JES' THEORIES.

Sum uv which is, 'n sum uv which ain't. Lots uv folks is a rarin' round now days bout this here Ernstein theory. 'N es anybody what has got a name like this here one stein bird ort to have sum theories, also sum salt to go with the same, why anybody what wants to kin do all the rarin' they likes, only while they is doin' all this here rarin' they better do sum buckin' too, es too much uv one thing ain't no good fer the stummick, like eatin' too many Adam's apples, er swallerin' sum hot air, er gittin' up a tree 'n yellin' to see if anybody is home in the attic. 'N es what's bad fer the stummick ain't no good fer anybody's heads, which same is why when any poor fish has got a empty stummick they has got sum empty koo koo also, likewise sum empty pocket book, the last uv which is the cause uv the other two, also sum other ailments what most uv the poor bunch uv prunes is hollerin' bout, why everybody ort to sleep on a full stummick so es the works won't git to rattlin' in their koo

Howsumever, this here one stine bird ain't the only gassaboo what has got sum theory, es I was talkin' with one bunch uv cheese, what said it was best to plant your potatoes in the shady part uv the moon, which maybe so is all right fer them es wants to climb that high to do their plantin', but es I has a hard nuff time gettin' mine planted in the ground, why I can't say fer certain if this poor fish is lyin' er not, only maybe they has put more fertilizer on that side uv said moon which is why they wants to plant their spuds on that side. Also anybody kin tell why Mr. Moon is pullin' such a face es they is usin' the back uv his head fer sum garden, 'n while they is bout it they kin try this other theory which same is to pick out the eyes uv sed spuds so they can't see if they is bein' planted in rich ground er not, 'n then it won't make no differents where they is planted es they won't know athing bout the same.

The above theory ain't no worse 'n sum other poor prunes theory which same is if anybody what has got a bawl head will rub the same with bear's grease it will make sum hair grow, the idea bein' that bear's grease is good fer bare spots also fer sum what ain't spotted. Now es lots uv horse-faced gents has got fly slides

on their koo koo, 'n is wantin' to git the same covered before fly time, I is goin' to give 'em sum theory uv mine, which, altho I ain't tried it out myself, not havin' that kind uv a bean, never-the-less what don't make no differents es they kin try it on theirselves, 'n if it don't work the first time, try, try again, which same theory is to rub sed bawl head with the ruff side uv a rasp 'n then sprinkle well with turpentine on the second day after you has run the rubbin'. This will give anybody the prickly heat feelin' on top uv their cage, which anybody with any cents ort to know is the hair tryin' to git thru the marble top. Sum what I has told this to says it seems like maybe it was too gentle treatment fer such tuff cases, 'n anybody what thinks like that kin try buttin' sed bawled spot agin sum rock till they sees stars 'n then ask them what they thinks bout it.

Uv course, there is lots uv other theories what ain't no good like what I ain't tolled bout, which same is differents from the above, 'n anybody what has got any uv the same, ort to keep them filed away fer future reference, es nobody kin tell when they will be the cryin' need uv the hour, like sum kid what has got the colic, er sum jane what has lost her bow ketcher, er sum poor fish what is tryin' to ketch a train

what is already gone, 'n when they runs onto sum cases like what I has jest tolled why they kin see what these sed theories will say when they spills the beans. In the meantime jest sprinkle with sum salt so es they won't spoil.
