

## YOU COOK YOUR FOOD—WHY NOT YOUR TOBACCO?

YOU know what broiling does to steak, baking to a potato—and toasting to bread.

In each case flavor is brought out by cooking—by "toasting."

So you can imagine how toasting improves the flavor of the Burley tobacco used in the Lucky Strike Cigarette.

## Win the War by Preparing the Land Sowing the Seed and Producing Bigger Crops

Work in Joint Effort the Soil of the United States and Canada

CO-OPERATIVE FARMING IN MAN POWER NECESSARY TO WIN THE BATTLE FOR LIBERTY

The Food Controllers of the United States and Canada are asking for greater food production. Scarcely 100,000,000 bushels of wheat are available to be sent to the allies overseas before the crop harvest. Upon the efforts of the United States and Canada rests the burden of supply.

Every Available Tillable Acre Must Contribute; Every Available Farmer and Farm Hand Must Assist

Western Canada has an enormous acreage to be seeded, but man power is short, and an appeal to the United States allies is for more men for seeding operation.

Canada's Wheat Production Last Year was 228,000,000 Bushels; the Demand From Canada Alone for 1918 is 400,000,000 Bushels

To secure this she must have assistance. She has the land but needs the men. The Government of the United States wants every man who can effectively help, to do farm work this year. It wants the land in the United States developed first of course; but it also wants to help Canada. Whenever we find a son we can spare to Canada's fields after ours are supplied, we want to direct him there.

Apply to our Employment Service, and we will tell you where you can best serve the combined interest.

Western Canada's help will be required not later than April 5th. Wages to competent help, \$50.00 a month and up, board and lodging.

Those who respond to this appeal will get a warm welcome, good wages, good board and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination and return.

For particulars as to routes and places where employment may be had apply to:

U. S. EMPLOYMENT SERVICE, DEPARTMENT OF LABOR

Relics Near Cambrai. Round about where Sir Julian Byng's heroes are fighting are buried some of the earliest records of the working and battling of mankind. In this last look the late Lord Alvedary refers to the scene. Deep in the Somme gravel drifts every round that implies means, inevitably and the rough, rude weapons with which prehistoric man made war. It is more than likely that the guns which are plowing deep and beneath the soil to life will reveal more buried history.

Slippery Retort. The messenger boy was red-headed, cheeky and dainty. "What's your name?" said the elevator man in the chamber of commerce as he started to close the door. "Don't get by," said the boy, as he slipped into the car. "Don't get by or I'll slide on you."—Buffalo Express.

WOMAN'S CROWNING GLORY. In her hair. If yours is streaked with ugly, grizzly, gray hairs, use "La Creole" Hair Dressing and change it in the natural way. Price \$1.00.—Adv.

Many a soul is wrecked because too easy to pull its boot through the ruts of time.

Patience is easy currency and it goes a long way at that.

Slip and safety always go together, but slip comes first.

There's no use in rocking the cradle while you pinch the baby.

## To Prevent Grip

Fortify the System Against Winter Cold

The strong withstand the Winter Cold Better than the Weak. If your blood is not in a healthy condition and does not circulate properly, your system will not be able to withstand the Winter Cold. Old people who are feeble and younger people who are weak, will be strengthened and enabled to go through the cold weather by taking regularly

## Grove's Tasteless chill Tonic

Contains the well-known tonic properties of QUININE and IRON. It purifies and enriches the blood and builds up the whole system, thus fortifying the system against colds and grip. Price 60c.

Whenever You Need a General Tonic Take Grove's

STRAWBERRIES FROM SUMMER TO FROST

Planted in April This Field of an Everbearing Type Gave a Crop the Following Autumn.

## DELICIOUS BERRY THROUGH SUMMER

Long-Season Strawberries Have Passed Trial Period.

OF REAL VALUE FOR MARKET

Heretofore "Everbearing" Varieties Have Been Grown Chiefly by Amateurs and Commercial Growers—Crop First Season.

Strawberries from your garden throughout summer and autumn are now a possibility as the result of the perfection of "everbearing" varieties of this delicate berry. Everbearing strawberries are not a brand new discovery, but heretofore they have been grown chiefly by amateurs and commercial growers who have tested them in comparison with ordinary sorts. In a recent publication of the United States department of agriculture announcement is made that a sufficient number of trials of these varieties now have been completed to indicate their real value for home use and for market in certain sections of the country.

Primarily a Northern Type.

The regions where it is known that everbearing varieties can be grown extend as far south as the northern parts of Virginia, Kentucky, Arkansas and Kansas. South of these limits there are probably points where they may be grown with some degree of success, but they are not definitely known to succeed there.

The two leading varieties of this type of strawberry, the Progressive and the Superb, are notable not only because they produce fruit from the time of the usual crop until late summer or autumn, but also because they are exceptionally resistant to leaf-spot diseases. They are also very hardy. The Progressive has been found to withstand the winters of the middle West better than any other variety except the Dunlap, one of its parents.

The Superb also is hardier than most varieties of strawberries. Another remarkable characteristic of these varieties is that if their blooms are killed by frost they soon flower again. Therefore in many sections subject to late spring frosts, which often destroy the crop, these varieties are particularly valuable.

Small Crop First Season.

If plants of the everbearing type are set early in the spring, a small crop can be obtained the first year.

SET STRAWBERRIES EARLY TO GET FRUIT FIRST YEAR

Early spring—as soon as you can get into the garden—is the time to set "everbearing" strawberries, or, in fact, any strawberries. With such an early start a larger crop of fruit can be obtained the first year. The plants also have opportunity to become established and to develop better root systems before beginning to fruit. The markedly different behavior of the long-season varieties has led to the development of cultural practices differing in special details from those followed in the production of standard sorts.

Directions for the culture of the everbearing types, in so far as the methods differ from ordinary practices with strawberries, are given in Farmers' Bulletin 901 of the U. S. department of agriculture.

Corn Is Champion Food Crop.

Corn, on a given area, will produce more human food than any other crop commonly grown on American farms. This crop leads the list in units of energy produced per acre and is ahead of all other crops except navy beans and soy beans in tissue-building material.

In the latter element, soy beans far outclass all other crops, showing twice as much protein per acre as navy beans, which rank second in this regard.

The dairy cow is the most efficient

can be had the first season. Plants which have been set for a year give a fair yield at the time the usual strawberry crop is borne. For the period immediately after this early summer crop the amount of fruit secured is small. In August, September and October it becomes larger and under favorable conditions the late summer or autumn crop from certain varieties may equal or exceed the early summer crop. Thus instead of a constant supply throughout the season there is a distinct early summer crop.

"Persons owning land here and still living in the States should, if they don't feel themselves able to come up here and finance themselves until they could get their first crop, get some of their land broken and worked down in the fall before they come. The next spring they could come and put in the crop, fence and put up their buildings. This way they have to wait only one summer for their first crop."

"It is not advisable for a person to come here in the spring, break out land and put it in crop the first year, because the moisture in not in the ground and a failure is almost certain unless it is an exceptionally wet year."

"One of the boys from that locality, Mr. Peder M. Jensen came to Alberta last spring. He bought a 30-60 Runley Oil-Pull engine on the 8th day of June, 1917. After that date he broke 1,100 acres of prairie sod for which he received an average of \$5.00 per acre."

"Mr. Hensen from your community, was up here last fall with several prospective land buyers from that neighborhood. At that time he inquired the value of the crop on the section we were farming. We told him that it would probably make in the neighborhood of \$12,000. This same crop when sold brought nearly \$19,000. The most of it being sold when prices were low for the year."—Advertisement.

Another Advantage of Corn Bread. Corn bread is good for the complexion. Use corn bread and become beautiful as well as win the war.

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 1/2 oz. of olive oil. Any dandruff can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken green, faded gray hair, and make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off. Adv.

Illustrated.

"How is your son getting on with the law?" "Winey; he is already prosecuting his studies."

THIS IS THE AGE OF YOUTH. You will look ten years younger if you darken your ugly, grizzly, gray hairs by using "La Creole" Hair Dressing.—Adv.

A wise man doesn't try to scare a cow into standing still while being milked.

To Cure a Cold in One Day Take LAXATIVE BROOM Quinine Tablets. It stops the cold, kills germs and soothes the throat. E. W. GROVE'S is a signature on each box. 50c.

The best fighter doesn't waste valuable time spitting upon his hands.

Terrific Pro. Face More. The two million people in Alaska, Hawaii, Porto Rico, and Guam are trying to do their part for the food supply. Through its experiment stations in these possessions, the United States department of agriculture early in the emergency started campaigns to increase food production. To make the territories less dependent upon the mainland of this country for their supplies is the aim of the federal workers. Important results already have been obtained.

Porto Rico, which formerly imported more than \$20,000,000 worth of beans annually from the mainland, now is in a position to export this product. The Alaska stations have greatly increased the areas sown to grains and now are able to meet increased demands for seed grains locally adapted. The Guam station is distributing larger quantities of seeds and plants for cultivation by the natives, with prospects of an increased production of food. Hawaii also has materially increased its production of food crops. Before the war Hawaii and Porto Rico imported some \$20,000,000 worth of food supplies from this country annually. Many of the articles imported can be grown successfully in these islands.

of farm animals, in the production of human food (milk) and the hog is the most efficient in the conversion of grain into meat, producing five times as much per acre of crops as does any other animal.

Close Attention to Sow. The sow rears very close attention until the pigs are at least six weeks old—more so if she has a large litter. The growth of the pigs depends on the treatment the sow is given.

## A KLONDIKE TO THE REAL FARMER

A Western Canada Crop Estimated at \$12,000,000, Makes \$19,000.

Messrs. Harris, formerly of Audubon, Iowa, wrote the "Audubon Advocate," expressing their satisfaction of things in Western Canada. They located at Makepeace, Alberta. They say there are those who make good, and those who fail. The former are those that land agents refer to when advertising their land. "But," continues the letter, "A great many of the farmers in this vicinity pay for their land with their first crop. A man near here bought a section of land in the year 1915 for \$23 per acre. He broke 300 acres of the land during the summer of 1915. In the fall of 1916 he threshed 10,000 bushels of wheat, which paid for his land, all expenses and had a balance of \$4,000. In the fall of 1917 he threshed nearly as much of the other half of the section. At the present time he would not take \$50 per acre for his land.

"We have had five crops in Alberta. The two dry years (1914-1917) our wheat made 20 and 30 bushels to the acre respectively. In 1916 we raised 50 bushels of wheat to the acre on summer fallow. The best results are obtained by plowing or breaking in the summer, working it down in the fall so that it will retain the moisture. Thus farming one-half your ground each year.

"Persons owning land here and still living in the States should, if they don't feel themselves able to come up here and finance themselves until they could get their first crop, get some of their land broken and worked down in the fall before they come. The next spring they could come and put in the crop, fence and put up their buildings. This way they have to wait only one summer for their first crop."

Immigration, Ottawa, Canada, or to C. A. Cook, 2012 Main Street, Kansas City, Mo.; C. J. Broughton, Room 412, 112 West Adams Street, Chicago, Ill. Canadian Government Agents

## Tired Nervous Mothers

Should Profit by the Experience of These Two Women

Buffalo, N. Y.—"I am the mother of four children, and for nearly three years I suffered from a female trouble with pains in my back and side, and a general weakness. I had professional attendance most of that time but did not seem to get well. As a last resort I decided to try Lydia E. Pinkham's Vegetable Compound which I had seen advertised in the newspapers, and in two weeks noticed a marked improvement. I continued its use and am now free from pain and able to do all my household work."—Mrs. B. B. ZILLINGS, 202 Weiss Street, Buffalo, N. Y.

Portland, Ind.—"I had a displacement and suffered no badly from it at times I could not be on my feet at all. I was all run down and so weak I could not do my household work, was nervous and could not lie down at night. I took treatments from a physician but they did not help me. My Aunt recommended Lydia E. Pinkham's Vegetable Compound. I tried it and now I am strong and well again and do my own work and I give Lydia E. Pinkham's Compound the credit."—Mrs. JOSEPHINE KIMBLE, 935 West Race Street, Portland, Ind.
