CAUSE VS. EFFECT

The principle of Chiropractic (Adjust the cause and the effect is eliminated), is right. Clinical observation of tens of thousands of cases, as far as can be learned every known condition of the human body is subject to, at The Palmer School of Chiropractic (Chiropractic Fountain Head), Davenport, Iowa, shows conclusively that this science is reaching all conditions and correcting the cause of disease, opening the way for nature to cure. Chiropractic is not a theory any more, it is a science of facts, and is doing for suffering humanity that which other professions have been striving meritiously to do for ages.
