Streptococcus Pyogenes.

Dr. Marmorek, a Viennese physician, now with Dr. Pasteur in Paris, has discovered the bacillus, the presence of which causes septic diseases. He has named it "Streptococcus pyogenes," and states that it is the active cause of inflamed wounds, resulting sometimes in lockjaw or running sores, "proud flesh" and blood poisoning. Brazilian Balm is an anti-septic dressing for fresh wounds or old sores and ulcers, is a perfect antidote for this bacillus. It is a vegetable serum that quickly staunches bleeding, kills all germs, removes the pain and soreness and promotes healing with surprising rapidity. It should be used freely and at full strength. Always keep it on hand.
