HAILEY, IDAHO.

THE MINE-OWNERS' MEETING.

It is to be hoped that the mine-owners of Wood River and Smoky will not fail to attend the meeting to be held in the office of Judge Beatty, in this city, next Monday, the 14th instant, at 3 o'clock in the afternoon, for the purpose of discussing the onerous burdens which weigh down our mining industry, in order that ways and means may be devised to relieve us of them.

As previously demonstrated in the columns of the TIMES, ore worth \$65 per ton just about pays "cost." That is to say, it pays for mining and marketing, without leaving any profit to the producer. Now, as is well known, \$65 per ton is an unusually high value for ore in any considerable quantity; and no district can hope to have any permanent supply of such rich rock. To be sure, thousands of tons of ore yielding an average of \$125 or over per ton have been extracted in this region; but this is exceptional, and to make such high-grade ore fully ten times the quantity of lower-grade ore had to be thrown over the dumps—a total loss.

Lower grade ore being the rule, here as elsewhere, steps should be taken to secure a market for it. And this is probably the object of the meeting to be held next Monday afternoon.

As this is a subject in which every man, woman and child in this region is interested, there should be a good attendance at the meeting.

Remember, no one is either barred or specially invited. All will be welcome. The committee would like to see every man on Wood River at the meeting; but as that is impossible, it is expected that at least a sufficient number of ore-producers will attend to decide upon an effective course of action.

The New Hampshire House of Representatives passed a bill raising the age of protection for girls to 14. The honorable Senate put their heads together over it, and decided that that was too old. They "amended" the bill so as to read 13, and sent it back to the House, which was obliged to accept the amendment or lose the whole bill. Every such occurrence emphasizes the need of woman suffrage; and some indignant New Hampshire mothers are writing to the papers to say so. Does any one suppose that those Representatives would have put the age as low as 14, or that those Senators would have voted to put it still lower, if they had been responsible, not only to the men, but also to the mothers of the Granite State?

A bright Iowa woman, noting the invention of a ballot-box that cannot be stuffed, remarks: "Now, if some one will invent a voter that cannot be stuffed with beer, brag or bribery, we shall have made a long stride toward better government." It is safe to predict that women, though the weaker vessels, will be less easily induced to fill themselves with beer than some of the present voters.

The Eastern papers are beginning to write their Thanksgiving articles, and this is about the strain in which they begin:

A year of prosperity is dying; but in place of a funeral there will be a feast. May the pleasant memories of the year now drawing to a close be harbingers of joys to come, of work well done, of bounty, peace and rest well merited, and just as well enjoyed by all good people, everywhere!

Senorita Matilde Montoya is the first Mexican girl to become a doctor. A committee of young men of the City of Mexico got up a bull-fight in her honor, and devoted the proceeds to the purchase of books and instruments for her. A country that is civilized enough to have women doctors ought to abandon bull-fights.

THE WASHINGTONIANS DON'T WANT NORTHERN IDAHO.

Colonel Frank J. Parker, editor and proprietor of the Walla Walla Statesman, was in Portland, recently, and in referring to the admission of Washington Territory as a State, he expressed the opinion that a very large majority of the people of the Territory were opposed to the annexation of any part of Idaho to increase either the Territory as it is, or its vote. They simply want admission, with Washington as her boundaries exist.

Women need the ballot (says Colonel T. W. Higginson) not because they are angels, but because they are one-half the human race. If women vote, they will often vote ignorantly or angrily or selfishly, as men do; and they have the same right to commit these errors and to learn by them. For self-protection, for justice, for the consistency of our political principles, they have a right to the ballot. If a pair of scissors breaks apart, we have it riveted again; not because either half possesses angelic superiority over the other, but because it takes two halves to make a whole.

CRITICAL ANALYSIS.
UNIVERSITY OF DESERET,
Salt Lake City, Utah, June 8, 1887.
By carefully examining DeLand's Chemical Baking Powder with the microscope and with chemical reagents, I find that it is free from Alum, Starch, Flour, Bone Ash, Ammonia and White Earth; and that it consists essentially of Cream of Tartar and Bi-Carbonate of Soda. The Baking Powder examined I purchased of Barnes & Davis, in this city.
