Official Paper of the City and County

Issued on Friday of Each Week.

Entered at the Post Office at Cresco, Iowa, as second class mail matter

HIGH SCHOOL NOTES.

Cecyle Bradley, Editor-in-Chief.

Advice.

Remember when duty calls; It never pays to shirk You're dodging opportunity When you're dodging work.

A Noble Ambition.

Father: "Son, your school report shows a lot of very low marks. How about it?"

Son: "Well, you see dad everything is so high now days, I thought it was time some items were marked down."

The 9th period session at 4:15 is very much preferred to the other periods of the day. At least there were a large number of pupils who attended Thursday—charter members of the Conversation Club.

Wednesday Cresco defeated Nashua in football by a large score 46 to 0. It was received joyfully for that is another step towards our goal. Chas. Powers made the first touch down and he kept up the good playing until the game ended. When the first half was up, the score was 20 to 0. The boys played just as good the second half and we had our subs in at that.

Miss Sillman, while examining Dauby's throat: "Do you smoke?" Dauby: "Just a little bit."

Wanted—Some one to scrub my desk. I'm too busy talking to Violet. Wink.

In the Assembly Room we sit, And scarcely dare to move a bit, For fear our names will be put down For whispering and turning around.

Papers! Papers! Times and Evening Posts. Details of the Cox and Harding votes.

Themes, themes, all week long, Themes, themes, fast and strong. Why are there so many, themes to write

Is it some Sophomore student for to spite? Or is it just the ordinary grind To all C. H. S. kid's mind?

Bruce: "Love goes where it is sent."

Gertrude: "And sometimes it makes a round trip."

The Boys and Girls Glee Clubs are planning on giving a concert sometime before Xmas.

In Geometry Miss Ziesenis was explaining to the class a problem, and was using the figure of a tent, so the problem could be made more clear. She had asked several questions about the tent and when she said to Leonard:

"How many people can you get in this place with their heads touching?"

Leonard: "Why two of course. How many more would you want to put in?"

In English Class writing H. S. notes: Donald L.: "What are you writing, Mac?"

Paul: "Lord knows, I don't."

Miss Ziesenis: "I am trying to teach you people that the longest way round is—"

Craig (interrupting): "The sweetest way home."

Miss Clemmer (to the tardy Donald): "Where have you been?"

Dauby: "To the cemetery."

Miss Clemmer: "Any dead?"

Dauby: "Sure. All of um."

Tommy: "Boots, how do you expect to get to heaven?"

Boots: "That's easy. When I die I'll go up to heaven and monkey with the gates and St. Peter will say, 'For goodness sakes, Boots, either come in or stay out.' Then I'll go in."

Tommy: "Aw pahaw! I'll take a fence ticket."

Teacher: "How do they get the water in the water melon?"

George: "They plant the seed in the spring."

Our desks were scrubbed. Very hard we rubbed, From Wednesday until Friday And if you write On the desks some night, Your punishment will come some day.

CAPTAIN THOMAS HOOPER.

Life Sketch of Veteran Pioneer in Michigan Copper Mining.

The following sketch of the life of Capt. Hooper was written by an old friend and associate of the deceased and published originally in the Mining Gazette of Houghton, Mich.

Captain Thomas Hooper, a real pioneer of the Copper Country and one of its veteran mining men, died Thursday at Victoria. Capt. Hooper, who was 78 years of age, spent the greater part of an active lifetime in the Copper Country and his life was intimately connected with the development of the district's basic industry.

The remains were taken to his old home in Cresco, Ia., Friday, and the funeral was held there Sunday under the auspices of the Masonic order to which he belonged.

Capt. Thomas Hooper was born at Chasewater, Cornwall, England, on the first day of March, 1842. He came to the United States in 1859, and commenced his career as a mining man at the Quincy mine, Houghton county, Michigan, working as a miner.

He then went to Ontonagon county and worked in the Rockland group of mines. It was at the National mine that he took his first contract sinking a shaft when he was 20 years old. He was married at Rockland the Fourth of July, 1862, to Miss Henrietta H. Furman. They celebrated their golden wedding at the Victoria mine, July 4, 1912. His wife passed away at Cresco, Iowa, three years ago.

He accepted a situation at the Champion iron mine, as mining captain, and remained there one year. From there he came to the Union mines, Ontonagon county, Carp Lake township as timberman and remained there as caretaker until appointed superintendent of the Ontonagon Silver mine in 1873. In 1874 he accepted a position as superintendent of the Nonesuch copper mine. In 1875 he leased the Nonesuch for seven years. He built a stamp mill there and tramway to Lake Superior, and engaged actively in the mining and production of copper. In 1881 he sold his lease to the Nonesuch Mining syndicate, and remained at the Nonesuch as agent until 1883. In 1881 in connection with Byron N. White, and Charles A. Parker, he opened up the White Pine mine, took out the first cooper and shipped it.

In 1883, he moved his family from the Nonesuch, and took up his residence in Ontonagon. That same year he accepted the position as agent for the Michigan State Quarry company, at the "Arvon" near Baraga, Michigan. He remained there for five years. In 1888 he went to Port Arthur, Canada, as agent for the Beaver Silver Mining company. In 1893 he removed to Cresco, Iowa, near where he had a large farm and in 1899 he was appointed as agent for the Victoria Copper mining company, which position he held for seven years, when he resigned and his oldest son, George, succeeded him as agent.

During his stewardship at the Victoria, Capt. Hooper was instrumental in installing the compressed air plant, which is one of the wonders of the mining world. He laid out the underground workings, had all machinery installed, had all necessary buildings erected, including a sawmill, and houses for the benefit of the workers at the mine, and their families, and put the location in a first class mining condition. After resigning from the Victoria in 1906, he went to Goldfield, Nevada, as superintendent of the Goldfield Mines syndicate, and spent the ensuing years inspecting and examining mineral properties all over the mineral zone of the United States, also in Mexico. A few years ago he retired from active work to his home in Cresco, Iowa, coming to Lake Superior and spending his summers among his children.

Captain Hooper is survived by one sister who still lives in England, one daughter, Mrs. Jamse Craig, of Greenland, and five sons, George and Charles of Victoria mine, James of Jarbridge, Nevada, Thomas and Stanley of Cresco, Iowa, 20 grandchildren and nine great grandchildren. He always took active interest in county politics and served four years on the board of supervisors.

He was raised to the sublime degree of a Master Mason at Rockland, 58 years ago. He was a member of Montrose commandery, Calumet, and took the Scottish Rites degrees at Grand Rapids, Mich.

He died at 6 a. m., on the 28th day of October, 1920. He had at no time been confined to the house, and the evening before he enjoyed himself with some of his family and friends until after 11 p. m., and retired feeling well and cheerful.

"Capt. Hooper was the last of the old line of mining men of the early days," a friend of 60 years says in a letter to the Gazette. "A man—that sums up his character. He was a self-educated mining man and a practical one. His schooling and know-

ledge of mining was gained thru contact with actual work and the knowledge received was crammed into him thru practice. He was a man of rugged constitution, one well fitted for the pioneer's life of the early days.

"Now he has left his children to mourn his loss, and a few surviving friends, while he has started out, over the last trail, and will make his last portage to that undiscovered and unknown country—to that house not made with hands, still pioneering, still exploring and prospecting the unknown. May his quest not be in vain; may he find the precious jewel in eternal life. And I believe he will."

RESOLUTIONS.

Whereas, It has pleased the great Architect of the Universe to remove from our midst our well beloved Brother, Capt. Thomas J. Hooper, and whereas in his death his Masonic Brethren and the community at large suffer a great loss; It is therefore

Resolved by Cresco Lodge No. 150 A. F. & A. M. that while we bow with humble submission to the Host High, we do not the less mourn the death of our esteemed Brother.

Resolved, That in the death of Capt. Hooper this lodge laments the loss of a Brother who was ever ready with aid and sympathy for those in need of distress, a most honorable upright citizen beloved by all with whom he came in contact.

Resolved, That the heartfelt sympathy of this lodge be extended to the family in their hour of affliction.

Resolved, That these resolutions be spread upon the records of this lodge and copies delivered the family and furnished our city papers for publication.

Are You Sick!

If you lack strength and vitality, are weak, run down and suffer with aches and pains, or perhaps a serious malady has fastened itself upon you, there is a CAUSE. What and where is that cause? Here is what several famous medical physicians say about it:

"Back of disease lies a cause and THAT CAUSE NO DRUG CAN REACH. We know there is a cause of disease, but we do not work on it."—S. Wier Mitchell, M. D.

"The spine has more to do than any other factor with the maintenance of health on the one hand, or the establishment of disease on the other."—Alfred Walton, M. D.

"Chiropractic is a scientific mode of adjusting the real cause of disease."—U. A. Lyle, M. D.

"The cause of physical disorders is vertebral subluxation. This cause can be corrected by spinal adjustments given by the trained hands of the skilled Chiropractor."—G. H. Patchen, M. D.

"80 per cent of the population are afflicted with some form of spinal defect; that is the cause of so much NERVOUSNESS, INDIGESTION, HEADACHE, RHEUMATISM, MENTAL WEAKNESS and other GRAVE and DANGEROUS DISEASES."—W. H. Shumley, M. D.

"Most diseases that man suffers from could be prevented if the influence of the spine as a causative factor were recognized."—Alfred Walton, M. D.

Here is something for you to remember: Chiropractic is the ONLY method which locates and permanently removes the real cause of your malady, regardless of where that malady is or what it is. Come to my office and let me show you what this science can do for you. Free consultation.

DODGE BROTHERS MOTOR CAR

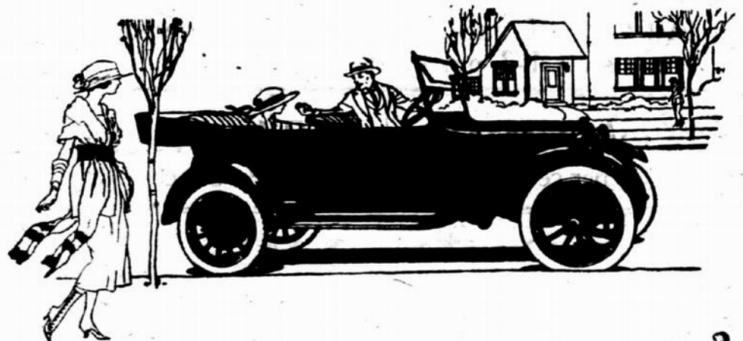

After five years it is possible to say with entire truth that all other considerations are second with Dodge Brothers to the solid satisfaction of the owner of the car.

Dodge Brothers always have pursued and always will pursue this policy, not from any spirit of philanthropy, but because it is in the highest sense of the word good business to do so.

The gasoline consumption is unusually low
The tire mileage is unusually high
