LONG NIGHTS DRAIN BATTERIES

These long nights and cool days when starting is so slow, put a tremendous strain on your car's Storage Battery—so it would be a wise move on your part to have us give your battery a "tonic" charge now and then and to also have us inspect and water the battery regularly.

Batteries are often seriously injured by putting too large a load on them when they are run down—avoid the danger by coming to us regularly.

It saves you the trouble of heating irons on the stove and does away with the irksome task of carrying irons to and from your ironing board.
