COLD FEET AND THE REMEDY.

Even in the steam heated city apartments, one often gets "cold feet" during the night, which is annoying if not painful and causes one to lose many of the valuable sleeping hours, while shivering and codling these icy members.

If you have cold feet at night try soaking them in water as hot as you can bear it just before retiring. Jump right into bed so that they will not get chilled and you will find the nerves soothed and the blood pressure in the head relieved.

Some people wear bedsocks to bed, but sometimes these prove irksome and tend to make the feet tender. A better plan for regular use is to slip a woolen shawl or part of an old blanket under the covers where the foot can rest against it without being themselves actually covered.

In aggravated cases of sleeplessness a hot-water bottle often gives relief when placed at the feet. Others prefer it across the back at the waistline. Sometimes a chilly feeling after retiring may be overcome by laying a woolen shawl over the thighs and lower part of the stomach.

I know one woman who rarely needs heavy covers even in the depths of winter by using a shawl in this manner.

What the French Maid Told Marjorie

BY JANE LOWELL.

LAUNDERING LACES.

"You know that nice lace centerpiece Marie," sighed Marjorie one morning in a doubtful voice. "It came back from the laundress all in rags."

"I am so sorry," sympathized Marie, "but it is a risky thing to entrust fine centerpieces, doilies, laces or shirtwaists to the care of the ordinary laundress unless she has exceptional skill and then, of course, she must take the time to wash all these articles separately after the regular wash is done."

"These fine pieces should be carefully rubbed with the hand in warm suds, using only a good white soap. Then they should be well rinsed and when necessary passed through a thin starch water and dried in the shade."

They should be iron on the wrong side while still damp with a hot iron

and if embroidered they should be pressed over a thick woolen cloth or blanket, which causes the embroidery to stand out instead of being flattened.

"Doilies, tray covers and handkerchiefs that have lace or drawn work edges may be stretched smoothly on a clean window pane and allowed to dry in the sun. Other pieces that are too large to be treated in this way should be stretched and pinned upon a bed or a large covered surface."

"If table linen is discolored by fruit or wine stains, the spots may be removed by stretching over a bowl and pouring boiling water over them. This may have to be repeated several times before it becomes effective. Applying cold water and white soap to an old stain is often effective while paint stains may be done away with by the use of turpentine."
