Specifications for New Garbage Contract Soon to Be Issued.

PRESENT CONTRACTOR BIDDER

Renewal of Permit to Use Explosives at the Union Street Railway Station at the West End-Must Conform to Decision of Supreme Court-Another Pier Condemned in St. Andrew's Church - Notes.

Messrs. Warfield and Bayly, who repreent Garbage Contractor Edward Warfield, had an interview yesterday with the Commissioners concerning the forthcoming specifications for the proposed service under the last appropriation. They were disposed to criticise, as too severe, some of the requirements to be enforced under the new contract, but it was explained that the specifications had been modified since the recent publication of the provisions. It is understood that within the next few At isunderstood that within the next few days the revised contract and specifications will be ready for publication and distri-bution, and that the advertisement for proposals will be authorized immediately thereafter.

proposals will be authorized immediately thereafter.

Incidentally the question of vacating the present contract has been discussed between the Commissioners and Mr. Warfield. By the act making an increased appropriation for the service the Commissioners are empowered to enter into a contract for five years, but the existing contract, which expires in 1897, must be set aside, by mutual agreement or otherwise, before there is another provided.

Contractor Warfield is a prospective Contractor Warfield is a prospective bidder under the new appropriation, and it is understood that as the profits at present are on the wrong side of the ledger he will not object to the abolition of the present agreement. It will be remembered that Mr. Warfield, who is the president of the company that became surety for the National Sanitary Company, was forced by circumstances into assuming charge of the service upon the failure of the Sanitary Company.

Constant complaints having been received at the office of the Imilding inspector concerning the condition of the frame building at No. 332 Second street northeast, and it having been declared to be until for occupancy, notice has been given for the enforcement within thirty days of the order of condemnation of December 18, 1894.

It appears that the Supreme Court has passed upon the matter, having issued an order to the extent of regulating the size of the explosives to be employed. Hence, any proceedings for the discontinuance of the blasting must be by suit in equity for violations, if there be any, of the order of the court.

The permit just authorized contains the proviso that the explosives shall conform to the requirements imposed by the Court.

The conclusion was reached yesterday in a conference between the Commissioners, the contractors, and Attorney Sands, who represents Mrs. Morris.
