LETTER TO DR. L. F. LAYTON.
 Brownsville, Texas.

Dear Sir: There are two sorts of paint: one to sell and make money, the other to paint and save money. Who gets the money? The maker, the seller, the painter.
 Where does it come from? The owner, of course; he pays the painter for doing the work, and the dealer for gallons of paint; and he pays the paint-manufacturer, gallons again; more gallons, more money all round; for the owner to pay to the painter, dealer and paint-manufacturer.
 What's the paint that saves money? Gallons again; less gallons, less money for paint, less money for wages; a gallon of paint is \$5 for wages and paint. Less gallons, less money to pay, \$5 a gallon.
 Two sorts of paint: less gallons and more; less money and more; \$5 a gallon difference: two to one in gallons and money.
 It costs twice as much to paint the average more-gallons paint as to paint Devoo. When the people find-out, it may not be quite so easy to sell extravagant paint by calling it "cheap."
 Yours truly,
 F. W. DEVOE & CO.
 P. S. Frontier Lumber Co. sells our paint.

Why The Wheels Are High
 The high yielding, wood wheel, dished, gathered and set in at the bottom is the result of centuries of experience and improvement. No other type of wheel is so perfectly adapted to the average road. Actual experience has "proved" beyond question that it is the best type of wheel.
 It is well known that if the wheels are set perpendicularly to the line of the axle, as is necessary in the ordinary chain or gear-driven automobiles, that they will "drag" on the road and produce a constant outward strain on the tread, causing hard running and final destruction of the wheel.
 The Bicycle-like automobile, with its unyielding, roller like, perpendicular wheels, puncturable tires, and proportionately heavy machinery, has been found unsuitable for wagon roads—The Holsman is the result of practical application of motor power to a vehicle that is as durable, flexible and easy running as the best horse-drawn vehicle.

Let Us Explain This
 to you fully. Come in and we shall be glad to give you many other reasons why The Holsman is the most practical, comfortable and dependable automobile made. Let us take you for a ride in The Holsman, and judge for yourself. You will like its comfort—easy control and simplicity.
