The Primitive Baptists throughout this county held their annual 70th service at the Flat Creek church, three miles from here, last Sunday. As usual the church was too small to accommodate the immense throng. Hundreds of people could not gain admittance. The mode of worship upon these annual occasions to other denominations is peculiar and also interesting. It is this old-time custom, perhaps that attracts these immense crowds. From idle curiosity, no doubt, many drive for miles to this place of worship, only to be compelled on arriving there to spend the day in the shade of the adjoining timber. The number of people on the grounds exceeded that of last year by several hundred, which was due in part to the exceptionally fine weather.

HE WAS TAKEN IN.

An installment pedlar violates Earlington's laws. Skips, is caught and pays damages.

Last week a pedlar by the name of James E. Haab made his appearance in our town and at once proceeded, without leave or license, to take orders for goods. He claimed the goods were not sold here, only the orders being taken, and therefore did not come in conflict with our merchants, and for said reason he should not be required to pay license. Such arguments, however, had no influence with Town Clerk W. F. Burr, who told him he would have to abide by our town ordinance, which strictly required a license to be procured before a sale is made. It is useless to say that Mr. Haab soon saw the force of the argument used against him and paid up his license for three days. Without securing any right to follow his vocation within the limits of Earlington, he continued to sell, but to his sorrow, as the town officers soon had him in their power. He was, upon advice of the firm for whom he works, willing to compromise, which he did by paying a fine of \$5 and costs. He left a wiser, if not a happier, man.

The case against Buddie Harris for procuring liquor for minors, was tried in police court, before a jury, Monday, after having been postponed from the previous day in order to give time, according to the statement of one attorney, to being in a plea of insanity. No evidence was introduced pointing to insanity, and no questions asked on this point, but Buddie swore he was not yet of age, and the attorney for the defense said Buddie was an idiot. the refusal of the company to recognize the labor organization known as the K. of K. No other labor order has been so strongly condemned as said organization in the past few years. If the laborers expect to win the good will of the company, they must strike some of the clauses out of their constitution.

Judging from the number of circulars sent out, in regard to the exhibit to be made by this state at the World's Fair we are inclined to believe that if the leading industry of the state, that of mining, receives its proper notice it will be by and at the expense of the mine owners. If they desire a proper exhibit of the industry the owners will be the most of the work to do.

The smoke nuisance question is solved for all factories using soft coal, if the discovery of Mr. Ludwig Mond, an English manufacturer, proves to be commercially profitable. The smoke from coal is carried into a chamber and washed with water-spray. Every particle of soot is deposited, and the ammonia is all recovered. By promoting free and rapid combustion with an artificial draft, Mr. Mond burns 125 tons to produce a given steam efficiency, where 100 tons would otherwise be needed, and he recovers four tons of sulphate of ammonia, worth in England \$24. At the coal, at five shillings a ton, costs only \$55, the by-product under this process is worth more than the coal. Everyone has, of course, known that smoke is all sheer waste and worth saving, but if saving such as is described in this process, the smoke nuisance is doomed.

We want it understood that we are not seeking social equality, but we object to the separate coach bill because our interpretation of the constitution of the United States differs greatly from the separate coach bill of our State. The constitution of the United States reads as follows in article 4 and section 2: The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States, and let your eyes run along articles until you come to the 14th article, and read it carefully. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States. The constitutional privilege of the way is understood, it is not that the white man shall occupy any particular coach, but on the contrary, he or they are to take any coach or seat that is not occupied by others, by reason of the same fare. Well, the United States constitution reads mightily funny to me, anyway, or it may be I am dumb.

SENATORIAL FIGHTERS.

Shoop and Sanders Have Had Experience with Reader.

The northwest has two senatorial fighters. These are men whose lives have been spent in the wildest parts of the frontier and who have grown strong with fighting among the Indians and desperadoes of the west. He is now at the head of the Indian affairs committee and he has been governor of Idaho and left the executive chair to take his seat in the senate.

Senator Sanders is noted as having rid Montana of the noted gang of ruffians which overran the northwest some years ago. He was at the head of the vigilantes and has a number of times looked death in the face. He has made many a speech in his state with his pistol in his pocket, and while he was speaking pistols have come out before his eyes in the hands of his audience. During the rebellion he was the army as a soldier from Ohio and it was through falling health that he had to resign and go west. In the camp where he settled there was a band of southern sympathizers, and these undertook to keep the stars and stripes from flying the flag in the public square with the idea of raising the stars and bars. As they caught hold of the rope Sanders, who was standing near by, pulled out a revolver and said to them: "No man shall haul that flag down while I live." The mob looked at the flag and at the revolver and into the eyes of the determined young man who held it, and they decided to let the flag stand.

An Irish Girl's Letter.

To the Editor of the Weekly Irish Times—Dear Sir: Words fail to express my gratitude to your printing my poor letter to find a place in your charming paper. If I am not asking too much, or if not too uninteresting to your readers, may I still continue the subject on "What Women Can Do."

A woman can look as sweet as sugar when she feels enough to behead somebody; she can be such excellent friends with a man, while he is doing her hair, that when she later he so that she would be glad if she caught the small-pox, and got her face spunk into the resemblance of a Chinese cabbage. She accepts Jack, and she can spank a baby better than a man. She feels it her right to do it, and a man always goes about it as if he was ashamed of it. She knows exactly where to begin or leave off.

She doesn't go to America or take to drink when Tom goes back on her. She does how many dictionaries he has digested, or how many of them she has read, or how many she can read in six months. There is a spell in woman.

No man, not utterly degraded, can listen without delight to the accents of a guileless heart. Yours, etc. FLORA.
