DANCES GROWING MORE IMMORAL

Downward Tendency in Dancing Keeps Pace with Immorality in Dress.

BY BEN H. GRIMM.

With the arrival of the new diaphanous and x-ray gown from Paris, two new variations on the turkey trot and tango dances have been originated to fit the dresses, and they are steadily growing in the favor of the habitués of cabarets and among New York's younger set. The dances were first conceived to show the new gowns to their best advantage and are known as the "Diaphanous Dip" and the "Silhouette Slide."

The "Diaphanous Dip" is danced in two-step time, and, in parts, closely resembles the "Grapevine" movement of the tango. The dance is begun with four skipping steps, followed by the "in and out" steps, the couple zig-zagging across the floor and bending the knee at each turn. This bending of the knee constitutes the "dip." The dance is originally devised showed not the least sign of suggestiveness, but the manner in which it is danced in some of the cabarets is indecent to say the least.

The "Silhouette Slide" is danced to waltz time, and seems to be a cross between the ordinary round waltz and the old-fashioned can-can. The first movements of this new dance are three long, sliding steps, from which the dance gets its name; followed by the ordinary waltz steps, three turns right and left, the couple again slide and continue with the waltz.

The dance made its daring debut in one of the better cabarets through the medium of a party of young folk of the footlights. Ten couples participated, the girls of the group wearing diaphanous and x-ray gowns, cut in the latest pattern of evening dresses, very much décolleté, and made of white gauzy material resembling China silk. The men of the party were dressed in white flannels.

All lights in the ballroom were turned out with the exception of four powerful, light-colored searchlights, two at either end of the floor, and set at a height of about two feet from the floor. The searchlights changing color momentarily, and laying on a group of gyrating girls and their flannel clothed partners, produced a startling kaleidoscopic effect, and suffice it to say that the powerful rays of light were strong enough to prove that the titles "Silhouette Slide" and "Diaphanous Dip" were appropriate to a marked degree.

Had Gowns in Favor. Since then the fad for this particular form of dancing has grown in such favor with the worshippers of the rakish Terpsichorean Goddess, who frequents cabarets and who makes up a large part of the night life of the "Great White Way," that the management of the various places in which dancing is indulged in, have been compelled to run the searchlight dances as a regular feature.

One who is favored with a glimpse, immediately becomes absorbently interested in the various forms of dancing exhibits and the gyrating dancers are appreciatively lined by the onlookers at the tables.

Putting it as modestly as possible, the Diaphanous Dip" and "Silhouette Slide" are bound to become as fascinating an attraction for the man-about-town and the "man whose wife's away," as they are to the many lovers of the various popular syncretic ballroom gyrations.

CRAWLED ON HIS HANDS AND KNEES

South Bend Man's Condition Such He Could Not Work For Eight Weeks—Crawled About On His Hands and Knees.

Could one contemplate a more pitiful sight than a strop man, shorn of his manly strength and vigor, unable to stand erect, wrecked and crippled physically, due to the great modern uric acid producing rheumatism? Those who are now suffering from acute and even mild forms of rheumatism should stop and consider the countless number of human beings who are to-day incurable cripples, whose cases have become hopeless, and whose days mean to them naught but cycles of pain and suffering, and then ask themselves the question, does it pay for me to neglect my own case?

The following letter received by Dr. Bartlett, the specialist in charge of the United Doctors' South Bend Institute, located on the second floor of the Toepke building, opposite the postoffice, should impress all rheumatic sufferers with the masterful manner in which this specialist administers treatment in this class of cases:

South Bend, Ind., Aug. 28, 1913, Dr. S. M. Bartlett, South Bend, Ind.

Dear Doctor:—For seven months before coming to your office I suffered with rheumatism in my arms and legs. It grew so bad that I was forced to lay off from my work for eight weeks. Then I improved some and was able to return to my work, but could only work one or two days a week.

At last I saw so many accounts in the daily papers of the good you were doing for the people, that I decided to give you a trial. At times my condition was so bad that I could only move about the house by crawling on my hands and knees.

I am pleased to say that after treating with you a short time I am now able to work every day, and am having no trouble whatever.

I should be glad to have you make this letter public, as I am very thankful for what you have done for me.

Jacke Pauwels, 522 1/2 Kosciusko st. If you are suffering from rheumatism it should be a comfort to you to know that the progress of your case can be arrested before you reach that hopeless stage of chronic invalidism which will deprive you of that share of enjoyment and pleasure in life which is justly yours.
