

# SENATOR S. R. MALLORY FAVORS THE WHITE PRIMARY

**STRONG WORDS OF ENDORSEMENT FROM ONE WHO KNOWS WHAT CONDITIONS COMPEL THE ADOPTION OF THE WHITE PRIMARY FOR MUNICIPAL NOMINATIONS.**

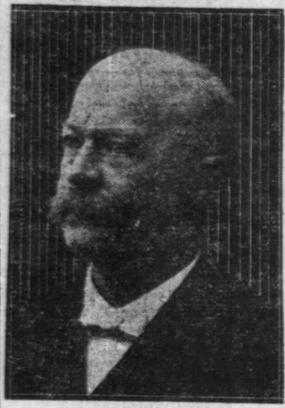

The following letter from Senator S. R. Mallory is in reply to a request from The Journal for his views on the White Primary, and what he says on the matter cannot very well be misunderstood. Senator Mallory writes:

Senator Mallory's Letter, United States Senate, Washington, D. C., March 24, 1905. Frank L. Mayes, Manager of Journal, Pensacola, Fla.:

Dear Sir—In response to your telegram of this date, asking my views on the question of a white primary for the nomination of candidates for city offices to be voted for at the coming city election, I beg to say that I think such a primary is necessary for the general welfare of the community, and I hope that one will be held this year.

My observation for many years past has convinced me that the negro, as a political factor has, in point of intelligent conservatism, improved but little, if any, on what he was during the era of reconstruction. While among them, undoubtedly, are some who have raised themselves above the dead level of ignorance, prejudice and indifference to the public weal, which seems everywhere to be largely characteristic of that race, it is none the less true that the influence of such examples on the masses of our negro population has had no appreciable effect in rendering them better qualified to shoulder the burdens and responsibilities of self-government. What the South is to-day, she is in

spite of the negro vote. That she is not in a condition of political and social chaos, comparable only to that of Santo Domingo and Hayti, is because our white men and women had the strength and the courage, in the face of an indifferent if not a hostile world, to throw off the intolerable yoke which the vote of the negro and the unscrupulous cunning of his white allies had imposed on them. The experience was bitter, the remedy was heroic, but looking backward over those nine years of political oppression and riotous misrule, will any in-

HON. S. R. MALLORY.

telligent man deny that we did right in eliminating the negro from state politics, and take effective steps to secure white supremacy in that political sphere?

I cannot believe that anyone wishes in any degree a return to the conditions to which I have adverted. Nor do I think that anyone seriously believes that by his practical elimination from state politics in the South, the negro is suffering any injustice. It is undoubtedly for the safety of both races, the preservation of order, the security of property and the stability of our political institutions, and under such conditions, in the light of experience, that he is not a significant political factor cannot be a serious cause of complaint on the part of the negro.

Whether as a political factor the negro is in a universal majority over his white fellow citizen, or whether in the minority he holds the balance of the voting power as between opposing white candidates for public office, is a difference only in degree and not in kind. The community in which a negro majority elects its public officers over the candidates of a white minority is under negro political domination, and if such conditions continue, the future of that community can be easily foretold. Where a negro minority holds the balance of power, elects one set of those candidates, it is none the less an imposition of his will in the designation of the officials of such a community, and when the lines are sharply drawn, as they have been in the past in some of our municipal contests, the manifestation and consciousness of ability to exercise such an important power is as demoralizing to the negro, as it is regrettable to the observant white man.

In my judgment, it is the part of wisdom, and is in the interest of every man, woman and child in the city, that the control of our municipal affairs should be exclusively in the hands of our white people, and if a white primary will secure such a desirable consummation, and I am satisfied it will, there surely can be no sufficient reason against it. Very truly, etc., S. R. MALLORY.

### Are You Engaged?

Engaged people should remember, that after marriage, many quarrels can be avoided, by keeping their digestions in good condition with Electric Bitters. S. A. Brown, of Bennettsville, S. C., says: "For years, my wife suffered intensely from dyspepsia, complicated with a torpid liver, until she lost her strength and vigor, and became a mere wreck of her former self. Then she tried Electric Bitters, which helped her at once, and finally made her entirely well. She is now strong and healthy." All druggists sell and guarantee them, at 50c a bottle.

# INHERITED SCROFULA

When a child I had a very severe attack of Diphtheria, which came near proving fatal. Upon recovery the glands of the neck were very much enlarged, and after the free use of iodine, the right one was reduced to its normal size, but the left one continued to grow—very slowly at first, until it was about the size of a goose egg, which began to press on the windpipe, causing difficult breathing, and became very painful. An incision was made and a large quantity of pus discharged. The gland was removed, or as much as could with safety be taken out. For ten years I wore a little piece of cloth about an inch long in my neck to keep the place open. During this time I had to have it cut open by the doctor every time I took cold or the opening clogged. In the Spring or early Summer of 1884 I was persuaded by my wife to use S. S. S., which I did strictly in accordance with directions. I took twenty-six large bottles, and was entirely cured, for I have not suffered since that time. B. S. RAGLAND, Royal Bag Mfg. Co., Charleston, S. C.

Only a constitutional remedy can reach an hereditary disease like Scrofula. When the blood is restored to a normal condition and the scrofulous deposits are carried off there is a gradual return to health. S. S. S. is well known as a blood purifier and tonic. It is the only guaranteed, strictly vegetable remedy sold. If you have any signs of Scrofula, write us and our physicians will advise you free.

## SAMPLE ROAD TO BE BUILT HERE

The Jacksonville Times-Union of Sunday contained the following: Experimental roads are to be built by government experts of the roads inquiry division of the Department of Agriculture during the next month at Tallahassee, Fernandina and Pensacola.

Experts John H. Dodge and J. H. Eldridge who have had charge of the work at Gainesville since they left Jacksonville, have about completed the sample roads and street in that place.

Experts John H. Dodge and J. H. Eldridge to-morrow and take with him the bulk of the road machinery used at Gainesville. A road and street is to be built at Tallahassee as an object lesson for the members of the legislature, which will convene in Tallahassee April 4.

With the red clay of old Leon and the quantities of sand that can be obtained within a comparatively short distance, the experts claim that they will be able to build a magnificent road on the outskirts of Tallahassee. A sample street will also be paved with rock.

At Pensacola, the rock crushing plant will be put to work on the rock brought to that port as ballast, and the road experts say that the rock will make a splendid paving material. J. H. Eldridge, who was in charge of the government work here, will go to Fernandina this week to start work on the road that is to be built to connect the city with Amelia Beach. There is an abundance of material on hand, and it is expected that the road will be quickly completed.

Col. A. S. Mann, who has been instrumental in securing the road building machinery and experts for work in Florida during the winter, says that now that the weather is getting warmer, there is a big demand for the road builders from various parts of the country. Colonel Mann wants to keep the experts and machinery here for another month. He left for Washington last night to present the matter to Director Martin Dodge of the roads inquiry department, and get him to allow the men and machinery to remain so that the legislators may have an object lesson in road building.

## So Soothing

Its Influence Has Been Felt By So Many Pensacola People.

The soothing influence of relief. After suffering from itching Piles, From Eczema or any itchininess of the skin, Makes one feel grateful for the remedy. Doan's Ointment has soothed hundreds. Here's what one Pensacola citizen says:

H. E. Powell, machinist by trade, residing on West Cervantes street, says: "I was a sufferer from itching piles for more than seven years, and nothing I could get seemed to help me. I suffered both day and night, and it was impossible for me to get to sleep at night on account of the terrible suffering. When I read about Doan's Ointment I thought I would try it, and procured a box at Sidney Kahn's drug store, No. 9 South Palafox street. It cured me completely. I cannot praise it highly enough, and have recommended it to more than a score of friends during the past three months, and I know of one friend who used it for eczema on his hands and he has since told me that it cured him promptly and effectively. I unhesitatingly recommend a trial of Doan's Ointment to anyone suffering from any itching skin disease. I feel confident that they will not be disappointed in the results obtained."

### COUNTRY SAGE LEAVES.

Brent, Fla., March 27.—The days are growing long and the sun becoming hot. The temperature reaches the seventies almost daily now and the flies are multiplying rapidly.

The church attendance at the "monthly meetin'" last Sabbath was pretty fair, considering the threatening aspect of the weather. Sunday night the rain came down by inches and the wind blew by the mile.

Mr. Bliss has a sharp pen and uncommon sense. Who else thought of a cheap substitute for a duplicate railroad, in opening up inland waterways to connect this deep water port with steamboat navigation to the rich Perdido country, the fertile cotton belt and the great mineral sections of Alabama?

What a revolution this "opening" would prove in our business affairs! If Uncle Sam should catch on to this internal improvement, how readily he would open up this new commercial way—and locked and free from icebergs.

If Andrew Carnegie could be directed from his everlasting charm for libraries, to drop a mite-y appropriation for this benefit of tolling millions through long ages to come, it would immortalize his fame while water runs and history lasts.

If Mr. Bliss could wield the same expert hand in writing up the crooks in municipal affairs with which he has been so successfully writing them down, it should be an enviable privilege for all citizens who desire a "greater Pensacola" to cast an emphatic vote for the "reign" of Bliss.

With the present forecast for a stormy term I was agreeably surprised to see him offer an acceptance of the guiding city reins through this crisis of Pensacola's destiny.

May no cruel proposition arise to beat him with competing Clubs!

Strawberries are unusually late—as well as garden truck generally. There will be but few berries in market before the middle of April.

Spring crops are starting very rapidly now, and will soon afford a home supply of many articles, if no abnormal frosts occur after this date. The demand will be great while the fleet is in our harbor, and the farmers are planting heavily to meet the "hungry cry."

Clopton Brothers are rushing in a fine assortment of crops. Their green fields already charm the passers by. We are forcing cucumbers by starting them under glass, and transplanting into the open fields at this date. The outlook for a fine crop of fruit
