The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for every case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, Ohio. Sold by all druggists.

Porch Floors, Cellar Floors, Cisterns and Chimneys . . .

All need your attention this time of the year. We have an absolute WATER PROOF PREPARATION, anyone can mix, and apply, and it will not cost you one penny, unless it does the work. PORCH FLOORS that do not hold water, will not hold dust, and dirt, but sweep off, like they were polished.

I have tested this preparation in every way, and you have all to gain and nothing to lose. I am a new citizen with you, and should be very careful what I say, so that my future will be clear sailing, but I will risk HYDROZO, the name of this paint, against my reputation, and be only too glad to demonstrate if convenient with you. I have samples at my office, of old soft brick, shingles, gloves, hats, and am going to dip my rain coat, and will give you a small phial to try yourself.

Come to my office, stop me on the street, call me over the telephone, anyway just so we get acquainted with Hydrozo, and each other.

**Royal Garland Heating Stoves**

For Soft or Hard Coal, Coke or Wood

The strictly high-grade, attractively designed, colonial oak is the most popular type of heating stove today, and there is an exceedingly large demand for it in almost every territory.

The Royal-Garland of Colonial design is an entirely new construction that is thoroughly modern and most compelling and attractive, as a glance at the stove will convince you. In ornamentation it is entirely different than anything that has ever been offered. The colonial idea has been followed out very closely. All castings and nickel trimmings are of smooth finish, and it cannot but be admitted that it is the handsomest stove of its type.

This stove embodies all of the features of the Smokeburn Garland, one of the most extensively sold, satisfactory and popular constructions ever made.

By the use of the "Garland" forced-blast principle, air is introduced through the nickel screw draft register in the front and passes around between the ring and the fire-pot, becoming heated, thence through openings in the fire-pot into a gas ring filled with perforations, through which the heated air meets the inflammable gases as they leave the fire below.

The result of this contact of the hot blast jets of hot air with the hot gases is a brisk, smokeless flame and maximum results from the fuel used.

Nickel-plated Parts—Top ring, side columns, combination grate-shaking door with screw draft, gas-ring register, attractive foot-rail, knobs, turnbuckle, hinge pin tips.

It is the best stove to buy. See us about the matter. We sell them.
