

DUESSELDORFER BEER

THE only perfect stimulant is one which makes no reprisals on the system—one which refreshes the fatigued muscles and the wearied mind without demanding payment from the nerves. Whiskey, wine, coffee and tea are reactionary. DUESSELDORFER Beer is nutritious, strengthening and wholesome. It supplies the tissue that the others destroy. Millions of workmen drink it to renew the strength that their labors consume.

But for every drink of the other four, your body pays the penalty.

Duesseldorf is the World's Standard of Perfection

Unanimously awarded Grand Prize by Louisiana Purchase Exposition, 1904, and Paris, 1900.

RUTHLESS DESTRUCTION OF FLORIDA'S FORESTS

Magnificent Timber Lands Slowly But Surely Being Destroyed by Turpentine and Lumber Men.

(C. C. Curtis, in Recreation.)

One of the most attractive features of visitors in Florida is the forest growth, particularly the stands of pine. These magnificent trees cover extensive belts of sandy soil, especially in the central and northern portions of the state, and present a picture of sylvan beauty scarcely rivaled in any land. The great charm of these forests is found in their open formation. The trees are not tolerant of shade, and the weaker ones being crowded out in the struggle for existence, a wide separation of trees results in the mature forest. These open forests, extending for miles in many sections, permit sufficient light to filter through the wide crowns of the trees to support a carpet of grass, or in wetter localities of saw palmetto. The effect produced by this relationship is one never to be forgotten; the straight, clean trunks rising seventy-five to one hundred and twenty feet, surmounted

by a broadly branching crown clothed with plum-like branches and below, until the view is closed in the distance by the columnar tree trunks, a Savannah-like growth of grass, sometimes interspersed with palmetto. Where these forests approach the lower lands, the so-called "bay heads," the Sabal palmetto makes its appearance and adds a characteristic and unique feature to the vegetation. Along the rivers and in the swampy places the pines and the palmettos give way to various growths, as for example, the live oaks and magnificent stands of cypress. These grand trees, decked with a gray mantle of Florida moss, present a third feature of the forest growth that is as attractive and distinctive as any in the state. It has been my privilege to see brought together into such striking contrasts such varied, characteristics and attractive forest formations.

AN OLD IDEA Shown to Be Absolutely False by Modern Science.

People used to think that baldness was one of those things which are handed down from generation to generation, from father to son—just like a family heirloom. Science has shown the falseness of this belief by proving that baldness itself is not a constitutional disease, but the result of a germ-invasion of which only Herpicide can effectually rid the scalp. Washing only cleans the scalp of Dandruff, it doesn't kill the germs. Destroy the cause, you remove the effect. Newbro's Herpicide will do this in every case. It is also a delightful dressing. Sold by leading druggists. For sale by W. A. D'Alemberte, druggist and apothecary, 121 S. Palafox. Send 10 cents in stamps for sample to The Herpicide Company, Detroit, Mich.

Shamefully Squandered. One of the most unpleasant impressions of Florida is associated with these same forests. If present conditions are allowed to continue, all the wealth and beauty of this life will, in a few years, be but a memory. In this timber the state has one of its most important assets, and one that is being shamefully squandered. The widespread, rapid and wasteful destruction of the forests can only be characterized as disgraceful to the state. If proper forestry laws could be enacted, these forests would be self-perpetuating and one of the principal resources of the state for all time. The lumber and turpentine interests have been, for several years, quietly at work securing title to this timber, and at present control the larger portion has been organized on an extensive scale. For a few years pitch or rosin is gathered from the trees by a wasteful system of boxing, as shown in the illustration. A box is first cut at the base of the tree. A few inches of the bark is then removed above the box to allow the pitch to flow out.

Gerst BEER

Everybody knows how good a good beer is, and those who try it know that Gerst beer is the best. This is something you should know and remember. Always call for "Gerst Beer," made famous by the sunny South.

Wm. Gerst Brewing Co., Nashville, Tenn. PETER BELL, Distributor for Pensacola.

This scoring of the trunk is extended each spring until it reaches a height of three or four feet, or frequently as high as a man can conveniently reach. Every tree that is large enough to be boxed is used in this work, even though not more than six inches in diameter. This method of turpentine orcharding costs but much more economically practiced by adopting the new system introduced by the bureau of forestry. When the Florida turpentine gatherers have completed their work in a section they are followed by the lumbermen who effect a complete devastation of the forests.

Killed by Fires. In certain favored localities the trees could be restored to their original condition, but owing to the universal practice of firing the grass carpet in the spring, this slow method of restoration is rarely realized. In one section of about an acre seventy-eight dead seedlings, ranging in height from six inches to two and a half feet, were counted. As larger and larger areas of the country are exposed through removal of the timber, the problem of restoration, owing to the consequent desiccation of the soil, becomes more difficult. As a result of this shortsighted policy of the state in controlling the lumbering and the annual firing of the vegetation, there appears to be little hope of the preservation of the forests.

What the result of this neglect will be can not be foretold at present. Just how far the changed climate in the south Atlantic region is due to the destruction of the forests in the gulf and adjacent states, I am not prepared to say. This is a subject that has not received the attention it deserves, but there is good reason to believe, based on observations made abroad, that material changes may be wrought in the climate by widespread forest destruction. The history of the climatic changes in Florida is deeply interesting. The first destructive freeze for fifty years occurred in 1886, when a three days blizzard from the northwest swept over the state and cut back or at least defoliated all the orange trees down to about the 29th degree in all but the most protected sections. Since that time there has been a succession of frosts, as far south as Tampa, that have materially injured the crops in some places. Especially have its effects been felt in the new groves, which were either killed or crippled to such an extent that few plantations have been brought into good condition. In December, 1894, a still more severe north-west blizzard defoliated all the trees as far south as the Manatee river, and the destruction was rendered complete by a freeze in February, when the groves were putting forth their young leaves and the tender shoots were killed with sap. From Tampa north the trees of the orange belt were either killed outright or so enfeebled that the majority were unable to rally. People in the north have no idea of the extent of the ruin and desolation wrought by this calamity. A great industry, built up with reckless enthusiasm owing to the large returns secured, together with extensive interests associated with orange groves, were wiped away almost in a single night. Today in the place of these productive farms, attractive homes and busy towns there remains but a fraction of all this prosperity. Abandoned fields or white sand, dilapidated buildings and half populated villages reveal the nature and extent of the destruction. It is to be questioned if this country has ever experienced such extensive destruction of prosperity and financial ruin of so many people, for while the estimated loss of \$100,000,000 may not be compared with some other calamities that have overtaken the country, it is to be borne in mind that in this case we are dealing with a misfortune that cannot to any considerable extent be overcome.

Forests a Barrier. While it is true that the destruction of the forests in Florida and in the neighboring states to the northwest is responsible for the climatic changes, it is significant that the cold waves are always preceded by severe wind storms from the north or northwest. It will readily be seen that forests afford an effectual barrier to the progress of such storms and thus prevent the impinging of the cold wave before it can reach the warmer sections of the country. Be this case as it may, we may consider what will be the result to the peninsula of the destruction of the forests in the state. At present the country is especially well supplied with water, but when these great areas are stripped of the protection afforded by the trees it would appear that the water, which is already deficient of the soil, Sandy soil retains the least moisture, and when exposed directly to high temperatures it can not hold sufficient moisture, save for such meager vegetation as characterizes arid districts. To the majority of people in Florida today it perhaps appears impossible that these great forests can be swept away. In this connection it may be stated that at the present rate of consumption there is not enough timber in the United States to meet our demands for thirty-five years. The consumption is increasing yearly, and it is evident that timber so accessible as that of Florida, with its cheap means of transportation will soon be consumed. The pine will have disappeared in a few years, and attention will then be directed to the cypress, which is already of great value. Unless the state can be impressed at once with the necessity of absolute protection and a conservative management of its forests, it would seem that such changes in the present conditions would ensue as to necessitate the practical abandonment of the fruit industry and the introduction of other pursuits. It is not beyond the range of possibilities that in the next generation the names of certain towns in Florida will be simply historical in character. Among these may be mentioned Citronelle, Limona, Mandarin, Orange, Orangedale, Port Orange and Tangerine. The time may come when the children will inquire why the towns were given such names, just as in the middle and western states the Elk creeks, Elk rivers, Buffalo creeks and Buffalo rivers are today meaningless terms.

MONDAY WE WILL SELL FULL SEAMLESS HOSE AT 7 CENTS A PAIR OR 75 CENTS DOZEN. SEE OUR WINDOW. F. E. BRAUNER.

THE GREATEST EPIC OF MARRIAGE

The first is the most crucial time. If for the first time the greatest event in your married life is about to occur, how expectant, how wrapped up in it you find yourselves.

You try to overlook, but in vain, that element of uncertainty and danger that you have been led to expect from the experience of those mothers and fathers who have struggled through this ordeal in ignorance of

Mother's Friend

what it is, and what it does.

If at this time every expectant man and wife might know of this greatest of boons, devised for the express purpose of alleviating and dispelling the suffering and consequent danger of childbirth, how quickly would all doubt and worry be dissipated.

Mother's Friend is an invaluable liniment for external massage, through whose potent agency countless mothers have been enabled to experience the joy of parturition for the first time without danger to themselves or their off-spring.

BRADFORD REGULATOR CO., Atlanta, Ga.

NEWS OF THE WEEK AT MARIANNA

Special to The Journal. Marianna, May 20.—The Board of Trade that has been established here is getting into working order with a membership of 102. Each member paid initiation fee of \$1.00.

The Ladies Aid of the Methodist church were very successful with their bazaar and ice cream supper. They cleared \$138.75. This will go toward furnishing the parsonage.

Judge Francis B. Carter will resign his place on the supreme bench and return with his family to this, their former home. They will occupy the new Merritt house.

Invitations have been received to the marriage of Miss Ethel Schmetz, of Hampton, Va. to Dr. N. A. Baltzell, of this place. They are both well known in society, Miss Schmetz having visited her friend, Miss Dekle, for several winters. Dr. Baltzell is one of Marianna's most prominent young men. He is a graduate of Tulane University and proprietor of the City Drug Store. After an extended bridal tour they will be at home at the Baltzell home in West End.

Mrs. J. J. Newbold has returned from a visit to her brother, E. Calhoun, in Pensacola.

Mr. Crossman, of Columbus, is in the city. He is always a welcome guest (to the young ladies.) Society enjoyed a dance at the Davis opera house.

Mr. Walter Rawls will resign his position as superintendent of the Reform School the first of July.

A Dismal Calamity. It was a dismal calamity, when you lost your health, because indigestion and constipation have sapped it away. Prompt relief can be had in Dr. King's New Life Pills. They build up your digestive organs, and cure headache, dizziness, colic, constipation, etc. Guaranteed at all drug stores; 25c.

MONDAY WE WILL SELL 10 YARDS ALPINE LAWN FOR 25 CENTS. SEE OUR WINDOW. F. E. BRAUNER.

SANOZOL LOTION AND SOAP.

POSITIVE CURE FOR ALL SKIN DISEASES.

The wonderful discovery of the famous specialist in skin diseases, A. J. Fulton, M. D., Brooklyn, N. Y. Sanazol treatment is external only. SUFFERERS FROM

Eczema, Lupus, Herpes, Ringworm, Prurigo, Scrofuloderma, Skin Cancer, Piodermitis, Psoriasis, Ecthyma, Lichen, Syphilis, and all other forms of ulcerative, scaly and parasitic skin diseases find immediate relief and permanent cure by the use of Sanazol. It removes pimples and blackheads and cures sweaty or itching feet.

Some of the now famous cures by Sanazol treatment were fully described in the New York World of March 9 and the Brooklyn Daily Eagle of March 29, 1904.

August Newman of Enfield street, near Graves Place, Brooklyn, writes that he had been a sufferer from skin eruption for eight years called various names by different physicians. Finally he was induced, in sheer desperation, to try Sanazol. He enjoyed his first unbroken sleep after the first bottle of Sanazol. His reward for a conscientious treatment of this remedy for two months was a complete cure.

THE SOAP has no equal. Its daily use without lotion will give your face and hands a perfect skin, restoring the deficient respiratory conditions of your skin to normal health, producing the freshness of youth and a glow of health and beauty. Try it.

Those afflicted with itchy and scaly skin diseases suffer most during hot weather. Avoid this by the use of Sanazol.

Write for testimonials and full particulars of Sanazol treatment (free of charge). Treatment requires combined use of lotion and soap. Sent on receipt of price or at druggists. Lotion, half pint, \$1.00; Soap, 25c per cake or jar (3 cakes, 65c.). Address Sanazol Laboratory, Dept. B, 14 100-102 Elton St., Brooklyn, N. Y.

ALACHUA PEOPLE WILL GROW PECANS

NINETY ACRES ALREADY IN ONE GROVE, AND ACREAGE WILL BE DOUBLED.

The progressive citizens of Alachua are determined not to be outdone by any others in this section—or anywhere else, for that matter, says the Gainesville Sun. The town is composed of energetic citizens who have an ambition to do as well if not better than "the other fellow," when it comes to public or private improvements or personal advancement.

Alachua has thrived within the past year as possibly no town in the state of the same population has thrived. The business men have prospered in everything in which they had dealing, the farmers have made prolific crops, the laborers have been kept employed at good salaries, and altogether the citizens of that thriving town and vicinity have joined hands in the march of progress and none were jealous of the others, which in a large degree accounts for their success, collectively and individually.

But the latest industry for Alachua is the culture of pecans. J. I. Holder and H. C. Graves, two enterprising citizens who possess the faculty of seeing a long way ahead, have determined to make at Alachua the largest and most profitable pecan grove in the state, if not in the southeast. These gentlemen have already planted ninety-five acres in pecans, choice and hardy varieties, which will be paying them handsomely in a few years. They do not intend to stop at this, however, but propose to set and cultivate two hundred acres before they will have finished their task and reached the height of their ambition.

A pecan grove, as has been said by a practical grower, is better than a bank. The trees are exceptionally hardy and not subject to injury or destruction like the average crop. When once set and gotten in the proper condition there is no more expense in sustaining them. The proper varieties bear prolifically and there is always a market for the product at good prices, hence when a pecan grove is brought into proper bearing it makes the owner independent for the remainder of his life and for his surviving family.

Messrs. Holder and Graves were visitors to Gainesville Friday and expressed themselves as being pleased with their future prospects.

EXPOSURE The cold draughts of air, to keen and cutting winds, sudden changes of temperature, scanty clothing, undue exposure of the throat and neck after coughs and colds, Ballard's Horchound Syrup is the best cure.

Mrs. A. Barr, Houston, Texas, writes, Jan. 31, 1902: "One bottle of Ballard's Horchound Syrup cured me of a very bad cough. It is very pleasant to take." 25c, 50c, \$1. Sold by all druggists.

SUMMER COURSE

The special rates offered by the Pensacola Business College for the summer course are within the reach of every ambitious young man and woman. Special classes in Business Bookkeeping, Stenography and English Training are being arranged. Enroll now for good position in the fall. Phone 990 or 1037.

NOTICE

To the citizens and contractors of Pensacola: We, the membership of the Bricklayers and Plasterers' Union No. 1, of Pensacola, wish to state that Mr. S. S. Moses is no longer connected with No. 1 of Pensacola, and is considered unfair to all union labor.

H. E. BUGG, CHAS. RICKS, JAMES WHITEHEAD, Committee.

The Bricklayers and Plasterers', No. 1, of Pensacola, do hereby endorse the Carpenters and Painters in their effort for the eight-hour day, and at their regular meeting last Monday voted to help them in any way possible.

H. E. BUGG, CHAS. RICKS, JAMES WHITEHEAD, Committee. 12may30d

NOTICE.

Notice is hereby given that the City Council at its meeting held on May 16th, 1905, selected the following Inspectors and Clerks of election to serve at the election to be held in the City of Pensacola, June 6th, 1905: Precinct 12, Inspectors—A. C. Binkley, F. P. Bingham, R. Pope Reese; Clerk, J. W. Coons. Precinct 13, Inspectors—J. E. Wolf, R. P. Warton, A. A. Fisher; Clerk, Frank Maura. Precinct 14, Inspectors—W. J. Berry, H. Wolf, B. L. Gladden; Clerk, Joe Reed. Precinct 15, Inspectors—J. D. Goss, Geo. P. Wentworth, Tom Nece; Clerk, John Massey. That the following polling places have been selected to-wit: Precinct 12—Corner Alcaniz and Intendencia streets. Precinct 13—Corner Garden and Palafox streets. Precinct 14—Corner Palafox and Romana streets. Precinct 15—Corner DeVillier and Intendencia streets. C. L. SHINE, City Clerk. 19may

An ordinance relating to outstanding City Scrip.

Whereas, the Comptroller of the City of Pensacola, in his last annual report included in his statement of floating debt of the City the following item: "Outstanding Scrip \$1,219," and whereas it appears from said report that the "outstanding scrip" referred to are old warrants issued by the city of Pensacola previous to the year 1882, which have not been presented for payment within the time required by law, and that all action thereon is barred by the statutes of limitation; therefore, Be it ordained by the Mayor and Council of the City of Pensacola:

Section 1. That the Comptroller of the City of Pensacola be, and he is hereby authorized and directed to charge on his books the said item, viz: "outstanding scrip \$1,219.00" (Twelve Hundred and Nineteen Dollars) which appears in his said last annual report as part of the floating debt of the city to the city's "profit and loss" account.

Section 2. That all ordinances and parts of ordinances in conflict herewith be and the same are hereby repealed. Passed April 19th, 1905. Approved April 29th, 1905. T. E. WELLES, Mayor. Attest: C. L. SHINE, Clerk. 30aprowaw

An ordinance to amend Section ninety-two of the Code of Ordinances of 1902 of the City of Pensacola, relating to the width of sidewalks upon certain streets. Be it ordained by the Mayor and Council of the City of Pensacola:

Section 1. That Section ninety-two of the Code of Ordinances of 1902 of the City of Pensacola, be amended so as to read as follows:

Section 92. Sidewalks on both sides of Palafox street, between Wright and DeSoto streets, and on both sides of Garden street, between Spring and Reus streets, shall be eight (8) feet wide.

Section 2. All ordinances or parts of ordinances in conflict herewith be and the same are hereby repealed.

Section 3. That this ordinance shall take effect immediately upon its passage and approval. Passed April 19th, 1905. Approved April 29th, 1905. T. E. WELLES, Mayor. Attest: C. L. SHINE, Clerk. 30aprowaw

SMOKE A GOOD ONE **FRANCES** FRANKLIN, DEAN, MYE & CO. BUREAU, MOBILE, ALA.
