Iowa's Lead in Live Stock as Shown by Recent Statistics.

Des Moines, Feb. 27.—In this time of high prices for live stock, Iowa's supremacy in the live stock field is more marked than ever before. The Hawkeye State leads all other states in the number and value of her farm animals. The figures up to January 1, 1913, have just been announced by the United States Department of Agriculture.

The total value of Iowa live stock January 1, 1913, was \$393,482,000. The state exceeds her next nearest competitor, Illinois, in the value of her live stock by \$55,492,000.

Iowa leads all of her sister states in the value of her horses and also in the value of her swine. She is first in beef cattle with the exception of Texas. She leads all of the corn belt states in sheep but does not have the sheep that many of the far western states show. In all lines of live stock, however, she is so strong that the sum total surpasses that of any other state in the Union.

All of the swine in twenty-eight states of the Union do not equal in value those of the state of Iowa. The territory which includes all of the north Atlantic states, all of the south Atlantic states and all of the far western states, has swine to the value of \$101,884,000, while the swine of Iowa are valued at \$104,540,000. In fact Iowa has more than 14 per cent of all the swine in the entire United States and in value they amount to more than 17 per cent. Iowa's population is only two and a quarter millions while that of these twenty-eight states is more than 50,000,000.

Beef cattle are comparatively scarce in Iowa, now, as is the case throughout the entire country but the Hawkeye state has more beef cattle than all of the north Atlantic states combined. She now has over 2,607,000 beef cattle on her farms, which are valued at \$86,000,000. The annual marketing of beef cattle at the seven principal markets of the United States amounts to 8,000,000.

Prices for live stock are high. Horses in Iowa are averaging now \$120.00 per head while the average price in the past ten years has been \$96.00 per head. Beef cattle average \$33.00 per head while the ten year average is \$22.30. Swine average \$12.00 per head here in Iowa while the ten year average has been \$8.60 per head.

These figures show that Iowa live stock products go a long way toward feeding the world. And this, too, at a time when the demand is great and the products scarce.

Don't worry if you can't understand a poem; possibly the poet couldn't either.

Deafness Cannot be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Dr. Williams' Pink Pills. Send for circulars, free. Take Dr. Williams' Family Pills for constipation.

Absolutely FREE

We are going to give you this useful, pure Aluminum Sauce Pan

with any purchase of the Original "1892" Pure Spun Aluminum Ware amounting to 85c.

There are positively no strings to this offer. This valuable sauce pan that sells everywhere for 35c, will be presented to you whenever you have made your 85c purchase.
