A Baby's

is very much like the blossom-

ing of a flower. Its beauty and

perfection depends entirely

upon the care bestowed upon

its parent. Expectant mothers

should have the tenderest care.

They should be spared all worry

and anxiety. They should eat

plenty of good nourishing food and take gentle exercises. This

will go a long way toward preserv-

ing their health and their beauty

as well as that of the little one to

come. But to be absolutely sure

of a short and painless labor they

should use

regularly during the months of gesta-tion. This is a simple liniment, which is to be applied externally. It gives strength and vigor to the muscles and prevents all of the discomforts of preg-nancy, which women used to think

were absolutely necessary. When Mother's Friend is used there is no

danger whatever.

Special to The Journal. Beulah, July 13 .- This locality has been blessed with copious showers lately, and now the cry goes up "too much rain for pulling and curing fodder." Thus it is the average of mankind, always wants a little more or a little less of what the Lord in His infinite wisdom desires to give. Just think of what it would be if man had the power to make the weather. What a mixture of it he would make. As for me I am inclined to be a fatalist and believe what is to be will be; and therefore borrow no trouble, but take the good and the bad just as it comes without any kick. The first I appreciate and enjoy; the last I cannot help, so I don't fret, but take the world as I find it.
