

WHO IS THIS MAN JOHN H. LAWSON?

WHERE DID HE COME FROM?
WHERE IS HE HEADED FOR?

JOHN H. LAWSON is the man who came to the City of Barbourville some time ago and proceeded to help make the City, Schools, and Churches better by using his money and influence for everybody of them, regardless of its denomination. He came from Brush Creek in Knox County, and here is the house he lived in before he came here.

The Home of Capt. John H. Lawson, the First Three Years of His Married Life.

He came to Barbourville, with his old working clothes on, and as soon as he got here he got busy to build another house. He did his own hauling of the sand, brick and lime and worked hard until the house was completed. He very generously deeded to the Masonic Fraternity the third floor space, and furnished them all the material to build their spacious quarters at actual cost to him and waited on them until they were ready to pay him back his money. He helped the Baptist Institute out of a debt, when the Institution was ready to go into the hands of another, one of the wealthiest men in Knox County who at that time gave them only 48 hours in which to raise the money or the school would be closed. Lawson realizing that about 85% of the teachers was educated at this Institution, could not bear the idea that it should close, so he came to the rescue of the School, and it today is still sending out bright eyed boys and girls into the World, who are making good citizens, and splendid teachers.

Here is the House that Lawson built on the North East Corner of the Public Square, it will stand as a monument to his memory, and a memento of the man that tries to do things for the common good of all.

The Lawson Building and Masonic Temple

Lawson has not stopped at this, he has helped to build every Church and School in the County for the past ten years when called upon to help. There has not been a minute of the time in the past ten years that Lawson was not standing behind the schools and churches of the County helping in any way that he could to have better schools and churches.

Although Lawson is a Baptist, and belongs to that church he has helped others, and when Union College was destroyed by fire, he was called upon twice to assist in the reconstruction of that building and each time he responded liberally.

Off For The Training School.

Last Sunday night some of our best young men left on train No. 21 for camp Benjamin Harrison where they will attend the three month training school for officers of the U. S. Army, among those who went were M. E. Posey, Chief Engineer for the C. & M. Railroad Co; Rev. S. C. Williams, pastor of the M. E. church south; Algin Sims, a musician and Civil Engineer; A. T. Vermillion, formerly a brakeman for the C. & M. Railroad. All these are fine young men and would make good anywhere at most anything, and we make the assertion that they will be given commissions as soon as they are through with the training; and that if they are, they make good men on the field of conflict; yet after all we regret to see them go, as they are our neighbors and friends and we like them.

All The Way Up Smokey.

The gentlemen who took the contract from T. J. Vermillion & Son to construct the road from Barbourville to the mouth of Helton's Fork of Indian Creek, came in from Alabama last Sunday morning with teams, wagons, scrapers, rollers and all the necessary equipment to do real work; they have camped just across the Richland bridge, and are today making the dirt roll up into a real road, and it will soon be that we can go to the famous Dishman Springs without getting down in low speed any part of the way.

A Symbol of Health.

The Pythagorians of Ancient Greece ate simple food, practiced temperance and purity. As a badge they used the five pointed star which they regarded as a symbol of health. Ared five pointed star appears on each package Chamberlain's Tablets, and still fulfills its ancient mission as a symbol of health. If you are troubled with indigestion biliousness or constipation, get a package of these tablets from your drugist, you will be surprised at the quick relief which they afford. Obtainable everywhere.

The rough stone is now being rapidly placed on the down on the river rout of the new road, they are working a large force of men and will soon have the rough stone on the three miles that has been contracted.
