FRIDAY, JUNE 13, 1913

BY MEAD PUBLISHING CO

Official Paper of City and County

Issued on Friday of Each Week.

Washington Correspondence.

The three Democratic Congressmen from Iowa are in favor of keeping Congress in session through the summer and up to the time the regular session opens in December in order to pass President Wilson's currency bill. With the organization of the House completed by the appointment of committees that body is now ready to receive President Wilson's message on the currency question, which is scheduled to be sent this week. The administration bill, which the President, members of his cabinet and Congressional leaders have been working on, then will be introduced and the House will start to work on the measure, which it is expected to pass by the time the Senate is ready to vote on the tariff bill.

President Wilson insists that currency legislation should be enacted at this special session. In a letter to one of the Senate leaders the President said: "This is the time to pass currency legislation and I think we are in a sense bound in loyalty to the country to pass it so that any attempt to create artificial disturbances after the tariff shall have become law may be offset by a free system of credit which will make it possible for men big and little to take care of themselves in business."

In spite of the President's desire it is believed to be doubtful if the slender Democratic majority in the Senate can force through currency legislation at this session. The senate will not be ready to vote on the tariff bill until some time in August, and the strong Republican opposition, not only to the tariff, but to the currency legislation, may prevent action on the latter though President Wilson and some of the Democratic leaders have expressed their willingness to forego vacations this year and stay through the dog days to pass the currency measure as a companion act to the tariff bill.

There is no doubt whatever that the tariff bill will pass the Senate at the present session, and Senate leaders insist it will pass in substantially the same form in which it went through the House, with provisions for free sugar in three years and free raw wool included. The bill is now in the hands of subcommittees from which it is expected to be reported to the full finance committee by the first of next week. It is believed that the bill will be reported to the Senate about June 23.

Congressman Pepper of the Second Iowa district was intensely interested in the charges made against Frank H. Hitchcock, the former Postmaster General, by a committee on postal inquiry composed of Postmaster General Burleson and four assistant postmasters general, as Congressman Pepper has just been made chairman of the committee on expenditures in the post-office department, which will investigate these charges if they are brought before congress. Postmaster General Burleson and his aide charge Hitchcock, as Postmaster General, during the Taft administration made misleading reports involving almost a million dollars, that he withheld promotions, allowed vacancies to go unfilled to the detriment of the service, and made a deficit of \$750,000 appear to be a surplus of \$200,000 by "unjustifiable bookkeeping methods." Postmaster General Burleson had heard so much about that \$200,000 surplus that, when he took the office, he was surprised to find that there not only was no surplus, but a big deficit. The report he has just made throws another light on the "economy" program which, in the absence of anything else to boast of, was made much of by the Taft administration.

Congressman Pepper has reason to consider himself extremely fortunate in landing the chairmanship of the postal expenditures committee, as it is one of the few cases on record where a second term has won a chairmanship, and the only case on record, so far as the records at hand show, where an Iowa democratic member has had a chairmanship. Congressman Connolly of the Third Iowa district was slated for a position on either the military affairs or currency committee, either of which carries with it a position of power. Congressman Kirkpatrick, the Democratic member from the sixth district, concentrated his efforts on the invalid pension committee, which he was particularly anxious to land on as he himself is a veteran.

Members of the Senate who have been voting for a high protective tariff in the past will be called upon to answer embarrassing questions this week when they are summoned as witnesses before the committee investigating President Wilson's charges that an insidious lobby has been at work in Washington to defeat the tariff bill, especially the sugar clause. The Senators will be asked to state under oath whether or not they are financially interested in the manufacture or sale of

THE DOCTORS MEETING.

As members of the Senate are openly associated with various industries they probably will be averse to giving the committee all the information sought. At any rate, no matter what the investigation shows there has been an exodus of lobbyists from Washington. The President says he is prepared to mention names if the Senate asks him to and some of the lobbyists, taking him at his word, have departed quietly, hoping that thereby the investigation may be dropped.

Flag Day Will be Drag Day.

The state highway commission has designated Saturday, June 14, which is a day of national observance as "Flag Day," to be also a day of state wide observance as "Drag Day." Every town in Iowa is urged to offer prizes to every farmer who will come to that town that day, driving a road drag. The Commercial clubs are urged to take the matter up and arrange for prizes to be offered. The drags to draw prizes for their owners should be decorated with flags, in order to preserve the appropriateness of the "Flag Day" side of the affair. This drag day plan has been a great success at many towns in Iowa, and now that the state highway commission has made it a state-wide affair and joined it to Flag day, observance of it should prove a great practical benefit to the good roads movement.

Meyer to be Postmaster.

On May 27th, president Wilson sent to the United States senate the nomination of Jacob Meyer to be postmaster at Calmar, Iowa.

In due course Mr. Meyer will be confirmed by the senate and will succeed postmaster Evanson, whose term expired last December.

Mr. Meyer is the senior member of the firm of Meyer & Co., who deal in grain, cattle, hogs, etc., on an extensive scale. His son is G. A. Meyer, chairman of the board of supervisors and Democratic nominee for congress. The postmaster to be is mayor of Calmar and one of the town's most respected citizens. He is a good business man and without doubt will be a good postmaster.—Iocora Journal.

Postville Gets New Depot.

The Milwaukee company will erect a fine new depot in Postville this season, which certainly will be appreciated by a long-suffering public. The present structure has been here since the road first came through and has long since outlived both its usefulness and its beauty. The new one will probably be of brick, electric lighted, have separate waiting rooms for men and women, inside toilets, and be equipped modern and sanitary throughout. And the old plank platform will be supplanted by one of cement or brick. The Milwaukee is to be congratulated for what it purposes doing for Postville.

K. C. Council at New Hampton.

The local Knights of Columbus, nearly fifty in number, have made a move to secure a council in this city and are daily expecting a charter which will authorize the same. The place of meeting for the present will be in the Foresters' hall and the new council will initiate a class on June 15. Arrangements are now under way to make the first initiation a memorable one for knighthood in this community.—New Hampton Tribune.

\$100 REWARD, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: Sold by Druggists, price 75c. Take Hall's Family Pills for constipation.

F. J. CHENEY & CO., Toledo, O.

Children Cry FOR FLETCHER'S CASTORIA CAN YOU DOUBT IT

When the Proof Can Be So Easily Investigated.

When so many grateful citizens of Cresco testify to benefit derived from Doan's Kidney Pills, can you doubt the evidence? The proof is not far away—it is almost at your door. Read what a resident of Cresco says about Doan's Kidney Pills. Can you demand more convincing testimony?

Mrs. John Light, of Cresco, Iowa, says: "For years I suffered from kidney complaint and rheumatic pains in my loins and limbs. The kidney secretions were unnatural, at one time my limbs became so badly swollen that I was unable to put on my shoes. I tried various remedies, but became discouraged, as nothing helped me. After taking Doan's Kidney Pills, I felt better in a short time. I can now rest well and my kidneys are normal. I do not believe I would be alive today had it not been for Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

THE APPLE LEAF HOPPER

By R. L. WEBSTER, Assistant State Entomologist, Iowa State College.

The apple leaf-hopper is a tiny, active greenish insect which injures nursery stock, especially apple trees, by curling up the tender leaves and thereby stunting the growth. Occasionally this insect causes serious damage to potato plants.

The leaf-hoppers are very small in their younger stages, and even the old insects are only about an eighth of an inch long. The old hoppers have wings, and are very active, sometimes flying up in clouds from badly infested trees when they are disturbed.

In Iowa the young hoppers are especially common on nursery stock four times during the season; in the latter part of May, June, July and August, when the different generations appear. The curling of the leaves does not appear until June.

Spraying infested stock does not seem to be practicable, since the curled leaves make it so difficult to hit the insects which are on the under sides. Trapping the hoppers on stick shields is only partly successful. This should be done when the old hoppers are most common, and when there are favorable wind conditions.

The selection of a treatment for nursery stock against the apple leaf-hopper is a difficult problem. Any of the measures that are known will allow some proportion of the insects to escape, depending upon the treatment itself, the care with which it is made, the time the work is done, as well as upon other factors.

So far as the leaf-hoppers that are actually on a tree at a given time are concerned, dipping would kill practically all of them. If the dipping is done when the hoppers are hatching out rapidly, however, one may go over the dipped rows the next day and find young nymphs that have hatched out over night.

In some cases it may be unnecessary to treat trees. Certain varieties such as Northwestern Greening, Iowa Beauty and some others, which are never seriously injured, would not be much benefited by dipping. However, on varieties which are more affected, and where it is desired to have strong growth, undoubtedly the dipping would keep the hoppers down so that the trees would be benefited greatly. The older trees might be left untreated, since they are less likely to be injured seriously.

These doctors with the doctors at home spent a very profitable afternoon. The election of officers resulted as follows:

Dr. Kessel, President.
Dr. Johnston, Vice-President.
Dr. Hess, Secretary and Treasurer.
Drs. McLean, Gardner and Walker, Censors.

After this the party succeeded in doing justice to a very tasty, light supper prepared by Mrs. Palmer at the Palmer cafe, and furnished by the Cresco doctors, going home feeling well repaid for their afternoon's work.

EXPERIENCE OF MOTHERHOOD

Advice to Expectant Mothers

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism unfitted for the trial of strength, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under the right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women will persist in going blindly to the trial.

Every woman at this time should rely upon Lydia E. Pinkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

YOUNG LEAF-HOPPER NYMPH.

stick shields is only partly successful. This should be done when the old hoppers are most common, and when there are favorable wind conditions.

The selection of a treatment for nursery stock against the apple leaf-hopper is a difficult problem. Any of the measures that are known will allow some proportion of the insects to escape, depending upon the treatment itself, the care with which it is made, the time the work is done, as well as upon other factors.
