

DO NOT TOUCH Your Carburetor

It is the most delicate piece of mechanism on your car. It contains the mixture which supplies the propelling energy to your cylinders for combustion and therefore power.

A change in adjustment means changed power and a different acting engine. When you get a good, economical adjustment keep it. Don't let anyone touch it.

If you burn Red Crown Gasoline with the correct carburetor adjustment you never will have to change it except for winter.

If you buy gasoline indiscriminately a constant carburetor change is required to get even fair results, because gasolines from sundry refineries vary. In Red Crown alone you have a uniform chian of boiling point fractions which are identical in every batch.

Red Crown

Everywhere and Everywhere the Same

Every batch is inspected before it leaves the refinery, and is guaranteed by the Standard Oil Company of Indiana to be exactly the same as every other batch, no matter whether you get it in Iowa or Illinois, or any other state, and you can get it everywhere.

If you are not using Red Crown Gasoline start today. Fill your tank with it—take your car to an expert carburetor man. Get the right adjustment and then let it alone. You will be surprised how your mileage will increase.
