Six Persons Known to Have Perished—The Boat a Total Wreck—Full Particulars of the Columbia.

The Steamer St. Luke Wrecked on the Missouri.

St. Louis Dispatch, May 1.—At ten o'clock last night, the steamer St. Luke, bound from St. Louis to Council Bluffs, in passing under the St. Charles railroad bridge, struck the bottom of the river, and was lost. The boat was on her way to Council Bluffs, and was not a passenger boat. It is stated that there were neither men nor women aboard her, and that they were all passengers.

The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drowned. The boat was traveling at a rapid rate of speed when it struck the bridge, and the passengers were thrown into the river. The boat was lost in the river, and the passengers were all drown.
