Admission 5 and 10 cents.

New Hot Dog Law.

NEW YORK, April 25.—No more can the "hot dog" vendor juggle his wares with bare hands. The Coney Island board of health has ruled that from now on the "dogs" must be "handled with gloves."

Heard Caruso Sing.

ATLANTA, Ga., April 25.—Miss Helen Keller, deaf and blind "hearer" Caruso sing the "Flament of Samson" by placing her fingers on his throat and lips and thereby receiving the vibrations.

## BELL-ANS

Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

# KEOKUK ELECTRO METALS COMPANY

Announcement Concerning New Keokuk Industry in Current Issue of Reactions, Eastern Metals Magazine.

## ARE EXCLUSIVE AGENTS

Goldschmidt Thermit Company to Have Charge of Sales End of Industry—Promise of Success.

The magazine, Reactions, published by the Goldschmidt Thermit company of New York, contains an announcement concerning the Electro Metals company, which will be of interest to local people. There is only one other plant like the Keokuk company in the United States. The Goldschmidt company has been appointed exclusive selling agent for the Keokuk Electro Metals company. The announcement is taken verbatim from the current issue of Reactions:

We feel sure that many of our readers will be interested in knowing that the Goldschmidt Thermit company have now completed arrangements enabling them to add electric furnace fifty per cent ferro-silicon to the extensive line of metals and alloys which they supply. They have been appointed exclusive representatives and sales agents for the Keokuk Electro Metals company at Keokuk, Iowa. This concern put into operation in April a new electric furnace plant located at Keokuk and they will therefore be in an exceptionally strong position to supply the large steel plants in the middle west. Their production for the present will be about 2,000 to 3,000 tons yearly of fifty per cent ferro-silicon, which should be of particular interest to manufacturers of basic steel.

The officers of the Keokuk Electro Metals company are also officers of the Otis Elevator company. At the present time fifty per cent ferro-silicon is produced by one large company in the United States as well as by several concerns in Canada. Before the war the alloy was imported from abroad on quite a large scale, principally from the Scandinavian sources, but his business has, of course, been practically discontinued on account of the difficult shipping situation. While steel makers may use high silicon pig iron, by far the largest tonnage of the silicon is consumed in the form of fifty per cent alloy, as this is extremely soluble and does not tend to disintegrate in transit.

On account of the present scarcity of the alloy and the high price, we feel sure it will be welcome news to steel manufacturers that a new and promising company has entered this field. As the Goldschmidt Thermit company is the exclusive selling representative, all letters and inquiries should be addressed direct to its New York office.

## ENTRENCHED IN MEXICO

(Continued from page 1.)

ing of a movement of the bandit back toward the north.

It was indicated that practically the same line of communications will be maintained, but that the line will be shortened.

General Pershing's columns are supplied for staying in Mexico until May 15, latest war department reports showed today. Since receipt of messages, however, Pershing probably has received additional supplies, it was officially announced.

The president was advised the Seventh Infantry minus the Second battalion had crossed the border at Columbus yesterday.

## An Easter Attack.

(By H. D. Jacobs, United Press Staff Correspondent.)

GENERAL PERSHING'S HEADQUARTERS NEAR NAMIQUIPA, Mexico, April 25.—(Wireless to Columbus, N. M.)—Reports from the advanced American base near San Antonio, Mexico, received here today, told of the destruction near Chihuahua of one aeroplane, slightly injuring Aviator Willis, and of an Easter attack upon a supply train in which a Mexican was wounded.

The Mexican was treated at the American camp, but would give no information regarding the attacking party.

Spontaneous sniping continues to be reported along the communication lines south of Namiquipa. The small bands scatter when fired on by the motor truck guards. So far, the expeditionary forces have escaped any injury from the snipers and the supplies have not been damaged.

Fabio Lopez, who is one of Villa's chief colonels, is reported a Carranza prisoner. One unconfirmed rumor stated Lopez died of his wounds.

A sample of the rumors constantly reaching headquarters was brought by a motor train which reported halting at the Boca Grandes camp for a considerable time when it heard that several thousand Carranza soldiers with twenty-six field guns were moving rapidly from the west toward the Am-

## erican communication lines.

This motor train made the 240 miles from Columbus to Namiquipa in three days, a new record.

## Six Sentenced to Hang.

DEMING, N. M., April 25.—The six Villistas convicted of taking part in the Columbus raid and sentenced to die by hanging were taken to the Santa Fe state prison today for safe keeping. Deming and Columbus officials feared a Mexican plot to rescue the men. The lawyers defending the Villistas announced that an appeal to the state supreme court would be taken, automatically suspending the death sentences for sixty days, from May 19, the date fixed by the court.

## To Shatter Banditry.

(By Carl D. Groat, United Press Staff Correspondent.)

WASHINGTON, April 25.—Definite results are anticipated here today from the forthcoming conference between General Scott and General Obregon at Juarez.

Clothed with almost a diplomat's powers, General Scott will endeavor to develop a spirit of greater accord between the two governments. He will explain the American aims in Mexico and seek to dissipate any idea that the Villa hunt is intended to do other than shatter banditry through northern Mexico.

Officials believe he will be able to still any new demands for withdrawal of American forces before their mission is accomplished. Pending his mission with a view to securing agreement on Carranza's suggestion for withdrawal are in abeyance. Meantime Carranza probably will refrain from renewing his suggestions.

"Redepositions" of American troops should begin in a day or two in accord of the new program of the war department.

Belief grows here that the bulk of the advanced forces will retire to the west of Parral, thus avoiding danger of further clashes with Carranzistas or civilians. At the same time the work of breaking up Villa's bands will continue.

Felix Diaz's operations in Mexico, coupled with a depressed condition of the Carranza fiat money, is secretly giving officials concern. They say Diaz's revolution plans may mean the overthrow of Carranza's regime and a return to the old scientific rule under which Mexico was burdened for generations.

## Funston to Take Part.

SAN ANTONIO, Texas, April 25.—General Funston today was expected to accompany Chief of Staff Scott to the conference with War Minister Obregon of Mexico. The orders were believed to have come from the war department, directing Funston's presence at the discussion of Mexican affairs in which Scott is expected to explain the friendly intentions of the punitive expedition.

Funston believed the meeting would be held at El Paso, probably with another representative of the defacto government accompanying Obregon. The scene of the conference had not been selected definitely, the general said, but the two American army heads do not expect to leave headquarters until Thursday at the earliest.

Pending the developments of the meeting, Funston today dispatched instructions to General Pershing and other commanders in Mexico to minimize interference with supply shipments by railroad to the troops. Carranzista forces have held up carloads of provisions and forage, several cars having been seized at Chihuahua City, according to reports, under orders from the defacto government.

Pershing today gave further details of the fighting between Major Howze's detachment and supposed Carranzistas in the region of La Borgia while two companies and aviator another of the Carranzistas were drawn up to begin a charge, by demonstrating the friendliness of the American troops.

Pershing's report also told of Private Eichenberger, having been seen alive after he was reported killed at Parral. Eichenberger preceded the Tompkins forces into the city to announce their coming and was missing when the encounter closed with the Americans entrenched north of the city.

Pershing, believing Eichenberger became unbalanced during the engagement and is wandering helplessly, offered a \$50 reward for his return.

## Villa Located Again.

WASHINGTON, April 25.—Renewed hope of Villa's capture arose today in army circles upon receipt of official dispatches from Consul Letcher at Chihuahua City "reliably" locating the bandit chieftain sixty miles southwest of Satevo and west of Parral.

Virtue Rewarded.

Life: The teacher had told the pupils the story of Washington and his little hatchet, and had then shown them an engraving which depicted two small boys standing in a repentant attitude "explaining things to mother."

The title of the picture was "The Truth Tellers," and the children were asked to write a composition thereon. "This was little Johnnie's effort: "One day mother left me in the house all alone. Pretty soon Tommy Jones came along and said let's go swimming. My mother won't let me. Ah, come on. So went. When mother came back she said what makes your hair so wet. I said mother I cannot tell a lie I went swimming. And she said Johnnie I'm glad you took a bath."

With less than half of its available farming land utilized, the United States produces one-sixth of its corn, one-fourth of its wheat, and a fifth of its cotton.

# Late Market Quotations

## Long Commission Co. Grain Letter.

(Furnished by Long Commission Co., 403 Main, Telephone No. 100.)

CHICAGO, April 25.—Wheat—An early break, due to lower cables was welcomed by local bears and by commission houses, who had resting orders. There was quick recovery from the early loss, and prices throughout the morning ranged well over those of yesterday's close. Bearish factors seemed to have been well discounted. The influences which helped prices advance were a better cash demand for all grades, renewed complaints of damage to the growing crop, and further confirmation of late seeding in our northwest and Canada. The outstanding factor in the wheat situation is, that despite the political complications prices are very little lower than before the beginning of the political crisis. It should be kept in mind that prospects for over production this year are light and below the average annual consumption will doubtless be equal if not greater than that of the preceding year.

Corn—The corn situation keeps baffling, despite the facts that the cash interests are good buyers of the May delivery which has strong effects of other months. Shippers report a limited demand and difficulty in securing cars to move previous sales, on the other hand the seaboard is apparently getting liberal receipts, for clearances from time to time are large. It would seem advisable to await the volume of delivery on May contracts before taking the buying side.

Oats—The situation in oats keeps much the same as it has been for the last few days. Scattered selling of May by tired holders and the buying of the July by cash interests constitute the bulk of the trade. The cash demands are good.

Grain Review.

CHICAGO, April 25.—Strength in northwest markets and light offerings overcame an early break in wheat today and the market ruled higher. May sold at 112½; July at 113¼, up 1, and September at 111½, up 1¼. Corn was fairly firm and steady. May ruled around 75½; July at 76¼, and September at 75½.

Oats drew firmness from other grains. May was steady at 44½; July at 42½, and September at 43. Provisions were higher on a higher hog market.

Chicago Estimates for Tomorrow.

(Furnished by Long Commission Co., 403 Main, Telephone No. 100.)

Hogs, 25,000; cattle, 14,000; sheep, 18,000; wheat, 119; corn, 158; oats, 168.

Liverpool Close.

Wheat, unchanged to 5 lower; corn, ½ to 1 higher.

Clearances.

Stock Market Notes.

NEW YORK, April 25.—Prices continued their upward movement on the stock exchange at the opening today.

United States Steel opened at 53¼, a gain of ¼. Westinghouse was up ¼ at 56½, and Mexican Petroleum and Utah Copper gained a point each.

Gains of ½ to ¾ were general among the top stocks. Marine preferred was up ¾ at 88.

Traders took a more optimistic view of the Berlin situation. The more cheerful spirit among traders was reflected in a steady climb in prices during the morning and sales of more than half a million shares, 335,000 shares of which were turned over during the opening hour.

United States Steel touched 54, Marine preferred sold as high as 83½; Crucible at 83¼ and Baldwin at 90½. Prices were slightly under the best at noon.
