Accounts of Farmers, Stockmen and Merchants Solicited.

A General Banking and Collection business transacted. Interest paid on time deposits. Every accommodation extended, consistent with Sound Banking business. A portion of your business respectfully solicited.

G. C. BAKER, President.

### WINEMAKERS HOLD BIG REWARD

Are Willing to pay \$25,000 for Process for Production of Cream of Tartar.

An association of California vineyardists has been formed, to be known as the American Grape Acid Association, for the purpose of solving the problem of the production of cream of tartar from California grapes. Any person who can find out this secret will be paid \$25,000, says Andrea Sbarboro. The association accordingly has deposited guarantees to pay the award.

Mr. Sbarboro says that if any one should be successful in discovering the process for the utilization of California grapes to produce tartaric acid on a commercial basis such a process would be of inestimable value to California and to the United States. The United States is a very large importer of grape acids which are material for cream of tartar despite the fact that California is a very large producer of grapes. The present value of tartaric acid wholesale is 31 cents a pound.

### Necessity Invents New Spelling

In a certain newspaper office the editor was driven nearly frantic by one of his staff, who persisted in submitting typewritten copy with the letters "r" and "k" omitted where they should have appeared. A sharp letter of remonstrance elicited the following reply:

"Mr. Editor—Mistakes are liable to happen in the best of regulated phonies and to typewriters as well. It is, indeed, a very unahortunate affair, but the 'epi' and 'ay' phell out and are lost. This morning I called at the office of the gentleman phrom whom I got this outphit, but phatted to phind him in: in phact, the 'orphice' cid' fays he will not return phor phour or phive days. I do not lique the loox ov this variety ov spelling myself, but will gee the specials aphter a phashon. I myself consider this no joke, but a serious affair. Phaitphully yours,—"

—New York Times.

### A Shooting Affray.

Last Sunday afternoon Willis Brown of Hog Hollow, was shot in the hip with a 30-30 by Frank Tannerburg. The affair seemed to have come from bad blood which his existed between the parties for some time previous. Tannerburg was landed in jail Monday and is awaiting a hearing which will come up within a few days at the justice court at Rexburg.

### A Farewell Party.

The reception held at the home of Mrs. J. S. Smith last Tuesday evening was a very pleasant affair. It was given with the two fold purpose of bidding a farewell and Godspeed to Mr. R. A. Curtis, former rector of the Episcopal church, who left on Thursday to continue his studies at the seminary, and to welcome his successor, Rev. H. N. Palmer.

The spacious home was beautifully decorated in autumn leaves, thus adding to the attractiveness of the house and while Messrs. Ransopher and Henrichs discoursed sweet music, the guests were served with punch by the gracious ladies of St. Katherine's Guild.

The reception was largely attended by the many friends of Mr. Curtis, who, while they regret to lose a man of such sterling worth who has done so much to promote the church work in this vicinity, yet were glad to give a warm welcome to so estimable a young man as his friend and successor, Mr. H. N. Palmer.

### What is Life?

In the last analysis nobody knows, but we do know that it is under strict law. Abuse that law even slightly, pains result. Irregular living means derangement of the organs, resulting in Constipation, Headache or Liver trouble. Dr. King's New Life Pills quickly re-adjusts this. It's gentle, yet thorough. Only 35c. at Watson's Drug Store.

### For Sale.

One new 14 foot bar cherry top Bannwick & Balke make, work board and ice box complete, for sale cheap.

BURLAND'S LIQUOR HOUSE.  
Come and pay me your old account.

### FOR GOOD OF IDAHO

An Organization Formed to Further the Interests of the State.

The Idaho delegates to the Irrigation Congress at Ogden last week took the initiatory steps in a movement that is entirely in the right direction. After the adjournment of the congress the Idaho representatives met and decided upon a permanent organization that would have for its object matters of irrigation and immigration for Idaho. There are many things of importance to this state that there is now no organization to look after, with the result that many things which would be of immense advantage to the state are lost to it.

At Ogden a delegate from each county in the state was appointed for the purpose of effecting the organization. These delegates met and appointed J. A. McGee chairman and Robert Hayes secretary, with the authority to proceed and perfect the organization.

Mr. McGee, after taking a trip to Salt Lake and other Utah points for the purpose of investigating the conditions there in reference to irrigation matters, arrived here yesterday morning, and, in company with Mr. Hayes of this city, has been busily engaged in preparing a constitution and by-laws for the association, which will probably be called the Idaho Irrigation Association. It will be the purpose of the association to hold meetings of the members as often as necessary either at Nampa or Pocatello to discuss matters of interest and benefit to the state. Many of the most prominent men of the state have signified their sympathy with the movement and have expressed a willingness to co-operate with them, which cannot fail to be of inestimable advantage to the state in the future with so much activity in irrigation matters as is already being displayed over the state, and with the surety of even greater enterprises for the immediate future.—Pocatello Advance.

### Out For Bear.

C. H. Cammans, (the Senator) and W. H. Barland more commonly known as Cock-tail Bill, left last Sunday morning with fifteen or twenty bear dogs for Shot Gun Valley. They will be absent from the city all the way from three to fifteen days. Their time of returning will depend largely upon how soon they get chewed up by a big black bear. Everybody expects to see them in the next day after they see their first bear. We understand they have promised everyone in town a roast, but the PEAK editor and we expect "to get ours" immediately upon their return. We are informed by a Montana hunter that the last bear that Cock-tail Bill saw frightened him so that he emptied a 30-30 straight up in the air. Of course the Senator being fresh from the tenderloin districts will not expect to make any great record upon this his first bear hunt. A complete story of the trip with illustrations will be given in our next showing the attitude of Cock-tail Bill charging upon a black bear.

### Mistake Causes Death.

As a result of an error upon whom no blame has yet been placed, the little six-year-old daughter of Henry Rigby, of Rexburg, is no more. Her life has been cut off while in the bud through the carelessness of some one. Death occurred several days ago and the little form was laid to rest, but upon further inquiry it became apparent that something serious had transpired and the body was exhumed and a post mortem held. A part of the abdominal organs have been sent to Salt Lake City for analysis, the result of which will probably locate the blame. Dr. Harshbarger was the attending physician at the post mortem.

### Born.

To the wife of Ira Poulton of Parker, Sept. 25, 1903, a boy.  
To the wife of L. C. Rice of St. Anthony, Sept. 26, 1903, a boy.  
To the wife of Walt Lewis of St. Anthony, Sept. 28, 1903, a boy.

### Big Fire at Idaho Falls.

Idaho Falls, Idaho, Sept. 25.—The most serious and destructive fire that has ever occurred in this vicinity broke out about 6:30 this evening in the drug store belonging to R. F. Payne in a building owned by his father on South Front street. The conflagration spread with great rapidity in each direction as the adjoining buildings were all frame and a strong wind was blowing from the northwest. The water supply was totally insufficient and the fire department—if it is worth the name—was unable to cope with such a blazing mass. The flames leaped quickly from building to building and the sparks were carried by the wind until many of the houses in the southern part of the town were in great danger of being destroyed. But the residents of the Falls fought heroically to prevent the fire from spreading, and hundreds of willing hands were busily engaged in trying to stay the progress of the flames. Of course, they lacked the discipline and leadership as well as water, and for a while the work of destruction went on unabated.

### PEOPLE CRAZED WITH FRIGHT.

The residents of the block around had hurriedly carried their household effects into the streets, or carted them away to places of safety and women and children, almost crazed with fright, were to be seen on every hand. There was the usual crowd of onlookers, who were criticizing the work of the fire fighters, and saying, "I told you so; Idaho Falls would burn down some day." The wind shifted more to the east and died down a little, and when the stone building of Mr. Sowers, occupied by Brand & Kuhn as a saloon, was reached, it prevented the further spread of the fire eastward. Nothing could stop the progress of the flames going westward until the corner opposite the Brooks hotel had been burned, but when the fire fighters gradually got control of the alarming situation, and with the aid of a stone warehouse, owned by Louis Elg, and occupied by Geo. Brunt & Co., confined the fire to the block on which it started.

### LOSS \$15,000.

It is estimated that the losses will amount to about \$15,000, divided between the following: R. F. Payne, Butte Bakery, Dan Winkler's bowling alley, Mr. Brown's stationary and book store, Palmer & Smith's saloon, Boston store, (M. Levy, of Salt Lake, proprietor,) Lee Ching, restaurant, Mrs. Williams, I. X. L. rooming house, Lyon's clothing store and Geo. Brunt & Co., groceries. Louis Elg owned the buildings in which the last two firms did business, and carried \$1,000 insurance. Brunt & Co. carried \$800 insurance on their goods. Winkler had a \$250 policy.

Outside of these, very few, if any were insured at all. The high rate of insurance—10 per cent—caused several to carry their own risks, and some have thus lost their all. However, the town will no doubt be benefitted by having substantial business blocks erected in the place of the ruined shacks. No serious accidents occurred, although there were some narrow escapes from injury. At midnight the flames were not extinguished and the fire laddies were still holding the little streams of water over the ruins.—Dagueret News.

### "I have no more nervous headaches and rest very well at night."

When a woman suffers from female weakness and irregularity or other forms of womanly disease, the effect is certain to be marked in her nervous system, the general effect being, as in Mrs. Woodin's case, "nervous headaches, restlessness at night" and a run-down condition. It is simply common sense then which says if you cure the female weakness, irregularity, etc., you will cure the nervousness, sleeplessness and other consequences of womanly disease.

Dr. Pierce's Favorite Prescription cures the womanly diseases which undermine the general health. It establishes regularity, dries enfeebling drains, heals inflammation and ulceration, and cures female weakness. It cures headache, nervousness, sleeplessness, etc., by curing the womanly diseases which cause these ailments.

Sick women are invited to consult Dr. Pierce, by letter, free. All correspondence strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

"I feel more than grateful to you for the benefit I have received from Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery.'" writes Mrs. Ernie E. Woodin, of Millerton, Dutchess Co., N. Y., care of Box No. 1. "For a number of years I had been troubled with female weakness, nervous headache, irregularity, restlessness at night, and, in fact, was all run-down, but after taking three bottles of 'Favorite Prescription' and one of 'Golden Medical Discovery' feel that I am entirely cured. I have no more nervous headaches, and rest very well at night. In fact, feel like a different person, thanks to your kind advice and wonderful medicine. I earnestly advise all who suffer from any similar troubles to write to Dr. Pierce at once. They will not regret it."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

### THE WONDER GARLAND

The Latest Product of The Stove Maker's Art.

An invention that has long been dreamed of, but which it was hardly hoped would be realized within the present decade at least, is now in practical operation, perfected in every detail and may be seen at H. S. Cleveland's Hardware store, 505-507 Washington avenue south.

It is a smokeless, spotless, odorless stove for soft coal and lignite, which utilizes every particle of the energy of the fuel by consuming both the smoke and gases.

The new invention is patented and manufactured by the Michigan Stove company of Detroit and is called the "Wonder Garland." A wonder it is, indeed. So much so that the claims made for it seem extravagant until one sees and examines it in practical use.

This stove not only solves completely the problems referred to, but it is perfectly simple in construction and operation.

It is as cheerful and comfortable in appearance as a grate, the entire mica front being illuminated by a constant sheet of flame. The taste and elegance of its finish is such as to render it fit to adorn the drawing-room of the most fastidious.

It is self-feeding and will keep fire for forty-eight hours. The fuel is coked while the gas is being consumed, thus rendering it impossible for any clinker to form. There is absolutely no refuse but a fine ash resembling that of a cigar. The stove can be used either as a single or double heater and gives out an intense heat, which, however, can be regulated at will.

This is by far the most economical stove ever invented, not only by virtue of its consuming the smoke and gas, but because the very cheapest and poorest grade of coal can be used with the most complete satisfaction.

The Northwestern agent of the company ordered a quantity of soft coal for demonstrative purposes of so poor a grade that there was practically no demand for it even during the late coal famine. He got absolutely the worst he could find, paying only \$3 a ton for it. This is the fuel that is being burned in the new stove and it serves as well in the Wonder Garland as the most expensive coal would in another stove. Absolutely no clinker is formed and a most powerful heat is produced.

Practical stove men in this city who have seen this stove in operation say that it is all that its name implies, and predict a great market for it in this part of the country, thus enabling the cheap lignite of Dakota in large degree to displace anthracites.

With all these recommendations the "Wonder Garland" can be bought for about half the price of a first-class base burner.

The Michigan Stove company, the largest stove manufacturing concern in the country, has been experimenting with this stove for over two years, and for the last twelve months has been subjecting it to every conceivable practical test. The result is a twentieth century stove that has no equal in general construction, economy of operation or beauty of design.

This Stove may be seen at Skalet & Shell, exclusive Agents for "Garland" Stoves and Ranges, St. Anthony, Idaho.

### PARKER.

□ Born to the wife of Clarence Dayley, on the 17th inst., a girl. All O. K.

□ Born to the wife of Ira Poulton, on the 26th, a boy. All getting along nicely.

A double wedding occurred on the 28th inst. The contracting parties were Miss Claudie Stoddard to Mr. Kelly and Miss Cynthia Stoddard to Mr. John Palmer, Bishop D G Miller officiating. The two young couples are highly respected and have the well wishes of their many friends.

Mr. Mason who was so seriously injured last week by falling over a plough as stated in last week's issue, is gradually improving.

Mr. Chapin of Idaho Falls was here last week doing some surveying for the sugar factory.

The stock holders of the Egin Canal company held a meeting on Saturday to decide whether or not the sugar company could get water from their canal. Every vote was cast in favor of the proposition, and the matter was left with the directors to complete the proposition.

Mr. John Moon is building a large granary on his ranch west of town. The road overseer has commenced work on the road to the river bridge.
