

# LISTEN YOUNG FELLOW!

You are going to need a home, perhaps sooner than you now expect. Have you made any plans to provide for that day when you will assume the responsibility of marriage? Do you have some definite idea as to how you will provide the home you are sure to need, or, are you just trusting to luck? Are you going to take HER to YOUR HOME, or, will you rent what ever is available and be subject to the wishes of a Land Lord as to what you will pay for the use of his property, when you will have to move, what improvements and repairs you can have and the hundreds of little things renters are always subject to?

## Start Now To Provide A Home

The first thing necessary is the real estate on which to build. You should buy this real estate NOW, while you have a larger field from which to make your selection. Besides, in buying now you will protect yourself against advances in the price of home sites.

## Lots Can Be Bought on Time

You can make your selection now and make purchase with a reasonable payment down and the balance in installments, if you are not in a position to pay cash. Your home site can be bought in a manner that you will never miss the money you pay for it. The money thus paid will be SAVED. You should keep your Liberty Bonds if possible, still, if there is a legitimate reason for disposing of these securities, the providing of a home is certainly that cause. We will take Liberty Bonds of any issue at par in exchange for lots or as partial payments.

## THERE IS NO BETTER PLACE THAN GARLAND

You will find larger cities and yet smaller ones but none that offer more advantages coupled with fewer disadvantages. There are no better people in any City in the World than are found here in your home city. The town is provided with all necessary conveniences and is a good place in which to live. Values are staple here and are steadily advancing.

## Investigate Progress Addition

Have these lots shown to you and get prices and terms. Building in the past few years has been confined largely to East Factory Street but there is little or nothing to be had in that section now. Future building activity will be in Progress Addition. Make your selection NOW as these lots will soon be sold.

## Why Malleable Iron Ranges?

So that they may be riveted tight like a steam boiler.

Did you ever draw two pieces of cast iron together with bolts? Did you get it tight? No; the cast iron broke. Did you ever bend a piece of enameled iron? What happened? The glass covering the enamel, cracked and peeled of.

Ranges—the perfect cooking machine—must be tight as a steam boiler. Nothing that can't stand riveting and drawing tight is worth working up into a high-grade range like the Copper-Clad.

Get a malleable iron range because they are tight and stay tight. While getting, get the one malleable iron range with the solid malleable back flue—the Copper-Clad—the range that can't rust out.

## THE ELECTRIC

At the present time it is impossible to secure and keep competent help in the household. Many small homes could dispense with extra help entirely by using a HAPPY-DAY ELECTRIC WASHER with SWINGING WRINGER, to do the hardest part of the household work.

In CONSTRUCTION it is very simple and all of the mechanism is perfectly fitted and very strong, with ordinary care will last many years.

THE MOTOR is the best manufactured to-day for use on washing machines, and is thoroughly dependable.

A special feature of this machine is the BALL BEARING SWINGING or ADJUSTABLE WRINGER this can be instantly swung into any one of three different positions. For wringing clothes THE STEEL EXTENSIONS will hold two extra tubs and a basket when not in use they are folded up close against the tub and are entirely out of the way.

Sale Price \$84.00.
