EMANATION FROM PRINTER'S INK

Peculiar Property Found to Affect a Photographic Plate.

That printer's ink gives off an emanation that passes through opaque bodies and affects a photographic plate has been discovered by a German investigator. Photographic roll film is sometimes thus affected, through its celluloid cover, by the printed characters on the paper in which it is wrapped. The emanation is found to proceed from the oil in the ink during the drying process. It is not precisely the same as the emanation from radium and other radioactive substances, for, unlike them, it changes gum arabic into a granular, insoluble substance. It was this effect produced on the gum of envelope flaps by the printed characters on the envelopes that first attracted the investigator's attention. The emanations are reflected by metal mirrors in the same way as light, and they oxidize metal surfaces against which they strike. The exposure necessary to effect a sensitive plate is eight to ten days.

Like a Fairy Story.

They were going to the theater. He had reached home at 6:30 o'clock, and an hour later was ready to start. There was just time to reach the playhouse by eight. She had had nothing to do all afternoon except to dress, yet it was 8:15 when she came from her room with her hat and coat on.

"I'm afraid we shall be late," she said.

"You look so lovely," he replied, kissing her, "that it would have been worth waiting another hour for you."

No, they were not bride and bridegroom. They had been married ten years. But what is the use of telling you any more? As you can see by this sample, you wouldn't believe it, anyway.

Queer Fijian Plant.

There is nothing under the sun quite so quaint, so weird and witchlike as the pandanus prairies of Fiji. The pandanus or screw plant, as it is called, is a most grotesque specimen of the vegetable kingdom even at the best and in the early stages of its growth. In its very young days it is of an extraordinary screwlike shape, and looks as though some kind of hand had taken hold of its long, swordlike leaves and twisted them round and round. Later it straightens out a bit, and from it grow a number of tall wooden stilts. Its foliage is simple, a number of drooping, ragged tufts for all the world like mops, and very mournful looking. Among these mops hang the fruit in shape like a pineapple, made up of hard red and yellow kernels, woody and fibrous, and quite uneatable from a European's point of view.
