FLORIDA MUCK TO COMPETE WITH COAL

Unique and Important Industry Now in Operation in City of Orlando.

One of the most unique and far-reaching enterprises in the state of Florida is in operation in this city, which will positively settle the fuel question in years to come.

The knowledge of the use to which the peat beds of Scotland and Ireland are put in many sections of these countries depending wholly upon this decomposed vegetable product for fuel, is probably what induced Mr. J. N. Cheney of the Orlando Water and Light Company to experiment with the muck of this locality.

The new factory is located somewhat nearer to the muck bed than the old one was, and is so constructed that it can readily be moved to other beds nearby when necessary.

Accidents will happen, but the best-regulated families keep Dr. Thomas' Electric Oil for such emergencies. It soothes the pain and heals the hurts.
