THINK!

Exactly that—THINK! If every one would only think carefully before buying the heating equipment for their home, there would be no more dirty, dusty, dry, gassy jobs. There would be no more snapping, cracking radiators giving off dry parched heat—dry as a bone.

Every home should be heated with pure, warm, ever-changing air, free from dust, gas and smoke. Every home would be heated healthfully and economically. Every home would have a permanent, durable heating system.

Every home should be equipped with the The Round Oak Moistair Heating System

The reasons? There are many, but every one simple, logical, and, practical, also exclusive. Ask us to show you why, also get the large book that explains why. To enjoy all these advantages you have but to investigate, think and act. Do it now!
