

A Voice From Sioux City, Iowa, says

# PE-RU-NA

Worth Its Weight In Gold

You cannot mistake the words of Mr. W. W. Northrup, of 908 Fourth Street, Sioux City, Iowa. He is enthusiastic about his present health and the merits of PE-RU-NA and wants everyone to know it. Here is a recent letter from him:—

"PE-RU-NA is worth its weight in gold and then some. I used to think it only a woman's remedy but have changed my mind. I had a cough, especially in the morning. After using half a bottle of PE-RU-NA was much better. I would cough up chunks of phlegm and mucus, my eyes itched and bothered me. Judging from the symptoms given in your almanac it was catarrh. My stomach is in much better condition since using your medicine."

"Use this testimonial, if you wish. Don't hesitate to advertise the merits of PE-RU-NA."  
(Signed) W. W. NORTHROP.

There are thousands just like Mr. Northrup, skeptical at first but convinced by a trial of PE-RU-NA.

**DON'T BE AN UNBELIEVER.**

If your trouble is of a catarrhal nature, try PE-RU-NA, then tell your friends. It is fine after an attack of grip or Spanish Flu.

**Sold Everywhere Tablets or Liquid**  
FOR CATARRH AND CATARRHAL CONDITIONS

Mr. Tommie Beavers spent Sunday with his parents at Woodland.

# The Gasoline Problem

THE grave problem confronting the serious-minded men in the petroleum industry today, is to keep pace in production with the seven-league strides of the demand for gasoline.

In ten years the production of crude oil in the United States has increased only 96 per cent, while during the same period the output of gasoline has increased 560 per cent.

The demand for no other commodity in general use has increased to a degree that even approximates the mark reached by gasoline.

In ten years the Standard Oil Company (Indiana) has increased its output of gasoline from 150 million gallons to more than 600 million gallons a years.

It is apparent that this could not have been accomplished except by intensive application of improved, scientific methods of refining.

As a matter of fact, the price of gasoline is held in bounds only by the sheer force of science.

Except for the ability of such institutions as the Standard Oil Company (Indiana) to make a wide range of useful products from that part of the crude oil which is not used to make gasoline, you would be paying a much higher price for gasoline than you pay today.

The Standard Oil Company (Indiana) is bending every effort to increase its output of gasoline to meet the demands and to sell it to you at as low a price as possible.

"I Know That's Good Advice!"

"I used to buy white salt blocks for my stock because I thought they were best. But one day a neighbor convinced me I was all wrong. He told me Western Rock-Salt-Block were really the best blocks produced, because they were 98% pure salt. He said, 'Put it up to the animals themselves. Let 'em have their choice of white salt or gray rock salt. Being guided only by instinct, and not by selling talks, they will choose the salt that's best for them.'"

"I made this test—and the cattle chose Western Rock-Salt-Block! Since then I've kept Western Block in front of my stock all the time. They thrive on it, and have a higher market value. At the same time, I've cut my salt bill, because Western Rock-Salt-Block lasts much longer."

Western Rock-Salt-Block are made of clean, wholesome, finely-crushed rock salt, pressed into 50 lb. blocks under tremendous pressure. Will not chip or crack; unaffected by rain.
