WOULD DIVORCE SECRET HUSBAND

Married in Evansville 10 Months Ago, Suit Just Now Reveals th Fact.

Chav, Ky., Jan. 21.—Much surprise was occasioned when Ledge Ozart, by her attorneys Baker & Baker and Harris & Blackwell yesterday filed a petition in the Webster circuit court asking for an absolute divorce from Herman Z. Clark.

This is the first intimation that the public has had that the young people were man and wife. The facts seem to be as follows: Some time in the early part of 1910 the young people arranged for a marriage, which fact became known to their parents, who, rather than have them elope, agreed to the union, and accompanied them to Evansville, Ind., on March, 5, where they were married, it being agreed, however, between all the parties that the bride became of her tender years, should remain with her parents for at least a year, and the groom should continue to live at the home of his parents.

Remarkable Record Made by an Old English Steam Engine.

The walking beam engine of an English iron-working establishment speaks eloquently of the thoroughness of the old machine builders. It began work in 1854, with a cylinder of 4 by 8 feet, and a speed of 14 revolutions per minute under a steam pressure of 30 pounds per square inch. In 1898, it was compounded, the pressure being increased to 120 pounds. In 1910 it was found to be still to valuable a servant to retire, and it was converted into a tripple-expansion engine, which now works with steam at a pressure of 200 pounds superheated to 430 degrees. Some years ago the engine "ran away," acquiring such speed as to burst the rope-driver pulleys, yet was very little damaged.
