Wandering Gems.

I have observed that butterflies—very broad-winged and magnificent butterflies—frequently come on board of the salt-ship, where I am at work. What have these bright strangers to do on Long wharf, where there are no flowers nor any green thing—nothing but brick storehouses, stone piers, black ships, and the bustle of tollsome men, who neither look up to the blue sky, nor take note of these wandering gems of the air?—Hawthorne.
