

THE PIOCHE WEEKLY RECORD.

VOL. LVI

PIOCHE, NEVADA, FRIDAY JUNE 29 1906

NO

A GAMBLE.

Greater profits are to be made from mining enterprises than any other, says the Rocky Mountain Magazine. This has been proved by carefully prepared statistics of the United States Government. This has been true of operations in mining and should be more than true of future operations, for mining is now conducted on a more scientific basis and under more favorable conditions than ever before. You will always find those who will tell you that mining is only a gamble, but this is not more true of mining than any other industry.

The farmer plants his grain in the spring time and it is a gamble as to whether he will get any returns. To many people are like the man in the fable who would not sow his grain, believing there was going to be a drought and he would lose his seed. This is the foolish man and not the one who takes the necessary risks.

According to the United States Geological Bureau over \$1,000,000,000 were produced by the mines of the United States in 1902. Did it ever occur to you that the entire population of the Rocky Mountain region which made this production, including Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Washington, Oregon, Nevada and California, does not exceed the population of Greater New York City or Chicago? No eastern community can show such an output in proportion to population. Those who claim that mining is a gamble should look into these facts, which can easily be secured from reliable sources. Where is a single industrial corporation that can show the profits of the Calumet and Hecla, which has distributed among its stockholders over \$88,000,000?

In 1903 the stock of the Gold Coin of Cripple Creek sold as low as one cent per share. This company started with a bond and lease on the Gold Coin claim. Seven years later this stock sold as high as \$6.50 per share. The Consolidated Lyle of Virginia City, Nevada, produced about \$400,000,000, and most of the ore yielded but \$8 per ton in gold.

The Anaconda mine at Butte, Montana, was sold for \$40,000,000 to the Amalgamated Copper Company. The Alaska Development, which is running less than \$3 per ton, has paid over \$5,000,000 in dividends. The Granite Mountain has paid \$15,000,000. The Homestake of South Dakota, on ore running less than \$4 per ton, has paid \$3,333 in dividends every day it has run for the past ten years.

The United Verde of Arizona has paid in the last few years \$11,000,000 in dividends and has opened up the largest copper deposits in the world. It is claimed that this property is worth \$100,000,000. The Copper Queen of Bisbee, Arizona, a newly developed mine, has within the past few months started a production of about \$1,000,000 per month.

Bill Denton, our Sweet William, takes charge of the Sunny Side and State Line stage routes July the first. His outfit, teams, wagons, etc., are up to date and he will give all who patronize his line a ride for their whiskers so far as good time is concerned. We are all glad to see Will branch out on his own hook and wish him abundant success.

The Washoe county grand jury has whitewashed all those concerned in the Sparks school scandal.

Thomas C. Dobbins is under arrest in Tonopah on a charge of forging checks for \$11,000 on his business associate, H. H. Clark.

The V. & T. Railway Company has ordered two steam shovels, which is thought to indicate that extension work will be continued across the line into California.
