CONSOLATION. BY WILLIAM CULLEN BRYANT.

[William Cullen Bryant (Cummington, Mass., Nov. 3, 1796—New York, N. Y., June 12, 1862) is the best known of the older American poets of nature. A graduate of Williams college, he entered the law, but soon turned to literary work. During his later years, as editor of the New York Post and as a patriotic writer and orator, he was a man of large and helpful influence in America.]

O, deem not they are best alone
Whose lives are peaceful to our sleep;
The Power who plies man has shown
A blessing for the eyes that weep.

The light of eyes shall all again
The life that overflows with care,
And every hour of sorrow and
Grief shall be a blessing to our care.

There is a day of sunny light,
For every hour and troubled night,
And grief may hide an evening gray,
But joy shall come with early light.

And thou, who've thy friends low bier
Dost shed the bitter drops like rain,
Hope that a brighter, happier sphere
Will give him to thy arms again.

Nor let the good man's trust depart,
Though life his common gifts deny—
Though with a pierced and bleeding heart,
And spurred of men, he goes to die.

For God hath marked each sorrowing day
And numbered every secret tear,
And heaven's long age of bliss shall pay
For all his children suffer here.

Classical Music Explained.

It has been much the fashion among musicians to make no effort whatever to interest or enlighten the general public in regard to instrumental music, but to administer large doses of the heaviest classical selections without a word of comment, and when not appreciated, to boast of the superiority of the profession, and to snub the public for its ignorance and indifference. Edward Baxter Perry's Lecture-Recital idea was the first attempt to point out to the ordinary hearer, the things which were in the composition which he and his brother musicians perceived and enjoyed, and to lead others, by a clear and graphic description in words of the meaning of music, to find and feel such pleasure for themselves. The innovation has been largely copied by other solo artists, and the idea has been adopted even in orchestral concerts such as the series by the Thomas orchestra in Chicago and by the Symphony orchestra of Boston, where the descriptions, or annotations as they are called, are printed out upon the programs, for the enlightenment of each member of the audience. Since this has been the practice, the audience at the Boston Symphony Concerts has increased three-fold.

Mr. Perry will prove the value of his innovation in a Lecture-Recital here to-morrow night at the opera house. Those who always enjoy such concerts will receive additional pleasure and information, while those who habitually do not care for the piano will be gratified to find that they have really enjoyed classical music for the first time in their lives. The remark oftener made than any other by Mr. Perry's hearers is: "I never heard the piano before."

The Lincoln two-cent stamp is a new series, and was placed on sale at all points in the United States last Friday, the centennial anniversary of the birth of the great emancipator. Tobacco Markets of Kentucky and Tennessee.

HOPKINSVILLE, Ky., Feb. 15.—Last week's business upon the tobacco market was satisfactory in every respect. There was a strong demand with prices ruling good and firm. The rush was not so great as has been noted during other weeks recently but it was of the steady kind that kept everybody busy.

On the loose floor sales amounted to 250,000 pounds, which brought prices ranging from \$3 to \$6 for lugs and from \$6.50 to \$10.50 for leaf. No fine grades were offered and some was too high in order.

The local warehouseman of the the Society of Equity sold 21 hogsheds of the 1908 crop, this being the first sale yet made of the new crop. This was all of trash lugs, some of it badly nail-beaten, but even of this inferior grade the price ranged from \$4 to \$6. Something over 100 hogsheds of the 1908 crop has been priced by this organization and steady sales from now on are looked for.

Another heavy sale was made by the Planters' Protective Association, 280 hogsheds of the 1907 crop being disposed of. This leaves only about 900 hogsheds unsold on this market and at the present rate the old tobacco is moving it will not be long until it is all cleaned out.

Receipts of loose tobacco continued good throughout the week, the loose floor, independent rehandling houses and associate printers getting their share.

CLARKSVILLE, TENN., Feb. 15.—The receipts last week were 71 hogsheds, mainly heavy grades. Receipts of loose tobacco are steadily increasing at the printing houses and the warehouses, who are making sales at prices very satisfactory to planters, and therefore there are no rejections. The salemen of the Planters' Association sold 154 hogsheds of old tobacco last week at late current prices and some small lots of the new crop.

Coombs buys all kinds of furs and hides paying the highest market prices in cash.

Mr. C. M. Martin and wife will be in Paducah Saturday, guests at the wedding of Mr. Herbert Martin to Miss Carrie Griffith.

It is almost impossible to get a firstclass troupe here, but we do have some excellent one-man attractions, and on Friday night we will have with us one of the leading artists of the country in the person of Mr. Edward Baxter Perry, concert pianist and lecturer. He has appeared in all the leading cities of this country and Europe, and has everywhere won the audience by his brilliant work. The opera house should be packed to-morrow night, for we have few opportunities to attend such entertainments.

Eyesight Unnecessary.

Those who wonder how the famous blind pianist of Boston, Edward Baxter Perry, who will be heard here tomorrow night at the opera house can travel alone all over the country upon his concert tours, filling between one and two hundred engagements every season, will be still more astonished to learn that he spent several years of study in Europe, making the voyage alone, and living in various foreign cities; also that, although totally blind, he has been from boyhood an expert swimmer, an enthusiastic skater, and that in his summer vacations he rides horseback daily. Mr. Perry gives the following explanation of his means of perceiving surrounding objects in an article in the Century magazine. "It is a combination of the sense of hearing and the sense of touch, both trained to extreme delicacy and unusual services, so that they unite to form a sixth sense, to which the echo thrown back from buildings, walls, and other solid objects, and the increased density of the atmosphere compressed against such objects when approached, serve in place of light and shadow, color and perspective, enabling one to take cognizance of surrounding objects and of their distance, location, and size, and to perceive the whereabouts of open doors, gateways, and the like, almost as readily and accurately as by the use of sight. By this means the blind are enabled to find their way all over familiar buildings and towns with great facility; yet while this phenomenon is so frequent as to become an everyday matter in hundreds of cities throughout the country, it still remains a subject of wonder to the average person of sight."

There was considerable complaint about the tiresome train service to the Lincoln celebration. The trip from this point consumed about 20 hours, and only about three hours were allowed at the Lincoln farm in all that time. Delays of from half an hour to three hours consumed the time. It is said the I. C. will make extensive improvements at once on the Hodgenville branch, laying new steel, putting in longer switches, and in every way bringing this branch up to the standard of the main line. This should be done, as Hodgenville and the Lincoln farm will grow in importance, and there should be ample and speedy transportation provided.
