MINERAL BLOSSOMS.

The important law in mining science  
"that relatively there is most ore or  
metal in a mineral vein where there is  
the least possible amount of water to in-  
terfere with mining it economically," was  
published in the Mining Review some  
months ago. This law is in opposition  
to the senses, as they say where there is  
the most ore there is necessarily the  
most water, which at the first thought  
as if a fact—yet the reader must realize  
that this is a relative law, and to be able  
to fully comprehend and apply it to all  
kinds of mines, it is necessary to un-  
derstand the structure of the country where  
the mineral veins are found, the enclosing  
clay and rocks, altitudes, dips, springs,  
topography, direction and other phenom-  
enon of vein.

This law is good from a mountain of  
iron ore to the smallest lead vein, from  
the smallest to the largest coal basin, and  
leads to the theory that each atom of  
metal whether iron, lead, copper, silver  
or gold, has a discriminative attraction,  
elective affinity or bias, and was endowed  
with this property from the beginning,  
and that these metals are used success-  
fully to build the structure of worlds,  
which, like the oak tree, have their morn-  
ing, noon and night; that planets are the  
result of crystalline laws, and each atom  
in the structure of the world holds rela-  
tively its proper position and would hold  
so other.

The senses say that volcanoes show  
that the earth in the center is in a state  
of fusion, yet we shall see how soon this  
can be proved a fallacy. We suppose  
the earth to be a globe, which is a round,  
corrugated earthy ball, hollow in the  
center, formed gradually according to  
crystalline laws, and developed from a  
single cell; that the earth is the same,  
and its crust or shell is 1,000 miles thick,  
which would leave 6,000 miles of its cen-  
ter hollow, that volcanoes are due to  
electric forces which keep the electricity  
that is in space and in the strata of the  
earth in equilibrium, that this electric  
force circulates in the outer part of this  
shell, say for 200 miles, or one-fifth its  
thickness, the eruptions thrown out by  
volcanoes, when compared to the thick-  
ness of this crust, would not be more in  
bulk than a grain of mustard seed on the  
surface of a large orange, a mere speck  
compared to the thickness of the earth's  
crust. Hot springs are explained by the  
circulation of electric forces in the strata  
—so are geysers. The senses said that  
the sun goes around the earth, that volcanoes  
are safety-valves to let out the gasses  
collecting in the interior of the earth,  
that the ore in iron mountains has come  
up through cracks in the earth's crust,  
that lead, copper, silver and gold has  
done the same, that the valleys followed  
by rivers have been worn out by acci-  
dental water courses, yet my three laws  
of mineral fields in stratified rocks show  
that water courses are marked out by  
elevating and abrading forces working in  
concert, and are the result of mechanical  
laws.

The observer of the twenty mounds of  
the Wisconsin lead fields, that rise 300  
feet above the surface of the country,  
supposed the rocks to have been pushed  
up by volcanic agency—yet they are  
found to be the result of the elevating  
and abrading forces working in concert,  
and to mark points where the two forces  
become quiescent, and to hold the  
economical position of water sheds for  
families of lead veins. Practically they  
hold the same position as the ridge of the  
roof to the different floors of a house, and  
stories to the floors of lead veins, each  
shed off the rain-water. The same can  
be said of the twenty mounds or knobs  
in the Missouri lead fields, which are  
porphyry in southwest Missouri, and  
limestone in southwest Missouri, yet  
each hold the economical position of  
drainage of families of veins. The strata  
forming the floors dividing the veins are  
impervious, so that the veins, whether  
coal, iron or lead, are protected from the  
water in one floor or compartment flowing  
into the other floors. In coal basins these

conditions are established by floors of im-  
pervious shales between the veins, and  
by faults crossing the basins, and making  
the strata unconformable. The faults in  
places are filled with water-tight pipe  
clay which forms water-dams at the ends  
and sides of the compartments that hold  
the coal. In iron fields, the faults have  
sub-divided the limestone and granites in  
rocks, compartments to hold the ores.  
In lead fields, the water-tight floors are  
impervious blankets of flint that extend  
horizontally with the dip and basins. In  
the great St. Jo lead mine of Missouri  
five acres of limestone thirty feet high  
has been excavated, and under 80 feet of  
cap rock, and barely enough water found  
to wash the ore. At Mine La Motte,  
where some twenty lead veins have been  
worked as blanket veins, very little water  
has been found. It is the same through  
Central Mexico, Leadville and other  
camps—and the law holds good that  
relatively there is the most ore with the  
least water, yet the miner will say was  
not the Comstock a wet mine? Yes, but  
it was a large vein, and the water was  
partly let in by cutting through the im-  
pervious selvages along the side of the  
vein, by this want of mining knowledge,  
letting the water in from the adjacent  
country rock. Every observer of the  
veins on Lake Superior, either iron or  
copper, can identify this law. Every  
miner in Mexico has realized it, every  
lead mine in Missouri tells it, and yet  
with this knowledge before the people,  
the mine vendor will go into the mining  
market and sell the extreme wet mines  
more readily than dry mines, the idea  
being that where there is the most ore  
there must necessarily be the most water,  
when the amount of water circulating in  
the country, in its depth from the sur-  
face, and from the top to the bottom of  
the vein is proportioned to the ore in the  
vein. The law being that relatively  
there is the most ore where there is the  
least possible amount of water to inter-  
fere with mining it economically.—[Prof.  
J. Van Cleve Phillips, in Chicago Min-  
ing Review.

POISONED BY INDIANS.—We have seen  
a private letter to Bro. Seth Johnson, of  
Hillsdale, Garfield county, who is now in  
Salt Lake City, from a relative. It was  
written at Kanab and dated the 4th inst.,  
and tells of a tragedy that occurred near  
the latter place a few days previous. An  
old man named Phelps, who has a place  
in Kanab, and another up one of the can-  
yons has been putting crops in at the  
canyon farm, when some Indians called  
and put a quantity of strychnine in his  
food. Mr. Phelps ate the poisoned victuals  
and soon died. A boy named Judd  
bitter, only swallowed a very small por-  
tion and has recovered. Two young  
Indians are under arrest at Kanab on a  
charge of having committed the murder.  
This is the first instance we have ever  
heard of in which an Indian resorted to  
poison for killing purposes.—[Deseret  
News.

A WONDERFUL INVENTION.—The Cin-  
cinnati News received intelligence from  
Lexington to the effect that Councilman  
Mose Kaufman has invented an electric  
front-door lock, without keyhole or key,  
which is a wonder. You can set it when  
you go to the lodge so that if a sober  
man touches it it will ring the fire-bell  
and knock him down, but when you  
come home at 2 A. M., well cornered,  
it opens noiselessly to the touch, lights  
the hall lamp, pulls off your boots, winds  
your watch, helps you up-stairs, and  
paralyzes your wife's tongue till you get  
to sleep. Mose is a member of the lodge,  
and knew it would supply a long felt  
want.

"Oh, yes," said Madame, after the  
usual domestic racket had got itself well  
under way; "oh, yes, you gentlemen  
want your wives to be angels!" "Not at  
all," replied Mr. Dusenberry, wiping the  
dishwater from his head and face, "not  
at all; we don't want them to be angels  
at all; we want them to be ladies." And  
then the row began all over again, and  
the cat crawled softly into the cellar to  
drop anchor until the storm should be  
over.—[Jersey City Journal.

As an inducement to young men, it  
may be said that a good wife is never a  
mine.

# THE PIOCHE WEEKLY RECORD.

VOL. XXVI.

PIOCHE, NEV., SATURDAY, APRIL 21, 1883.

NO. 6

MISCELLANEOUS.

## TUTT'S PILLS

**SYMPTOMS OF A  
TORMID LIVER**  
Loss of Appetite, Bowels costive,  
Pain in the Head, with a dull sen-  
sation in the back part, Pain under  
the Shoulder blade, fullness after  
eating, with a distension to ex-  
ertion of body or mind, Irritability  
of temper, Low spirits, with a feel-  
ing of having neglected some duty,  
Weakness, Dizziness, Fluttering at  
the heart, Dots before the eyes, Yel-  
low Skin, Headache generally over  
the right eye, Restlessness, with fit-  
ful dreams, highly colored Urine,  
and

**CONSTIPATION.**  
TUTT'S PILLS are especially  
adapted to such cases, one dose ef-  
fects such a change of feeling as to  
astonish the sufferer.  
They increase the Appetite, and cause  
the body to take on flesh, thus the sys-  
tem is nourished, and by their Tonic  
Action on the Digestive Organs, Regu-  
lar Stools are produced. Price 25 cents.  
25 Murray St., N. Y.

**TUTT'S HAIR DYE.**  
GRAY HAIR OR WHISKERS change to a Glossy  
Black by a single application of this DYE. It  
imparts a natural color. Acts Instantaneously.  
Sold by Druggists, or sent by express on  
receipt of \$1.00.  
TUTT'S PILLS, 25 MURRAY ST., N. Y.  
(Send Receipt to be mailed FREE on application.)

**JONSES' RANCH,**

Located on Little Cherry Creek, Nye county,  
Nevada. This ranch contains Forty acres  
of rich loamy soil, under fence, for farming  
purposes. There are on the premises a large and  
comfortable dwelling-house, corn, wheat, etc.  
The ranges are good, where bunch grass  
grows in abundance, and the water supply for  
all requirements is excellent. For full particu-  
lars enquire of  
D. A. FULER,  
Pioche, Nevada.

**Notice to Lienholders.**

NOTICE IS HEREBY GIVEN THAT THE  
undersigned has commenced an action in  
the District Court of the Sixth Judicial District  
of the State of Nevada, in and for the County of  
Lincoln, in which certain mechanics and  
plumbers and the Mayflower Silver Mining  
Company, the Mayflower mine or mining claim  
and H. T. Wells defendants, and which action  
is brought to enforce a lien in favor of plaintiff  
and against said defendants upon the following  
described premises and property, situated in  
B-1601 Mining District, Lincoln county, Ne-  
vada, to wit: That certain mine and mining  
claim known as and called by the name of the  
Mayflower Mine and Mining Claim, situate, sit-  
ing and being in the Bristol Mining District,  
Lincoln County, State of Nevada. Said lien is  
for the sum of seven hundred and six 4-100  
(\$706.04) dollars, in gold coin of the United  
States, and is claimed under and by virtue of an  
Act of the Legislature of the State of Nevada,  
entitled "An Act to secure liens to mechanics  
and others, and to repeal all other Acts in re-  
lation thereto," approved March 22, 1875. Now,  
therefore, all persons having, holding or claim-  
ing liens upon said premises under the provi-  
sions of said Act are hereby notified to be and  
appear before the said Court on the 17th day of  
February, A. D. 1883, at 10 o'clock a. m.  
of that day, and then and there exhibit their  
said liens and the proof therefor.  
Jas. 1f ARCHIE McQUAIG.

**NOTICE.**

ALL PERSONS WHO ARE INDEBTED TO  
the People's Market are hereby requested  
to settle their accounts at once, or their bills  
will be placed in the hands of an attorney for  
collection.  
From this time on all persons dealing with  
the People's Market will have to settle their  
bills on the first of every month.  
Jas. 1f A. ADELMAN, Proprietor.

### NOTICE TO SHIPPERS.

**W. D. Stewart & Co.,**

Terminus Eureka & Painesville Railroad,  
Pioche, Nevada.

HAVING PUT ON A LINE OF FREIGHT  
Trains to run between Eureka and Pioche,  
now prepared to Forward goods with dispatch  
to

**PIOCHE, BRISTOL,  
WARD, HAMILTON,  
AND ALL OTHER PLACES.**

All goods from San Francisco and the West  
should be shipped

**Via E. & P. R. R.,**  
And they will be delivered promptly and in  
shorter time than by any other route.  
D. W. STEWART & CO.

**Application for a Patent**  
No. 751.

UNITED STATES LAND OFFICE,  
Eureka, Nevada, February 8, A. D. 1883.

NOTICE IS HEREBY GIVEN THAT D. J.  
Falls and J. D. Lehner, whose post-office  
address is Cincinnati, Ohio, have this day filed  
their application for a patent for fifteen hundred  
linear feet of the "Indian Chief" mine or  
vein bearing gold and silver, with surface  
ground six hundred feet in width, situated  
in Pahrangat Lake Mining District, County  
of Lincoln and State of Nevada, and desig-  
nated by the field notes and official plat on file in  
this office as Lot Number 29, in Township 30, South  
Range, 25 East of Mount Diablo Meridian. The  
exterior boundaries of said Lot No. 29 being as  
follows, to wit:

Beginning at a post marked No. 1, U. S. Survey  
No. 29, where the N. 1/2 post between sections  
22 and 29, T. 30 S., R. 25 E., 2nd M. D. M., bears N 84 deg  
15 min E 700 feet, and the mouth of Springer's  
Tunnel bears N 104 deg W 100 feet. Thence  
running, 1st course, S 6 deg 48 min W 1600 feet  
to post marked No. 2, U. S. Survey No. 29, old  
monument bears N 12 feet from said post No. 2.  
Thence, 2d course, N 84 deg 15 min W 600 feet,  
to post marked No. 3, U. S. Survey No. 29; old  
monument bears N 24 deg 24 min W 600 feet  
from post No. 3. Thence, 3d course, S 5 deg 48 min  
E 1800 feet, to post marked No. 4, U. S. Survey No.  
29; old monument bears S 84 deg 30 min W 34  
3d; old monument bears S 84 deg 30 min W 34  
deg 15 min E 600 feet, to post marked No. 1, the  
place of beginning. Magnetic variation 16 deg  
East containing 20 66-100 acres.

The location of this mine is recorded in  
the Recorder's office of Lincoln County, State of  
Nevada, in Book of Mining Notices, page 252.  
This claim is bounded by no known claims.  
Any and all persons claiming adversely any  
portion of said "Indian Chief" mine or surface  
ground are required to file their adverse claim  
with the Register of the United States  
Land Office at Eureka, in the State of Nevada,  
during the sixty days period of publication hereof,  
hereof, or they will be barred by virtue of the  
provisions of the Statute.

F. H. HINCKLEY, Register.

It is hereby ordered that the foregoing notice  
of application for patent be published for the  
period of ten consecutive weeks in the Pioche  
Record, a weekly newspaper, published at  
Pioche, Lincoln county, Nevada,  
7-17-100 F. H. HINCKLEY, Register.

**Application for a Patent**  
No. 752.

UNITED STATES LAND OFFICE,  
Eureka, Nevada, February 8, A. D. 1883.

NOTICE IS HEREBY GIVEN THAT D. J.  
Falls, whose post office address is Cin-  
cinnati, Ohio, has this day filed his application  
for a patent for fifteen hundred linear feet of  
the "Illinois" mine or vein bearing gold and silver  
with surface ground six hundred feet in width,  
situated in Pahrangat Lake Mining District,  
County of Lincoln, and State of Nevada, and  
designated by the field notes and official plat  
on file in this office as Lot No. 40 and 56, in  
Township 30, South Range, 25 East of Mount Dia-  
blo meridian. The exterior boundaries of said  
lot No. 40 and 56 being as follows, to wit:

Beginning at a post marked No. 1, U. S. Survey  
No. 40, where the South 1/2 post of sec 22, T. 30  
S., R. 25 E., bears S 23 deg E 245 feet; thence,  
1st course, S 67 deg W 1100 feet to  
post marked No. 2, U. S. Survey No. 40 and 56;  
thence, 2d course, N 23 deg W 60 feet to  
post marked No. 3, U. S. Survey No. 40 and 56;  
thence, 3d course, N 67 deg E 1100 feet to post  
marked No. 4, U. S. Survey No. 40 and 56; thence,  
4th course, S 23 deg E 60 feet to post No. 1,  
the place of beginning. Containing 20 66-100 acres.  
Courses expressed from the true meridian with  
a magnetic variation of 16 deg East of Pahrangat  
Lake mining district.

The location of this mine is recorded in  
the Recorder's office of Lincoln County, Nevada.  
This claim is bounded by no known claims.  
Any and all persons claiming adversely any  
portion of said "Illinois" mine or surface  
ground are required to file their adverse claim  
with the Register of the United States  
Land Office at Eureka, in the State of Nevada,  
during the sixty days period of publication hereof,  
or they will be barred by virtue of the provisions  
of the Statute.

F. H. HINCKLEY, Register.

It is hereby ordered that the foregoing notice  
of application for patent be published for the  
period of ten consecutive weeks in the Pioche  
Record, a weekly newspaper, published at  
Pioche, Lincoln county Nevada,  
7-17-100 F. H. HINCKLEY, Register.

**Application for a Patent**  
No. 753.

UNITED STATES LAND OFFICE,  
Eureka, Nevada, March 23, 1883.

NOTICE IS HEREBY GIVEN THAT J. S.  
Smith and George Morison, whose post-  
office address is Tempe, Lincoln County, Ne-  
vada, has this day filed his application for a  
patent for fifteen hundred linear feet of the  
"Legal Tender" mine, or vein bearing silver,  
with surface ground six hundred feet in width,  
situated in Tempe Mining District, County  
of Lincoln and State of Nevada, and desig-  
nated by the field notes and official plat on file in  
this office as lot number 28, located on unurveyed  
land. The exterior boundaries of said lot No. 28  
being as follows, to wit:

Beginning at post marked No. 1, U. S. Survey  
No. 28, the same being post No. 1 of U. S. Survey  
No. 28 and 27, lots "A," where U. S. Survey  
monument No. 2, on Coyote Peak, bears N 31 deg  
21 min W 4625 feet. Thence running, 1st course,  
N 87 deg W 600 feet, to post marked No. 2, U.  
Survey No. 28; thence, 2d course, S 6 deg E 160  
feet, to post marked No. 3, U. S. Survey No. 28;  
thence, 3d course, S 51 deg E 600 feet, to post  
marked No. 4, U. S. Survey No. 28, the same being  
post No. 2 of U. S. Survey No. 27, lot "A." Steel  
lode, and thence, 4th course, S 6 deg W 1600  
feet, to post No. 1, the place of beginning. Con-  
taining 20 66-100 acres. Magnetic variation, 26  
degrees 30 min east.

The location of this mine is recorded in  
the Recorder's office of Tempe Mining District,  
in book "B," page 210, of the records of said  
district. This claim is bounded on the east by  
the Sterling. Any and all persons claiming ad-  
versely any portion of said Legal Tender Mine  
or surface ground are required to file their ad-  
verse claims with the Register of the United  
States Land Office at Eureka, in the State of Ne-  
vada, during the sixty days period of publica-  
tion hereof, or they will be barred by virtue of  
the provisions of the Statute.

F. H. HINCKLEY, Register.

It is hereby ordered that the foregoing notice  
of application for patent be published for the  
period of ten consecutive weeks in the Pioche  
Record, a weekly newspaper, published at  
Pioche, Lincoln county Nevada,  
7-17-100 F. H. HINCKLEY, Register.

lode, and thence, 4th course, S 6 deg W 1600  
feet, to post No. 1, the place of beginning. Con-  
taining 20 66-100 acres. Magnetic variation, 26  
degrees 30 min east.

The location of this mine is recorded in  
the Recorder's office of Tempe Mining District,  
in book "B," page 210, of the records of said  
district. This claim is bounded on the east by  
the Sterling. Any and all persons claiming ad-  
versely any portion of said Legal Tender Mine  
or surface ground are required to file their ad-  
verse claims with the Register of the United  
States Land Office at Eureka, in the State of Ne-  
vada, during the sixty days period of publica-  
tion hereof, or they will be barred by virtue of  
the provisions of the Statute.

F. H. HINCKLEY, Register.
