It appeared that a certain zealous and valiant fish warden got a tip that wicked men were taking the finny tribe unlawfully in the waters of the lake and he organized an expedition, consisting of himself in a row boat, which he launched boldly against the fish pirates. Coming up with them by the practice of a strategy he loudly demanded their immediate surrender and revealed his purpose to maroon them or harpoon them or do something else dreadfully nautical. It then appears that the fishermen opened up on him with their artillery, consisting of a revolver and a choice lot of expletives, and sunk his craft with their bullets; he swam to their boat and attempted to board them but was repelled with marlinspikes or something and severely wounded so that he desisted from his attempt and withdrew to the shore, we do not know how.

It next appeared that there was no truth whatever in the gory tale and that no fish warden was on the lake at that time so we give it for what it is worth.

TWO VALUES.

HERE are two values to every purchase— what it costs and what it pays you. Cork costs 8 cents a pound, but if you are drowning half a mile from shore, its value would be "not what you pay for cork, but what cork saves you." When a woman buys soaps she often confuses the two values. She sees only what she pays. She overlooks what she receives. Now a single cake of Ivory Soap pays back from ten to twenty times its cost in the saving it effects. Test it yourself! Vegetable Oil Soap. Ivory white. It floats!
