

A Woman's Burdens

are lightened when she turns to the right medicine. If her existence is made gloomy by the chronic weaknesses, delicate derangements, and painful disorders that afflict her sex, she will find relief and emancipation from her troubles in Dr. Pierce's Favorite Prescription. It is a powerful, invigorating tonic and nerve which was discovered and used by an eminent physician for many years, in all cases of "female complaints" and weaknesses. For young girls just entering womanhood; for women at the critical "change of life"; in bearing-down sensations, periodical pains, ulceration, inflammation, and every kindred ailment, the "Favorite Prescription" is the only medicine put up without alcohol—ingredients on wrapper.

CORNELIUS BRYERS, Iowa.

"Some time ago I had displacement, this caused me to have severe pains in my back. I was nervous and weak, and as I was going through middle life, would have hot flashes, also dizzy spells. I took the 'Favorite Prescription' and it proved very beneficial. It helped to build me up in health and strength, and was a great help to me in many ways. I shall always recommend it to others whom I find suffering."—Mrs. S. C. MAHR, 3540 Ave. A.

BURLINGTON, Iowa.—"I am glad to say that Doctor Pierce's Pleasant Pellets have been a family remedy for fifteen years. (Sold by druggists.) I have found them fine to overcome constipation. They are not only pleasant but the results never disappoint, and the longer used the better they are appreciated."—Mrs. ANNA MOSENA, 1539 Ashmun Street.

NO MORE MOORES.

Five Sons of Mr. and Mrs. H. C. Moore of Bloomfield Now in the Service.

The H. C. Moore and H. C. Brown families, each composed of the parents and five sons, have been vying with each other for honors in the matter of sending their lads to fight for Uncle Sam.

Just at present the Moore family is ahead in the race. All five of the Moore boys are now wearing the khaki. The last to join the army was Russell, who has been for the past few years a railway mail clerk, and has been domiciled at Humes, Iowa. He volunteered for service as a mechanic, and is now in training at Kansas City. Two of his brothers, William and Kenneth, are in France. Both have been on the battle line. William is in the 1st Infantry, and was in the parade in Paris, last July 4. He was one of the first detachment of the first company of American soldiers to enter the trenches. Kenneth is in Co. B, 168th Infantry, and his captain, Mick McHenry, of Des Moines, was killed in action recently.

The oldest of the boys, Samuel, enlisted a month or so ago, and is with an electrical engineer regiment, which if not now in foreign service, will be shortly.

The youngest of the five is Arthur, who is a cadet at West Point. The Brown family has four sons in the service, and the fifth is still a lad far too young for army service. Of these, Lee, youngest of the four, is in France, and was with an English regiment at Cambrai, at the time the great German offensive commenced. He has not been heard from since that time. Ralph is at a port of embarkation. Willard is a lieutenant at Camp Dodge, and Harry is in training camp at Chattanooga.

It is a rare privilege for a town the size of Bloomfield to boast of two families such as the Moores and the Browns, who have given so freely and so greatly to the great cause.—Bloomfield Democrat.

Farm Bureau Notes.

(By T. M. Deal, County Agent.)

Furloughs for Farm Boys.

It is the plan of the government to grant short furloughs to farm boys during planting and harvesting seasons. These furloughs will only be granted where they will not interfere with the regular military progress and are to be granted only for short periods, probably limited to twenty or thirty days.

Furloughs will not be granted to enlisted men above the grade of First Sergeant, nor will they be granted in any organization that has been ordered or is in transit from points of mobilization or training to a port of embarkation. These furloughs are granted without pay and allowances except that enough pay will be retained to meet allotments in force on the date of this order, war-risk insurance and pledges on Liberty bonds.

The application for a furlough has to be made out by farmers or relatives, blanks may be secured from the local board or from the county agent's office. It is necessary for both the county agent and the local board to sign the application.

See Corn Tested Free.

The Farm Bureau will test a sample of corn for any one who has seed corn they are doubtful about. Any one expecting to plant new corn is not sure of a stand unless they test every ear planted. We can not do this for you but we will test twenty ears. Either bring the twenty ears to the county agent's office or else remove six kernels from each ear, put the kernels in a separate envelope, number the envelope to correspond to the ear and bring the envelopes to this office.

Boys' and Girls' Clubs.

Boys and girls expecting to get in on the club work should get their enrollment blanks in as soon as possible. The enrollment is made in every day and the campaign for enrollment is to close in about two weeks.

The total value of pork produced by club members last year was \$16,364.60, with an average profit of \$18.68 for each pig. The value this year will be many times that of last year.

One of the members of last year's corn club, Eugene Dugan, of Plymouth county, raised 135.9 bushels on his prize acre.

The average yield of the entire group of club members reporting was 63.82 bushels, a yield averaging 24 bushels more than that of the average Iowa farmer.

Enrollment blanks may be secured for both these clubs from this office.

Soy Beans vs. Cowpeas.

I have had a number of inquiries during the past week regarding the value of soy beans and cowpeas for hog feed when planted in the corn and hogged down. The soy bean is preferred to the cowpea in this locality as the cowpea is better adapted to the warmer climate of southern Missouri.

Either of these crops has a very high value as a feed, they are exceedingly rich in protein. This is the nutrient which is most deficient in our common feeds. It is for protein that oil meal, cotton seed meal, bran and other such feeds are fed.

Soy beans will do well planted with corn, drilled separate and cultivated, or sowed broad cast and cut for hay. When planted in the hill with corn they are very valuable as silage and may be cut with the corn binder along with the corn. Soy bean attachments may be procured which will work on all of the standard makes of planter, these attachments will plant the beans in the hill with the corn. In this way the beans are not in the way while cultivating the corn.

Soy beans are exceptionally good sheep feed. Where western lambs are used they may be turned in the corn field after the corn is laid by.

Soy beans have about the same value as clover as a nitrogen restorer for the soil.

To Be a Long Battle.

It is declared that the kaiser has planned a continuous attack in the west until the Allied lines shall melt away or his own ranks are depleted. This means, indeed, that the present terrific offensive will not be halted for weeks—perhaps for months unless the German army becomes so weakened by the effort that it can no longer stand the strain. In that event, the Teutons will fall easy victims to a counter-attacks—will be wiped out by such rebounding smashes if these are quickly and sternly managed at the proper time.

The program as said to have been secured from German offices now held as captives provides the most feasible plan the German war lords could devise. They have nothing to gain by delay, nor by a continuance of the methods of warfare employed in the last two years. They have much to lose in hurling their forces against the strong Allied lines, but it is easy to see how the daring effort could have been made to promise decisive results when discussed by the kaiser and his officers. It would appeal to them as a particularly Teuton undertaking—the sacrifice of hundreds of thousands of men in an endeavor to gain an advantage. Men do not count when the ambitions of the ruler of an empire are at stake.

But one way is open to the Allies in meeting this movement. That way is to back the assault so long as it shall be attempted, and then to launch an offensive of such proportions as may be expected to rout the recent German gains and send the kaiser's army back through the territory it has held for three years. When once the German line begins retreating, it can be kept constantly on the move if sufficient troops are at Gen. Foch's disposal to give the foe no instant's freedom from devastating blows.

Beaten back, the German army will not rally; the German spirit must fall. The people, in common with their emperor, have put all their hopes into the present westward charge. If it fails, they will know that there can be no rallying from the disaster. They must demand the cessation of hostilities by their government. The end of the war may now be in sight. That end, however, can only be brought closer by immense sacrifices—sacrifices the mere contemplation of which makes our hearts stand still with dread.

Rich Polk Farmer Didn't Know What Liberty Bonds Are.

George Kimball, wealthy farmer residing a half mile north of Highland Park, was arrested by secret service men yesterday after he had refused to buy Liberty Bonds. When taken to the federal building, Kimball explained that he did not know what Liberty Bonds were. Accompanied by federal agents, he visited a bank and purchased \$1,000 worth and was released.—Des Moines Capital.

An invitation to men who farm

THERE isn't any class of people who are considered more hospitable than you men on the farm.

When we invite you to come here to see our Hart Schaffner & Marx Spring Clothes we have that in mind. We want to make you feel as welcome as you do the people who come to see you.

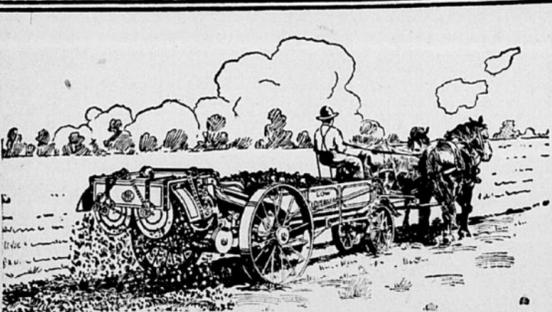

It isn't an idea to get you here just to sell you something. There's a bigger idea. We want to serve you. We earnestly believe we can save money for you on clothes and we want to show you how.

The clothes we have here are made in your interest by the greatest of all clothes makers. They're all-wool; right in style, fit and price. There are sizes, styles and patterns for every taste and every figure.

Next time you're in town come in and see them. We're as glad to "show" the goods as we are to "sell" them.

Patriotism That Pays

EVERY farmer wants to produce all he can this year. Many farmers cannot plant more acres, but every farmer can increase the yield from every acre he plants, by the proper use of a Low Cloverleaf manure spreader. Gains of 25 to 35 per cent are not unusual from soil topdressed with fresh stable manure spread with a

Low Cloverleaf Manure Spreader

The Low Cloverleaf is a wide spreading, easy running, light draft, narrow box spreader, made in three handy sizes—small, medium and large. The wide spreading device catches the manure as it comes from the beater, breaks it up into finer particles, and throws it out beyond the wheel tracks in a wide, even spread. This is the kind of fertilizing recommended by all the authorities.

The entire load is spread in 3 to 5 minutes. The machine runs easily and lasts a long time because the working parts are all securely fastened to a sturdy steel frame which keeps them in place and in line.

The Low Cloverleaf spreader is backed by International Harvester reputation for quality machines. It does the work as it should be done. This year of all years, you should have a good manure spreader and you will profit most by using a Low Cloverleaf. Immediate delivery. Place your order now.

BOWSHER & BOWSHER

Try this recipe for Crullers and Doughnuts—you can help save the Nation's fats when you use Mazola for deep frying

MAZOLA

Mazola is a vegetable oil—pressed from corn.

It is the ideal medium for deep frying, sautéing, or shortening, because it is not only economical—it gives such splendid quality.

Crullers and Doughnuts

- 3/4 cups bread flour, 2 eggs, 1 cup sugar, 1/4 teaspoon salt and ginger, 1 cup sour milk, 1/4 teaspoon nutmeg and cinnamon, 2 tablespoons Mazola, 1/2 to 2/3 teaspoon baking soda.

Mix all dry ingredients except soda 3 times. Beat eggs, add milk, sugar and Mazola, pour on dry ingredients. Mix well, turn on floured board, roll or pat in 1/2 inch sheet and let stand a few minutes to rise. Cut and fry in hot Mazola.

Get Mazola from your grocer in pint, quart, half-gallon or gallon tins. And ask for the free Mazola Book of Recipes, or write us direct.

Your money refunded if Mazola does not give entire satisfaction.
