HOW A SCHOOL BANK WORKS

Savings System in Eastern Institution Results in \$50,000 Deposits, Averaging Weekly More Than \$140.

Twelve years ago a New England school principal called a meeting of the mothers and fathers in his district, and proposed that they help their youngsters and himself start a school savings bank. If children were to patronize such an institution, they would have to have money, and he suggested that parents help them earn money by their own labor. He told them that the bank was to be part of school training, teaching thrift, industry, prudence and wisdom.

Today this school savings bank, in the Henry Barnard school, Hartford, Conn., has deposits of more than \$50,000. The average weekly deposit during twelve years has been more than \$140. The largest deposit by any child since the opening of the bank is \$1,480, and the smallest less than \$1.

Operation of this bank is simple. Solon P. Davis, the school principal, describes it: Deposits are received every Monday morning during the first half-hour of school. The pupils of the eighth grade act as tellers, each being assigned to a given room. Each child is provided with a pass book in which his deposits are entered by the teller.

Deposits are made at the teacher's desk, in the presence of the teacher and the teller, who enters them in his roll book. The teacher and teller then verify all deposits and place them in an envelope, which the teller delivers to the school secretary, who compares roll book and envelope, verifying the items. The envelopes are then forwarded to the Hartford Society for Savings, where the accounts of the school are pledged.

At interest periods, December, March and June, the roll books are examined by the secretary, and a personal account is opened at the Society for Savings for each pupil who has \$2 in the school bank. After this, at these periods, all amounts of \$1 or more, standing to his credit on a pupil's school deposit book, are added to his personal account. If any pupil wishes to withdraw his money a written statement from the parent or the parent's personal application is required.

Catarrrhal Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced, and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c. **F. J. CHENEY & CO., Toledo, O.**

Thousands of People Sent Packages of Allen's-Foot-Ease to their sons, brothers or sweethearts in the army and navy, because they knew from experience, that it would freshen and rest the feet, make their shoes comfortable and walking easy. Those who use Allen's-Foot-Ease have solved their foot troubles.

W. H. TILLSON.

Ford
THE UNIVERSAL CAR

The Ford One Ton Truck may well be classed as an agricultural necessary, it fits into and fills so many wants on the farm. It is a reliable bearer of farm burdens, not only doing the work of several horses quicker and better than the horse, and does not "eat its head off" when not working. The aggressive farmer has only to consider the possibilities of the Ford Truck and he is ready to buy one. We judge this to be so from the way farmers are buying them. Truck Chassis \$550 f. o. b. Detroit.
