Drug Power.

If it requires ten-horse power to start certain machinery, a nine-horse power engine won't answer. It will be no better than no engine at all; you must have the additional force or all your power will be wasted.

So in Medicine

If a drug of a certain strength or potency is necessary to stop the progress of disease, a weaker drug will be no better than no drug at all.

We think of these things. That is why you see on our shelves the preparations of the best chemists in the world. We see to it that our drugs are pure and of standard strength.

We want to supply your drugs and to fill your prescriptions.
