**SCREEN YOUR PORCHES**

You know and appreciate the value of door screens and window screens, but have you considered how very comfortable the porch would be this summer if screened?

Call and let us explain the value of the different kinds of screen wire, such as the black, the galvanized, the bronzed.

By the way, bronze wire is becoming more and more popular. The price is lower than ever before by almost half. The copper wire cloth lasts indefinitely as it never rusts under any circumstances.

Miss Nadine McClung, who has been teaching at Lapier Cedar Rapids returned home the last of the week for her summer vacation. She was accompanied by Miss Jeanetta Burns who recently went to visit her from here. There was a work train here last week putting ballast on the road bed where it needed it, there being several places where the track was not in good condition. The water tank at the depot sprung a leak one evening last week and the water all ran out. This tank was put up in 1901 and has been repaired several times and has leaked considerably the past few years. The water service men were here and condemned it and it is quite

likely there will be a new tank built, if one can be secured, the water service men saying that material to make a tank now is hard to get. Another proposition is up that may do away with the water system here and that a water crane might be put in at Humeston for the Chariton branch trains. **Merit That Makes Mileage  
—In Tires for the Smaller Cars**

Such extraordinary competence and carefulness as are characteristic of all Goodyear manufacture likewise characterize Goodyear's building of tires for the smaller cars.

Only very unusual experience and endeavor make possible the high relative value built into the 30x3-, 30x3½-, and 31 x 4-inch Goodyear Tires in our Plant No. 2, the world's largest factory devoted to these sizes.

In addition to the larger sizes Goodyear builds, a daily production averaging 20,000 tires of these smaller sizes alone makes them easily available, regardless of the big demand, to owners of Ford, Chevrolet, Dort, Maxwell, and other cars taking these sizes.

If you are one of these owners, go to the nearest Goodyear Service Station Dealer for these tires, and for Goodyear Heavy Tourist Tubes. He carries a stock.

30x3½ Goodyear Double-Cure Fabric, All-Weather Tread..... **\$2350**

30x3½ Goodyear Single-Cure Fabric, Anti-Skid Tread..... **\$2150**

Goodyear Heavy Tourist Tubes are thick, strong tubes that reinforce casings properly. Why risk a good casing with a cheap tube? Goodyear Heavy Tourist Tubes cost little more than tubes of less merit. 30x3½ size in water— **\$450** proof bag
