Rescuing the Dead.

Seventy-One Bodies Already Recovered.

A NUMBER OF OTHERS MISSING.

It is Now Believed That About One Hundred and Fifteen People Perished by the Steamboat Disaster at Lake City, Minnesota—Further Details of the Great Calamity.

LAKE CITY, Minn., July 15.—The excitement consequent upon the awful events of Sunday night has nearly subsided, and the scene of the wreck of the steamer Sea Wing has now a prominent place in the history of the greatest catastrophe that ever occurred in this vicinity. All day long the rescuing crews have been at work at the wreck in the continued search for bodies of the victims.

Two small steamers attached lines to the overturned Sea Wing and succeeded in hauling her nearer the shore, where, during the day, the corps of volunteers with axes and picks succeeded in cutting away all of the inner walls and partitions of the two decks of the boat, leaving only the bare hull, which will probably be blown up with dynamite.

The rescuing parties have succeeded in taking seventeen more bodies from the wrecked steamer, which in addition to the fifty-two taken to Red Wing, one picked up on the shore of the lake and another a mile above the wreck, brings the total number of bodies recovered up to seventy-one. The body picked up near Lake City was that of a woman, yet unidentified. The one found above the wreck was that of John Peterson, of Red Wing.

All day long the First battery of artillery, of St. Paul, were firing over the wreck at intervals of fifteen minutes in the hope of raising some of the bodies yet on the bottom of the lake away from the direct vicinity of the wreck.

It is now reported that the officers of the ill-fated steamer were more or less under the influence of liquor when the boat started from Lake City on the same journey. The number known to have been saved is now estimated at seventy-five, which leaves about 115 people thought to have perished in the wreck. This number will undoubtedly be diminished as fall returns come in from those who escaped.

From all that can be learned, the storm did not seriously effect any other locality than the vicinity of Lake City. Some of the crops on the farms near by, which were in the path of the hurricane, were more or less damaged by wind and hail. The damage to buildings in Lake City will probably not exceed \$100,000, all told, and may fall considerably below that. The bodies taken out yesterday were taken to Red Wing by a steamer where they will be identified as fast as possible.

TRAVELING SALESMAN MISSING.

Mysterious Disappearance of M. S. Marks, at Indianapolis, Ind.

INDIANAPOLIS, July 15.—M. S. Marks, traveling salesman for Moore & Company, of Rochester, N. Y., has disappeared from the Bates house, in this city, in a manner to cause the keenest anxiety as to his whereabouts. He came here last Monday, and after opening and arranging for display a lot of samples in his room, went down into the rotunda.

He told one of the clerks that he was going into the city to see a few customers, and since then there has been no trace of his whereabouts. Saturday the detectives were notified but so far they have not obtained evidence enough upon which to construct a theory. He is 26 years of age and not known to be a drinking man.

Bloody Work in Perry County, Ky.

LEXINGTON, Ky., July 15.—It is reported that July 8 a constable's posse near Hazard, Perry county, Ky., in search of Buck and Zach Fugate, two desperadoes, had a conflict with their ward in the mountains. The constable and one of his assistants were killed and two others were wounded, but Buck Fugate was captured and lodged in jail at Hazard. His friends threaten to rescue him and further bloodshed is feared.

The crowd returned for the woman, but the husband begged her off.

Sir John Ross, commanding her majesty's forces in British North America, in reply to a correspondent here states through his secretary that the published reports that "fabulous sums of money" are being expended upon the forts in his command are incorrect; also that he has issued no special orders with relation to the admission of visitors to the fortifications.

TROOPS FOR PERRY.

Judge Lilly Consents to Hold Court in the Mountains of Kentucky.

FRANKFORT, Ky., July 15.—Governor Buckner has ordered a company of state troops to accompany Judge Lilly to Hazard, the county seat of Perry, to protect him during the holding of court there. The last legislature passed a law giving the governor power to send troops to this section of the state if they were necessary to preserve the dignity of the court.

Capt. E. H. Gaither, of Harrodsburg, will have charge of the company of state guards, composed of a captain, two lieutenants, a surgeon, quartermaster and commissary, four non-commissioned officers and sixteen privates. They will leave Jackson, in Breathitt county, the 21st inst., and carry Judge Lilly thence to Hazard, thirty-four miles.

It is feared that there will be trouble when circuit court begins, July 28, at Hazard, under the charge of Judge Lilly, the circuit judge of that district. It will be the first visit of Judge Lilly to that county since his life was threatened. The burning of the court house by incendiaries two weeks ago is a signal of trouble.

There are four more Huddleston brothers, and as they swear vengeance, and as the Parrotts swear to stand by their kinsman, considerable more bloodshed is expected.

Turner, clerk in the Richmond railway yard, hip hurt, and Joseph Hargraves, ankle slightly hurt.

BRITISH MILITARY MOVEMENTS.

Unusual Amount of Activity to Strengthen the Defenses of Canada.

NEW YORK, July 15.—A special to The World from Ottawa says: That there is an unusual amount of activity in British military and naval circles as regards the defenses of Canada is most apparent, whatever motive may have promoted it. There is an officer of the British army in Canada just now who has been making an inspection of the Canadian Pacific railways, that he may be in a position to immediately report to the British government the capabilities of the road for the rapid transportation of troops and munitions of war from India to the Atlantic coast and vice versa.

The fortifications at British Columbia are being strengthened, and the largest fleet that has ever been stationed in the Pacific is now concentrating at Esquimaux. The fortifications at Halifax are being greatly strengthened, and the most stringent orders have just been issued to prevent any outsider obtaining information as to what is going on inside the citadel and forts at that point. In addition to this, the defenses of Halifax have, this week, been strengthened by the arrival of two large torpedo boats from England. During the present summer the adjutant general of the several military districts are to report on the state of the defenses of the section which each commands. Modern rifles, in place of the Snyder-Enfield now in use, are to be given to the militia.

It is estimated by the government that it will necessitate an expenditure of upward of \$1,000,000 to replace the arms in use with those of improved pattern, and they want to secure the most effective weapon. Several heavy pieces of ordnance are shortly to be shipped from England for the defense of British Columbia, and everything points to the fact that England is making active preparations to meet any invasion of her possessions in America.

Shot His Sweetheart, Then Himself.

READING, Pa., July 15.—Great excitement was caused at Fogleysville, Montgomery county, Sunday, by the murder of Miss Mary Brunot, aged 14, by Clinton Schueck, aged 35, and the subsequent suicide of Schueck. The two had a lovers' quarrel, which was ended by Schueck shooting the girl, killing her instantly. He then shot himself through the head, inflicting a wound from which he cannot recover. The girl bore a good reputation, while the murderer was of questionable character.

UNCLE SAM'S VOLCANO.

First Active Eruption of Mount Bogostoff Since 1796—A Magnificent Sight.

PORT TOWNSEND, Wash., July 15.—News brought by officers and passengers of the steamer Arago confirms the report of Mount Bogostoff being in a state of activity. About two months ago there was a violent eruption on all the islands in the Aleutian group, and soon after Bogostoff, which is on Oumarak island, began emitting steam and smoke and air and lava.

Bogostoff has been an inactive volcano since 1796, when the island upon which it is situated is said to have risen from its original height of 1,600 feet to its present height of 880 feet above the sea level. Professor Elliott, of the Smithsonian institution, has visited the island upon which the volcano is situated, and has made important scientific investigation. The flames of the fire, thousands of feet in height, can be seen at night issuing from the mountain.

Mount Shehadon, which is 5,963 feet high, on Anaga, is emitting steam and smoke, and it is thought will soon be in a state of eruption. This mountain can be seen at sea for nearly one hundred miles, and will be of great good to navigation if it should become active, as the pillar of fire can be seen for a great distance, and will serve as a guide through the dangerous Oumarak passes.

PROVIDENCE, R. I., July 15.—Miss Georgiana Cockcroft, a waitress in Sutton's Weybosset street restaurant, was arrested by United States Deputy Marshal Black, of Binghamton, N.
