THE ORIGIN OF SCALPING.

(Helena Independent.)

A Montana newspaper man had a long
and interesting talk with Otowatse of
the tribe of Mepheians, and among other
things asked him the purpose of the
Indians in scalping their enemies and
where and how the custom originated.
Otowatse replied that the custom had
now become one of revenge and hatred,
but that scalps at one time were only taken
to show after a battle how many of their
enemy were slain. A war party, by
comparing the number of scalps taken
with the number of their own warriors
missing, could tell which side were victo-
rious in point of execution on the foe.
The origin of the custom, he said, was
only explained by tradition. The tradi-
tion is in substance as follows.

Hundreds of years ago—perhaps thou-
sands—when the Indians were all one
tribe and under one great chief, a dis-
pute arose in the tribe as to who should
become chief, the old chief having died
without having a son succeed him. There
were two principal aspirants for the
chieftaincy and each of them had a strong
following. The dispute ended in divid-
ing the tribe and in war. Previous to
this time scalping was unknown, as there
were no enemies to scalp, the land being
occupied by only one people. Peace was
never made between the two factions.
The chief of one side had a beautiful
daughter and one of the leading warriors
was a suitor for her hand. The chief, as
a condition to consenting to give his
daughter to her warrior lover, required
him to kill the chief of the opposing
tribe (his old time rival for the chief-
tancy), and to bring him proof of the act.

The warrior accepted the condition. It
was many long miles to the enemy and
the snow was deep, but he immediately
set out upon his mission. After lying in
wait near the enemy's camp for days and
undergoing great suffering from the ex-
treme cold without having an opportu-
nity of carrying out his plan, he finally,
one night, boldly entered the camp,
walked into the great chief's lodge, slew
him, and cutting off his head to take
back with him as a proof, started to re-
turn to his own people. The next morn-
ing the murder was discovered, also the
murderer's tracks in the snow and
drops of blood which had fallen from the
dead chieftain's head. Two hundred
warriors started in pursuit of the mur-
derer. They almost overtook him, and
he could hear them on his track. He
was almost tired out and the dead chief's
head was growing heavy, yet he struggled
on with it through the snow and cold,
determined not to relinquish the proof
which would win for him his bride.
The pursuers pressed him so at length
that he threw away every weight but his
trophy. They finally gained on the
weary brave so fast that it seemed he
must either relinquish his prize or be
captured, which, of course, would be
death. Whipping out his rude knife (it
was before the time of steel knives
among the Indians), he hurriedly
stripped off the scalp from the head
and sped on. Thus lightning of his
load he made his own camp in safety.
The scalp was accepted as sufficient
proof that he had fulfilled his mission,
the old chief no longer withheld his con-
sent and the bright-eyed daughter of the
forest became his own. Thus originated
the custom of scalping among the Ameri-
can Indians.

The Hartford Courant says there have
been in the United States since the 27th
of May last, up to September 3rd, 327 re-
corded cases of wives quitting their hus-
bands in company with neighbors and
hired men; 239 husbands have abandoned
their wives to enjoy the society of unmar-
ried persons; 94 white girls, under 20
years of age, have married men of African
descent; 78 old men, averaging 63, have
eloped with widows, and 59 minors have
married widows, grass widows and old
maids.

What kind of lights do they use in the
Synagogue? Israelites.

THE PIOCHE WEEKLY RECORD.

RATTLESNAKE BITES.

Recently, at Billings, Montana, two
horses that were bitten by rattlesnakes
were cured by the use of soda. The cure
was effected by puncturing the skin
around the wound sufficiently to make
the blood flow and applying soda liberally,
renewing the application from time to
time, and altering it with ammonia. Re-
cent analytical examination of the poison
of serpents shows that the rattlesnake,
and most other snakes, to be acid. An
alkali is therefore the proper thing to use
to neutralize it and kill its virulence. As
alkali and alkali soil are abundant in Ne-
vada, let the person who is bitten by a
rattlesnake clap on the wound a plaster
of alkali, or the strongest alkali soil ob-
tainable. This can be bound in place
with a handkerchief, and will occasion but
little loss of time in reaching a place
where help can be obtained.

Any wet or damp soil that can be ob-
tained is good. In the prairies of the
West dogs bitten about the head by rat-
tlesnakes cure themselves. A dog bitten
on the nose or about the jaws digs a hole
in the moist soil, thrusts his head into it
and remains motionless for some hours.
He then comes out all right, except that
he walks a little groggy for sometime.

The prairies of Iowa and Illinois were
full of rattlesnakes when first settled by
the whites. Hogs, dogs, men, women
and children waged a war of extermina-
tion upon them. The youngsters run-
ning about barefoot were frequently bit-
ten. The cure was to put the foot in a
poultice of mud. The following will
illustrate how little the early settlers
feared the rattlesnakes: A woman was at
a quilting at the house of a neighbor, when
her little boy came and told her a young-
ster son had been bitten by a rattlesnake.
"Never mind, never mind," said the
mother; "run back home and put a poultice
of blue mud on his foot." Some of the
ladies at the quilting bee, recently
from the East, thought the old woman
was very heartless, but she knew what
she was about; and besides, there was a
good supper getting ready that she did
not want to miss.

A HERD of seven deer was seen at the
springs at Highland on Tuesday.

Contentment swells a mite into a talent,
and makes even the poor richer than the
Indies.
Nearly half a century ago M. Dumas,
visiting Scotland, was surprised to find
in many of the Glasgow factories many
monuments and tablets to the memory of
Nicholas Leblanc, his countryman, whose
name was almost forgotten in France.
To the present day, indeed, Leblanc's
memory has been honored by his native
land, but now a monument to him is to
be erected at Inverdon, his birthplace.
Leblanc was the author of one of the most
useful discoveries ever made in chemistry
—the extraction of soda from salt, a dis-
covery which has been pronounced second
in effect upon civilization only to the in-
vention of the steam engine. Leblanc
announced his discovery in 1790; now
many millions of tons of carbonate of soda
are annually used in arts and manufac-
tures.

TRANSMUTATION.—An object lesson in
the transmutation of virtues is conveyed
in this paragraph from an exchange:
"Tennyson can take a worthless sheet
of paper, and by writing a poem on it
make it worth \$5,000. That's genius.
Vanderbilt can write a few words on a
sheet, and make it worth \$5,000,000.
That's capital. The United States can
take an ounce and a quarter of gold, and
stamp upon it an 'eagle bird' and 'twenty
dollars.' That's money. The mechanic can
take the material worth \$5 and make it
into a watch worth \$100. That's skill.
The merchant can take an article worth
twenty-five cents and sell it for \$1. That's
business. A lady can purchase a very
comfortable bonnet for \$10 but she pre-
fers to pay \$100. That's foolishness. The
ditch digger works ten hours a day
and shovels out three or four tons of
earth for \$2. That's labor.

A peculiarly fiendish crime has just
been brought to light at Toulouse. The
police of that city have made a descent
upon the house of a grocer named Rouzou,
and have rescued from the cellar a man
and a son in the last stage of starva-
tion. They were the brother-in-law and
nephew of Rouzou, who, it is stated,
kept them in durance while he squandered
their fortune, valued at 100,000 francs.
The poor victims, when rescued, were
found to be terribly emaciated, and en-
tirely bereft of reason.
It is still insisted that a new and origi-
nal version of the Ten Commandments
has been discovered. If it is going to be
any easier to live up to, the bad man on
the Boston Post wants to have it
"trotted out" at once.

HEART DISEASE!

CURED BY
DR. RUSH'S REGULATOR.

FOR HEART TROUBLES.

Wm. O. Osgoodby, the well-known safe man-
ufacturer of Buffalo, Philadelphia, Pittsburg,
Newark, and Atlanta, Ga., says:
OFFICE OF OSGOODBY'S IMPROVED SAFES,
11 S. Broad Street,
ATLANTA, Ga., October 17th, 1881.
DR. RUSH'S MEDICAL ASSOCIATION:
DEAR DOCTORS.—The three bottles of "Dr.
Rush's Regulator" I ordered were received by
express last week. I have taken nearly one bot-
tle and am thoroughly satisfied with the result.
For over two years I have been troubled with
sharp pains in my heart. My physician, upon
examination, pronounced it enlargement of the
heart, and was unable to give me any relief.
The trouble grew worse until I had become con-
vinced that I could not live. While in New
York City, last week, I called upon one of the
most prominent physicians there, who charged
me \$25 for an examination and then recom-
mended "Dr. Rush's Regulator." Knowing you to be
a regular Medical Association, and NOT A PATENT
MEDICINE SCHEM, I ordered the three bottles.
I have not been troubled since I commenced
taking it. I have been able to do all the work
three bottles so as to obtain a permanent cure.
You have my sincere thanks.
I am, gentlemen, Very respectfully,
WM. O. OSGOODBY

Dr. Rush's "Regulator"

has never failed to give relief. It has been
used successfully for years in subduing the most
stubborn cases of heart difficulties. A positive
cure for Enlargement, Palpitation, Fluttering
and Fatty Degeneration of the heart. Price,
\$1.00 per bottle; six for \$5.00. Sold by drug-
gists, or sent direct by Dr. Rush's Medical
Association, Nunda, N. Y., U. S. A.
