

AN EXTENSIVE ADDITION

Being Made to the Indiana Mineral Springs (Indiana) Hotel

AT AN OUTLAY OF \$30,000.

Growth of Enterprise Representing Expenditure of \$250,000—Successful Management of H. L. Kramer.

Ten years ago the ground where the magnificent hotel property of the Indiana Mineral Springs Company is located at Indiana Mineral Springs, Indiana was wholly unimproved and almost a wilderness. Now, owing to the discovery of the valuable medicinal qualities of the springs and the healing virtue of the soil itself, together with the enterprise of Major H. L. Kramer, there is located here one of the finest sanitariums in the United States. The natural picturesque surroundings have been made more attractive and the hotel is a model of comfort and elegance.

For the greater accommodation of guests who come in constantly increasing numbers from every section of the United States, arrangements have now been made for the enlargement of the hotel buildings. The contract was let yesterday by Major Kramer for additions that will cause an outlay of over \$30,000. The improvements will consist of a new bath house and an addition to the hotel. The addition will be two stories in height and will occupy a ground space 80x100 feet. It provides forty additional guest chambers. The entire addition will be handsomely and elegantly furnished. The bath house, when completed, will be the finest in the United States.

Besides the bath house and the guest chambers there will be on the first floor a dining hall, a music room, a billiard hall, physician's offices and a barber shop. In connection with the bath house there will be ladies and gentlemen's dressing rooms and cooling rooms. The dressing and cooling rooms will be elaborately decorated and the floors will be laid in white tile. In both cooling rooms will be built large ornamental fire places which will be used for heating purposes in addition to the regular steam heating. The work will be entirely completed in 90 days.

The improvement and the entire arrangements of the hotel and grounds are made, keeping in view the artistic effect of the whole, and when the improvements arranged for are completed the hotel and surroundings will be much more attractive than before.

Major Kramer states that a still further addition to the hotel is contemplated, and that plans are now being prepared for an additional structure to contain 150 rooms for guests.

Already a quarter of a million dollars has been expended on the Indiana Mineral Springs enterprise and under the present management greater growth and development in the future is assured.—Attica Daily Ledger.

IN THE HARBOR OF NAGASAKI.

Japanese Port That Has Become Our Temporary Coaling Station.

Japan will have almost local interest for us until the Chinese troubles are ended, and the one place in Japan the name of which will be in the newspapers the oftentimes will be Nagasaki—Nagasaki the Beautiful, and one of the greatest coaling stations in the Orient. In entering Nagasaki harbor from the Japan sea the first attractive object that catches the eye is the famous Papenberg island at the mouth of the channel. It is 500 feet high, and is covered with thick foliage, except at the cliff, the face of which is ragged rock falling sheer to sea. It was at this point that about 1,000 years ago 2,000 Christian worshippers were tossed

exceptions that they are hardly to be mentioned. The town and harbor are nestled at the head of a short inlet of the sea, surrounded by the gaily colored hills and mountains. It appeared like an ideal haven of rest when the Sumner dropped anchor within 500 feet of the shore. The architecture is excellent, and picturesque uniformly. Just as we see it illustrated on the Japanese fans and artistic views that are sold in the States. Nagasaki has the deserved reputation of being the fastest coaling station in the world. Men and women work together in passing hand baskets of coal from one to another in a long line from the barges to the ship's chutes, or carrying them up long ladders in lock-step double file procession. The photograph reproduced herewith

ship company, which works in conjunction with the Pacific Mail and the O. & O. They fly the flag of Japan, but were built in American yards. Nippon is the name of the largest island in the group and Maru is the Japanese word for steamship.

Sampans are the special beauty spots of the harbor. They are the odd little boats that take the place of rowboats used in other ports. They are long, narrow boats, partly hoisted over, and are propelled in a most peculiar manner. Instead of oars or paddles, a single long wooden blade is employed at the stern to push the flat vessel along at a lively gait. By a swinging wrist and swaying body motion the boatman produces an action in the water like that of the tail of a fish or the blades of a propeller. It was not necessary for the Sumner to drop her launch into the water during the three days we were in Nagasaki. Swarms of the little sampans surrounded the ship at all hours, all anxious to carry the visitors ashore at five cents a head. The peculiar propulsion gives the boat a jerky motion, not at all unpleasant, that reminds one of a ride in Coney Island in a whirligig. A good illustration is shown in the Nippon Maru picture of the Japanese sampan.

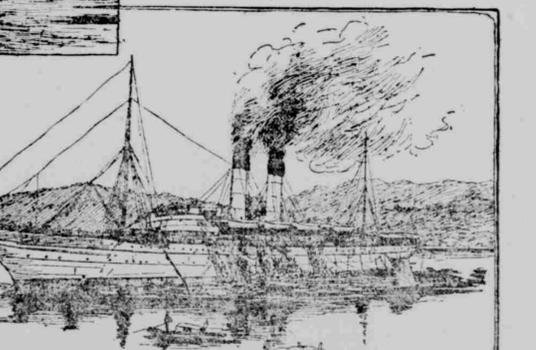

HISTORIC PAPERBERG ISLAND.

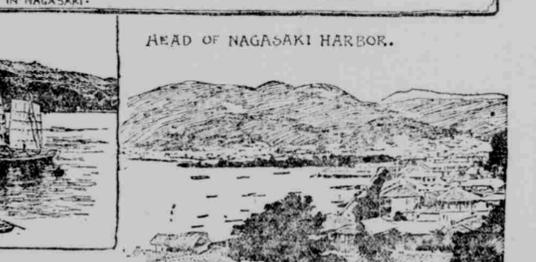

from the summit of the ruling sovereigns of Japan. The Japs were all Buddhists then, and they are now, and they took this savage means of preventing the missionaries from spreading a new faith in their land. The morals and methods of this people have changed remarkably, but the nation still adheres closely to the old religion. All the temples in the Japan islands are of that creed, with so few exceptions that they are hardly to be mentioned.

COALING THE NIPPON MARU IN NAGASAKI.

NAGASAKI HILL AND HARBOR.

of the Transpacific liner Nippon Maru in the process of coaling in Nagasaki harbor, gives a fair idea of the activity and numbers of the natives, who stick to such hard and rapid labor for ten hours at a stretch. The Nippon Maru is one of the three ocean flyers that are owned by the Japanese Steamship Company.

to the chain. In another form liquid and dry lubricants are used in conjunction. The liquid being placed in a

No imagination is required to enjoy the grand spectacle. The actual reality is before you. But the climax of the entertainment is reached in the soul-stirring scene in which the naval battle of Manila is fought to a finish in plain view. This stupendous living and moving picture of warfare at sea is the acme of realism. It is as if we were looking on the conflict itself.

The above truthful description of the naval battle of Manila explains why it is that the citizens of Chicago look upon the attraction as one of the city's "Seven Wonders."

New Fad in Exercise.

When a man is seen running across the streets and walking with decorum during the rest of the time, it must not be concluded that he is indulging in any particular eccentricity or is the victim of a nervous fear of passing vehicles. He is merely trying a system of physical exercise, which has recently found many adherents and is believed to bring good results. Its chief merit is its simplicity, and it can readily be combined with a daily walk, such as many men take. Running instead of walking across every street is one of the principles, and this is intended to vary the monotony of the exercise that comes from mere pedestrianism. One of its other important rules is that the fingers be kept constantly in motion, and close observers of the morning parade down Broadway may frequently see fingers twitching nervously, but in accordance with a regular system not comprehensible to the uninitiated.—New York Sun.

Automatic Lubricator.
The need of some device which will keep the bicycle chain constantly lubricated and free from dirt is well understood by every bicycle rider, and the merits of the invention illustrated below will be readily seen. The device has been patented by Herbert Garland of England, and consists simply of a stick of graphite suspended in a casing, with a circular brush to deposit the lubricant on the chain. The pocket for the graphite is clamped on the central tube of the frame in a convenient position, with the brush suspended underneath and rotated by the chain. The casing is open at the bottom, and the bristles coming in contact with the stick detach small particles of the lubricant and transfer them

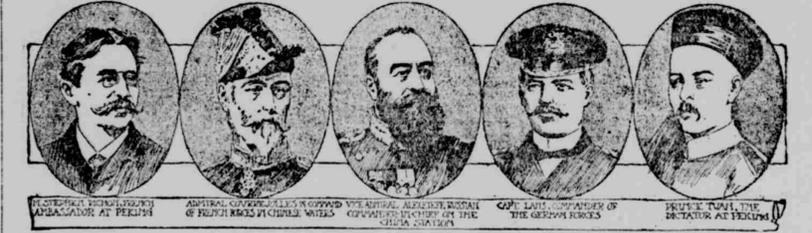

CLEANER AND LUBRICATOR.

Begins Issue of Bonds.
The Secretary of the Treasury has begun sending out the new 2 per cent bonds due in 1930, which are to take the place of such of the old 3s, 4s and 5s as have been offered for extension at the new rate under the currency act of March 14, 1909. The amount of the old bonds outstanding when the offer to extend them was issued was a little less than \$840,000,000, and of this amount \$320,680,000 has been surrendered and a corresponding amount of the new 2 per cents will have been sent to the owners before the end of August.

Cataract Cannot Be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Cataract is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Cataract Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Cataract Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Cataract. Send for testimonials free. F. J. CHENEY & CO., Props., Toledo, O. Sold by druggists and general dealers. Hall's Family Pills are the best.

MAJOR CROZIER.

Was It a Plot to Kill?
Exposition visitors were startled the other day by the sensational announcement that an attempt had been made on the life of the shah of Persia. It came close on the heels of the news that King Humbert had been assassinated. The shah, who is visiting the exposition, was driving through the grounds, accompanied by his retinue, when a guard observed a man in the crowd who seemed to be trying to force his way into the presence of the shah. He elbowed his way through the throng and got so near as to attract the attention of the Persian ruler. He was seen to make a sudden lunge toward the carriage and was thought to

SHAH OF PERSIA.

THE BATTLE OF MANILA.

Undoubtedly one of the chief attractions of Chicago is the great electrocyclograma, entitled the "Naval Battle of Manila," located at Wabash avenue and Hubbard court, opposite the "Battle of Gettysburg."

President McKinley said: "It is a wonderfully impressive scene. Every American should see it." General Joseph Wheeler said: "In my judgment the war department of the United States could do nothing better than to acquire the naval battle of Manila for the instruction it will afford young naval officers."

This unequaled reproduction of the battle that made Dewey an admiral and won a kingdom for his country, requires a building of about an acre in size in which to be given.

Under the peculiar system of optics involved in the arrangement of the rays of light that fall on the cyclograma or circle picture, each object is magnified to its actual or natural size. The application of this secret of the art of exhibition has the effect of simulating nature, hence the great pleasure the attraction affords visitors. In addition to this particularly entrancing illusion, if it can be called such, one, while on the deck of the warship Olympia, the point of observation, sees the real smoke and hears the real thunder of battle.

Besides this grim but sublime spectacle of war, visitors are treated to a thrilling and marvelous reproduction of a storm in which wind and water, clouds and rain, moon and stars appear and disappear in plain view in a manner so realistic that the spectators feel that they are sailing through the night over a storm-tossed sea.

No imagination is required to enjoy the grand spectacle. The actual reality is before you. But the climax of the entertainment is reached in the soul-stirring scene in which the naval battle of Manila is fought to a finish in plain view. This stupendous living and moving picture of warfare at sea is the acme of realism. It is as if we were looking on the conflict itself.

The above truthful description of the naval battle of Manila explains why it is that the citizens of Chicago look upon the attraction as one of the city's "Seven Wonders."

RUSTIC CONSTRUCTION CO., 19 Fulton St., New York City.

NEBRASKA THE LAND OF PLENTY

I wonder why it is that so many men spend their days working hard on rented farms, barely making enough to get along, with no great prospect ahead of owning their own homes, when within a few hours' journey is a land of plenty—Nebraska—where all kinds of grain and fruit can be raised with the least amount of labor; where cattle and hogs fed on corn bring a handsome profit; where the climate is healthful and churches and schools abound; where land is cheap and can be bought on very easy terms.

Think of this, and if you want information about the country send to me for "The Corn Belt," a beautifully illustrated monthly paper that tells all about Nebraska, and also for "The West Nebraska Grazing Country," an interesting illustrated booklet containing a large sectional map of Nebraska.

On the first and third Tuesdays of each month during the balance of this year cheap excursion tickets will be sold over our road to Nebraska, so that people may go and see for themselves. Ask your ticket agent about this.

P. S. EUSTIS, Gen'l Pass'g Agent, C. & N. O. R. R., CHICAGO, ILL.

FARM MORTGAGE LOANS

In amounts ranging from \$300 to \$10,000 on choice improved farms in the Western part of North Dakota.

Write us if you have money to invest and we will be pleased to send you description of loans, rates of interest, etc. Personal examination of all loans. We have invested nearly One Million Dollars in farm loans in North Dakota since 1881, without the loss of a dollar.
