The bakers cited the following percentages of increase in cost of ingredients in the manufacture of bread within the past two years: Patent flour 100 percent; rye, 124 percent; sugar, 66 percent; shortening, 60 percent; milk, 40 percent; salt, 14 percent; wrapping paper, 70 percent.

Fear that her pupils in the Sugar Grove school, southeast of Elkhart, had been infected with infantile paralysis, with which a child was thought to be suffering at the home of Mrs. Elizabeth Wires, from which several other children were coming daily to the school, caused Miss Dot Sellers of Osolo township, teacher at the country building, to take all her pupils out into the school yard Friday morning and kept them entertained there while she reported her fears to Township Trustee Leslie Chamberlain of Elkhart.

Chamberlain told Dr. G. B. Hoopengartner, deputy county health officer, who ordered the children sent home. Dr. Hoopengartner then telephoned to the Goshen doctor in charge of the Wires case, who said that there was doubt as to whether or not the child had the dread disease. The child is 12 years old, and several brothers and sisters have been attending the school during his illness.

Talks State Finances.

Reviewing the charges that have been made by the republicans against the democratic state administrations of the past eight years, Congressman Adair pointed out, as a reason for greater expenditures of money, that the state is supporting 19 state institutions now as against 12 in Gov. Hanly's day, caring for upwards of 2,000 more inmates. "The money is all going for the support of those institutions," he went on, "and is not being embezzled by auditors or state officers, as in the days of republican rule."

"Indiana is out of debt," Congressman Adair went on, "this for the first time in 84 years. In addition to supporting a forty per cent increase in state institutions, we have paid off in eight years \$1,452,000 of building construction bills inherited from the republicans, besides \$2,800,000 foreign and domestic debts, and bond issues aggregating \$256,548, have been retired, some of them 21 years in advance of maturity. This has been accomplished too, while reducing the state tax levy from 12 cents as under the last republican administration, to nine cents under Marshall, and seven cents under Ralston, and we still have \$1,000,000 in the state treasury."

That Salary Hoax. The congressman pointed out that the republican press is seeking to throw discredit upon the democratic administration, by asking the question of him to name a state officer, the salary of whom has not been raised by the democrats. He answered them by defying them to name a single state officer whose salary has been increased, but pointed out that the republicans did increase salaries while in control of the state, as in the case of state judges. The only offices created, too, he pointed out, have been on account of new institutions established, like the public service commission, the industrial board, the fire marshal, etc., necessary to the conduct of the institutions, and he challenged Candidate Goodrich to promise the people to repeal any of the laws by which these institutions and offices were created.

Congressman Adair visits Rochester Saturday and will be back in the northwest section of the state later in the campaign. It was after his address that Rep. Hagerty was called upon for a few remarks. The candidate for joint senator paid a splendid compliment to the nominee for governor, and asked the voters to help him get to the state senate that he might help Mr. Adair in carrying out his promised program. It is expected that Mr. Hagerty will deliver several speeches in Marshall county during the campaign. This is the first year that Marshall and St. Joseph counties have been joined on the senatorship. Formerly Marshall and Kosciusko counties were joined, the retiring joint senator being State Bank Examiner Harry Grube.
