

THE STAR OF BETHLEHEM IN 1857.— Frank Gilbert, in his "New World's Historical," quotes the learned Prof. Goumier as follows: "In 1857 the 'Star of Bethlehem' will be once more seen in 'Cleopatra's Chair,' and will be accompanied by a total eclipse of the sun and moon. The star only makes its appearance every 315 years. It will appear and illuminate the heavens, and exceed in brilliancy even Jupiter when in opposition to the sun, and, therefore, nearer to the sun and brightest. The marvelous brilliancy of the 'Star of Bethlehem' in 1857 will surpass any of its previous visitations. It will be seen even by noonday, shining with a quick, flashing light the entire year, after which it will gradually decrease in brightness and finally disappear, not to return to our heavens until 2202, or 315 years after 1887. The star first attracted the attention of modern astronomers in the year 1575. It was then called new star. It was no new star, however, for this was the star that shone so brightly 4 B. C., and was the star that illuminated the heavens at the nativity of Christ."

It was his first attempt on roller skates, and as they brought him in to the toilet room he remarked, "I tell you, boys, that was gorgeous. I must have kicked in the whole dome of heaven, the way those stars flew round. I wonder if there's any left for the next man."

Among President Arthur's Christmas gifts was a big fur overcoat. Some people have an awful mean way of suggesting in the political atmosphere.
