top of Gold Hill Sunday.

Mrs. Vaughn, Mrs. Fry, Mrs. Newhall and Mr. and Mrs. O. Stone were visitors at the Smith home Sunday.

The Misses Laura and Jessie Foster returned home from Moscow Monday.

The dance given by Andrew Wall Saturday night drew a large crowd and all reported a good time.

Leland Items

Six new Fords were driven into Leland Saturday night. Their respective owners are: Messrs. Walter Hoffman, Joe Piper, Black, Lohman, Hewett and Hein.

Prof. and Mrs. Best of Kendrick spent Sunday at the Hoff home.

The small son of Carl Whiting has been quite sick but is now improving.

The ball game Sunday was played by Leland and Fairview vs. Southwick and Cameron. The game was a tie.

Billie Behrens had two of his horses badly cut on the wire.

There is considerable sickness in this vicinity at this writing.

The Frank Fleshman family visited at Joe Piper's Sunday.

Most of the men who were called to Lewiston last week on jury duty returned, but Charley Hoffman had to remain.

N. H. Morss is back in Leland.

Park

An interesting program was rendered Saturday at the close of Miss Nolan's successful term of school at Boulder Creek. The school closed April 20. All reported a good time.

Fred Crocker and Arthur Bohn have sawed their summer wood.

Born to Mr. and Mrs. Joe Perry, a fine baby girl, April 20.

Clayton Crocker was a visitor at the Crocker home this week.

Mr. Flattree called on Fred Crocker Saturday evening.

The people of this community have been working on the new phone line.

Miss Nolan departed Wednesday for home at Moscow.

Minnie Ferguson who has been at Elk City going to school, has returned home.

Fred Crocker was breaking sod for Jim Bale last week.

Mrs. Roberts of Kendrick was visiting at the home of her mother, Mrs. Torgerson, for some time.

Miss Nolan and Minnie Torgerson called on Mrs. Swens last Thursday.

Big Bear Ridge

James Nelson is building a new barn on the old Slack place.

Miss Goldie Munson was the week end guest of Miss Flora Nelson.

A 9 pound daughter arrived at the home of Mr. and Mrs. Thomas Van Molchen the 58th.

Miss Neeta Stevens of Moscow and Leonard Fairfield were united in marriage at the Christian parsonage in Moscow Tuesday evening.

Rev. George Kitchen officiating. They returned home Thursday and were given a rousing charvari that evening by a large host of friends who were all given a nice treat. They will make the Fred Hecht place their home.

Mr. and Mrs. Chas. Bowers came down from Avon to spend Saturday and Sunday at the A. Galloway home.

Claude Browning and family have moved down from Bovill for the summer.

The Willing Helpers met at the home of Miss Mayme Slind Thursday afternoon.

Mrs. H. Nelson returned home Saturday after spending the winter with her daughter in Spokane.

Miss Agnes Warlick completed her term of school at Taney Friday. She left Saturday for her home in Peck.

The basket social held at the Taney school house was a success both socially and financially. The highest basket sold was Miss Zora Ware's which was a piano and sold for \$9.40. The amount realized was \$33.40, to be used for the piano fund.

A Union Sunday School was organized at the U. B. church Sunday. Mr. Ware was chosen as instructor for the Bible Class. Mrs. George Slind for the Young People's class and Mrs. Flora Harrison for the Primary grade. Let us help by our attendance and interest.

Services will be held at the Lutheran church Sunday, May 6th.

Owing to the large number of marriages in this neighborhood within the previous five months, the Gazette is a most welcome guest in order to see who was the last to take a voyage on the sea of matrimony.

The farmers are very busy plowing between rain showers. Every minute counts this late spring.

DAIRY AND CREAMERY

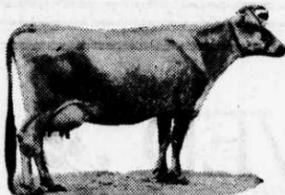

PURE BRED COW BEST.

Under Similar Conditions She is More Profitable Than the Grade.

I contend that the pure bred cow on the average will do anything that the grade cow on the average will do—and something more, writes R. E. Hutchinson in the Rural New Yorker.

The average production of the dairy cows of the United States is approximately 175 pounds of fat per annum. On the contrary, the average production of 11,169 pure bred cows tested to Jan. 1, 1916, is 430 pounds fat. Which pulled down the average—the grade cow or the pure bred? The answer is obvious.

The simple fact that it is possible to quote accurate figures in giving the

Sophie's Adora, the cow here pictured, went on test at one day over four years of age, and in the following 365 days produced 15,822.2 pounds of milk containing 888.0 pounds of butter fat, which amounts to 1,044.7 pounds of butter, figured on the 85 per cent basis. This record makes her world's champion four-year-old Jersey. Sophie's Adora is owned and was bred at Lowell, Mass.

production of pure bred cows is distinctly a recommendation. The above figures are taken from the list of tested cows issued by the Jersey, Guernsey, Ayrshire and Holstein associations.

Certainly conditions of feed and care affect production. It is equally certain that the farmer and not the cow is responsible for these conditions, and it is my contention that under similar conditions the pure bred cow will produce more profitably and reproduce more uniform quality in her calves than will the grade.

Probably all of us from personal observation agree that the pure bred sire is desirable at the head of the herd. Have we analyzed the reasons why? He is simply reproducing the qualities of his pure bred forbears in building up the producing ability of the herd. Would a grade bull do the same? Would he impart the same uniformity to his get? Not in one case out of fifty. No dairyman ever got rich in a day. The dairy business demands patience. No dairyman can afford to neglect the building up of his future herd. It is his responsibility to breed better cows with every generation. The grade cow

is a handicap in breeding. So many conflicting lines back of her prevent prepotency, and she fails to breed "true to type." Her daughters are just as likely to be inferior as to be superior to her. On the other hand, pure bred stock carefully selected and judiciously bred afford a foundation for improving quality with every generation.

Care of Dairy Bulls.

Judicious management is quite as important as careful feeding in keeping bulls in satisfactory breeding condition. Exercise is a prime essential. If young bulls are placed in paddocks they will usually take sufficient exercise, but this is seldom true of an old bull. A better way to insure sufficient exercise is to lead him a mile or two or even farther every day. This exercise will do more to keep him healthy, vigorous, quick and sure than any other method that can be employed unless he is accustomed to using a treadmill. In this event an hour's exercise on the mill daily will keep him in good form. Any bull that has been carefully fed, not permitted to become overfat, but yet in thrifty, vigorous condition, should breed until he is fifteen or sixteen years old if he has always received sufficient exercise with regularity. Kimball's Dairy Farmer.

SUCCESS WITH BARLEY.

Experience of a Farmer Who Sowed It as an Alfalfa Nurse Crop.

I have never raised barley as a crop but once, and then it was used as a nurse crop to alfalfa in 1915, writes a correspondent of Orange Judd Farmer. I sowed ten acres of barley broadcast on May 3, 1915, using ten bushels. I think the name of the variety was Odebrucker. It is a bearded barley, with six rows of kernels. I paid 50 cents a bushel for the seed. I graded it and treated it for smut in a wagon box, using formaldehyde.

The barley being bearded, I could not cut for hay, so I let it mature and cut and shocked it for thrashing. It being very wet at harvest time, it was set up in long shocks and not capped, and it stood the wet weather remarkably well. When it stopped raining we thrashed about Sept. 4. It yielded 334 bushels, machine measure, and went into the bin in fine shape. I have used it for grinding and sold some for seed at 75 cents per bushel. The alfalfa came on nicely, and the binder clipped it some; then we mowed it off about Oct. 1 and let the clippings lie on the ground.

The field was limed April 27, using three tons of pulverized limestone per acre, spread with a limestone sower.

The alfalfa seed was inoculated. The two and one-half bushels of seed used was sown with a hand seeder, using one-half of the seed both ways of the field, followed by a sixteen foot harrow, then rolled and harrowed again. The ground was in oats stubble in 1914 and manured and plowed deep, and the ten bushels of seed barley produced 334 bushels of good heavy barley. Had it not been used as a nurse crop I would have sown more and it might have produced more bushels. A large per cent was shelled and wasted on the ground.

To Keep Up a Good Milk Flow.

To keep the cow persistently in milk always milk rapidly and see that every bit of milk is taken each time. It does not pay to turn the milking over to careless and inexperienced hands.

CHICKEN CHATTER.

A few thorough applications of crude petroleum to the interior of poultry houses will destroy completely the common red mite infesting chickens.

Notwithstanding that many good breeds have been imported, the fact remains that not one of them can be classed with our American production.

After plowing and before seeding turn the poultry in on the freshly turned up earth.

Use good, vigorous breeding stock. Remember that a weak chick in most cases can be traced to poor breeding stock.

As to poultry diseases, folks are to blame for most of the trouble encountered in that direction.

IF

your furniture lasts a life time it must be built good.

That's the kind we sell.

As to cost we can prove to your own satisfaction, our prices are lowest.

Any catalogue can show a nice picture of a piece of furniture, but is the piece as really nice as the picture?

Ours is nicer, we don't overdraw on pictures and talk --- Come in, we can show you.

Kendrick Furniture and Mfg. Co.

FATHER AND SON MEET IN MILITARY CAMP.
SAY FATHER! YOU'LL GET A WARMER WELCOME, IF YOU OPEEN THE BOYS W-B CUT INSTEAD OF ORDINARY CHEWING. SWEET STUFF DON'T GO THESE DAYS.
I'LL GO YOU, BOY. I'VE BEEN WANTING A CHEW THAT'S HOT ALL FLAVORING AND I'VE BEEN HEARING ABOUT THE RICH, SAPPY LEAF THAT W-B IS MADE OF.

Stave or Concrete

Silos

Made of the best selected stock with the latest improved patent doors. Put in your order as soon as possible as it is necessary to get material in large shipments in order to get lowest possible price. If you want a silo it will pay you to talk to F. A. Wallace or his agent, H. P. Hull.

Idaho Silo Manufacturing Company

The Latest Silo Door

on exhibition at my yard.

If you are contemplating the erection of a silo it will pay you to inspect this patent door before buying elsewhere. You can also get material for either a concrete or wood silo or any other kind of building material at prices that will justify you to buy at the

Sturdevant Lumber Yard

SILOS

When putting up a silo get a double wall silo. It is practically frost proof and saves labor tightening hoops or bands when the weather gets hot and your silo is empty.

Come in and talk it over.
